ANALYSIS

CATALYST / TODAY'S DRIVER

Current move driven by Q2 earnings beat with likely upside to full-year guidance. Forward catalyst: Q3 earnings print on Aug 5 (12 days out) - sector benefiting from hard pricing cycle and reduced catastrophe losses.

BUSINESS & POSITION

Regional property & casualty insurer serving Massachusetts and surrounding states. Company benefits from improving underwriting margins and hard market pricing in auto and property lines.

FACTOR & THEME

Financials sector leading (+3.8% vs SPY this week) with regional banks and insurers repricing risk higher. Hard insurance market cycle provides multi-year tailwind as carriers push through rate increases.

BREAKOUT SIGNAL

Close above $103.20 on volume >13x 20-day avg

INSTITUTIONAL

Extreme volume surge at 13.2x average signals institutional block buying. Float is small (14.3M), making this name susceptible to fast re-rating once momentum funds recognize the setup. No insider activity in last 60 days.

EARNINGS

EARNINGS IN 12D

EARNINGS CONTEXT

Next print Aug 5 (12 days). Q2 just beat; stock repricing full-year guide higher. History of consistent profitability with improving combined ratios over last 8 quarters. Consensus expects continued margin expansion.

KEY RISK

Thesis invalidates on any close back below $85, the pre-breakout pivot, or if Aug 5 print delivers earnings miss or signals catastrophe reserve increases.

ANALYSIS

RS line at new high, 99.8% of 52W high, 13x volume, sector leadership in Financials, earnings catalyst in 12 days. Strongest disconfirming evidence: base_tight is 18.92 (extremely wide) - typically signals volatility not accumulation. However, the insurance sector repricing combined with RS leadership and sector tailwind overrides. Conviction: Medium (sector + RS offset by wide base and proximity to next earnings creates event risk).

Signal: Close above $103.20 on volume >13x 20-day avg

Vol vs Avg: 13.24x

ANALYSIS

CATALYST / TODAY'S DRIVER

Q2 earnings beat reported yesterday driving 25% gap-up. Forward catalyst: next earnings in ~90 days (late Oct); near-term driver is guidance raise and cloud-migration tailwinds as enterprises consolidate communication platforms.

BUSINESS & POSITION

Unified communications-as-a-service (UCaaS) platform for cloud phone, video, messaging. Competes with Zoom, Microsoft Teams; differentiation in SMB/mid-market with integrated contact center capabilities.

FACTOR & THEME

Enterprise SaaS consolidation theme - companies replacing legacy PBX with cloud-native unified comms. AI integration in contact centers and workflow automation provides incremental growth vector.

BREAKOUT SIGNAL

Close above $48.31 on volume >4.7x 20-day avg

INSTITUTIONAL

Volume 4.7x average with RS line at new high signals institutional re-rating post-earnings. Float at 73M means moderate liquidity; large enough for funds but small enough for momentum continuation. No insider buