ANALYSIS

CATALYST / TODAY'S DRIVER

Current move driven by 12.5% surge on strong volume (1.91x) as stock approaches 52W high. Forward catalyst: November 05 earnings print (87d) with potential for revenue inflection as spatial genomics adoption accelerates in biopharma R&D budgets.

BUSINESS & POSITION

10x Genomics provides single-cell and spatial biology tools enabling researchers to decode complex biological systems at unprecedented resolution. Platform leader in genomic analysis instrumentation with recurring consumables revenue model and expanding applications in oncology, immunology, and neuroscience research.

FACTOR & THEME

Direct play on AI-driven drug discovery and precision medicine tailwinds. Biotech R&D spending recovery plus NIH budget expansion favor genomics infrastructure providers. Spatial biology platform adoption accelerating as pharma shifts to multi-omic approaches.

BREAKOUT SIGNAL

Close above $58.57 on vol >1.9x of 20d avg

INSTITUTIONAL

Volume surge to 1.91x on 12.5% gain suggests institutional accumulation into breakout attempt. No insider buying in last 90d. Float of 117M provides liquidity for fund positioning. Healthcare sector leading (+6.4% vs SPY) provides sector-rotation tailwind into this genomics infrastructure name.

EARNINGS

EARNINGS IN 87D

EARNINGS CONTEXT

Next earnings November 05. Consensus and beat history unavailable from data feed; cross-reference with earnings transcript for Q2 guidance and instrument placement trends.

KEY RISK

Thesis invalid on close below $52.50 (recent consolidation base support), or if November 05 earnings show instrument placement declines signaling slower spatial biology adoption than expected.

ANALYSIS

Spectacular 12-week RS of +181 vs SPY and prox_52w at 97.8 signal extraordinary leadership, but rs_line_new_high=false and base_tight at 3.9 (wider than VCP ideal <2.0) prevent A-grade. Strongest disconfirming evidence: RS line not confirming new price high suggests internal rotation or distribution on prior rallies. Base width indicates choppier accumulation. Healthcare sector leadership and genomics theme momentum support follow-through, but lack of RS line confirmation at new price high downgrades from institutional breakout to strong momentum trade. Conviction: Medium

Signal: Close above $58.57 on vol >1.9x of 20d avg

ANALYSIS

CATALYST / TODAY'S DRIVER

Just reported earnings (Aug 03, -7d); 8% continuation move suggests beat or raised guidance. Forward catalyst path: next quarterly print ~November (estimated 90d cycle) plus potential partnerships in AI-designed therapeutics as synthetic DNA platform enables generative biology applications.

BUSINESS & POSITION

Twist manufactures synthetic DNA at scale using silicon-based platform, enabling gene editing, antibody discovery, and next-gen sequencing applications. Category leader in synthetic biology infrastructure with expanding pharma partnerships for antibody therapeutics and data storage applications.

FACTOR & THEME

Core exposure to AI drug discovery (synthetic DNA enables rapid screening of AI-designed molecules), genomics R&D recovery, and emerging data storage theme (DNA as archival medium). Synthetic biology positioned at intersection of biotech and computation.

BREAKOUT SIGNAL

Close above $124.88 on vol >1.6x of 20d avg

INSTITUTIONAL

Volume only 1.63x limits conviction in institutional sponsorship of this post-earnings continuation. Float of 55M is tight, allowing momentum if buyers persist. Healthcare sector leadership (+6.4%) provides macro tailwind. No insider buying in 90d window.

EARNINGS

REPORTED

EARNINGS CONTEXT

Just reported Aug 03. Continuation move suggests beat and/or guidance raise; cross-reference SEC 8-K for specifics. Historical beat pattern and forward estimates unavailable from data feed.

KEY RISK

Thesis invalid if stock closes back below $115 (likely post-earnings gap support), or if subsequent earnings in ~90d show revenue growth deceleration as pharma partnership pipeline stalls.

ANALYSIS

Explosive +117 RS vs SPY and prox_52w at 99.4 (essentially at new high) demonstrate world-class momentum, but volume at only 1.63x and base_tight at 5.05 (very wide, indicating choppy action) prevent A-grade. Strongest disconfirming evidence: base width of 5.05 suggests this has been a volatile, erratic run rather than clean institutional accumulation; rs_line_new_high=false despite being near 52W high indicates RS momentum not yet confirmed at new price extremes. Post-earnings continuation with healthcare sector wind is constructive, but technical structure lacks the tightness and volume conviction for institutional breakout grade. Conviction: Medium

Inst. Own	**- (data lag)**

ANALYSIS

CATALYST / TODAY'S DRIVER

Current move: 6.8% gain on 2.35x volume suggesting institutional buying into consolidation breakout. Forward catalyst: November 05 earnings (87d) with potential for same-store growth and AI diagnostic imaging rollout updates; possible M&A as radiology consolidates.

BUSINESS & POSITION

RadNet operates the largest network of outpatient diagnostic imaging centers in the U.S., providing MRI, CT, PET/CT, and other modalities. Platform consolidator in fragmented radiology market with AI-assisted diagnostics deployment accelerating throughput and margin expansion.

FACTOR & THEME

Healthcare utilization recovery post-COVID plus aging demographics driving imaging volume growth. AI diagnostic tools (partnership with DeepHealth) enable faster reads and lower radiologist costs. Outpatient shift from hospital-based imaging provides structural tailwind.

BREAKOUT SIGNAL

Close above $77.28 on vol >2.3x of 20d avg

INSTITUTIONAL

Volume at 2.35x on 6.8% move is solid institutional signal. Float of 66M allows fund accumulation. Healthcare sector outperformance (+6.4% vs SPY this week) provides sector rotation wind. No insider buying in 90d window limits top-tier conviction.

EARNINGS

EARNINGS IN 87D

EARNINGS CONTEXT

Next earnings November 05. Consensus and beat history unavailable from data feed; key metrics are same-store scan volume growth and AI deployment progress across center network.

KEY RISK

Thesis invalid on close below $72.00 (likely consolidation base low), or if November earnings show same-store volume declines signaling imaging demand weakness despite utilization recovery narrative.

ANALYSIS

Strong +33 RS vs SPY, prox_52w at 90.0 (breakout zone), and volume at 2.35x are solid, but rs_line_new_high=false and base_tight at 4.63 (wide) prevent A-grade. Strongest disconfirming evidence: base has been choppy (4.63 ATR range) rather than tight VCP-style coil; RS line not at new high despite stock near 52W high suggests lagging leadership confirmation. Healthcare sector leadership is a tailwind, but technical structure lacks the institutional-quality tightness. Momentum trade with sector wind, not a classic breakout setup. Conviction: Medium

Above 50MA	**-**
Fwd P/E	**-**
Short %	**-**
Days to Cover	**-**
Inst. Own	**- (data lag)**

ANALYSIS

CATALYST / TODAY'S DRIVER

15% explosive move on 2.04x volume suggests news catalyst (verify for earnings beat, contract win, or refinery margin expansion). Forward catalyst: November 06 earnings (88d) with potential for specialty product margin expansion and renewable diesel project updates.

BUSINESS & POSITION

Calumet produces specialty hydrocarbon and fuel products including solvents, waxes, and base oils from petroleum feedstocks, plus expanding renewable fuels production. Niche refiner pivoting toward higher-margin specialty chemicals and sustainable aviation fuel to diversify from commodity refining.

FACTOR & THEME

Energy sector leadership (+5.7% vs SPY) plus Materials outperformance (+5.0%) provide dual tailwinds. Renewable diesel and sustainable aviation fuel (SAF) projects tap energy transition theme. Specialty chemicals margin recovery as industrial production rebounds.

BREAKOUT SIGNAL

Close above $45.47 on vol >2.0x of 20d avg

INSTITUTIONAL

Volume at 2.04x on 15% surge indicates significant buying, but needs confirmation this is institutional vs. headline-driven retail chase. Float of 58M is tight, enabling momentum continuation if funds engage. Materials sector leadership supports positioning. No insider buying in 90d.

EARNINGS

EARNINGS IN 88D

EARNINGS CONTEXT

Next earnings November 06. Consensus unavailable from data feed; key metric is specialty product margin spread over commodity refining and renewable diesel project timeline.

KEY RISK

Thesis invalid on close below $39.50 (recent consolidation support), or if November earnings show specialty product margins compressing or renewable diesel project delays.

ANALYSIS

Prox_52w at 99.8 (essentially new high), +36 RS vs SPY, base_tight at 2.95 (approaching VCP quality), and 15% surge on 2x volume are strong, but rs_line_new_high=false prevents A-grade. Strongest disconfirming evidence: without knowing the specific news catalyst for today's 15% move, risk of one-day pop exhaustion is elevated; RS line not at new high despite price at new high suggests momentum not yet broadly confirmed. Energy and Materials sector leadership provide macro support. Needs to hold and digest this gain over next few sessions to confirm institutional accumulation vs. retail spike. Conviction: Medium

Signal: Close above $45.47 on vol >2.0x of 20d avg
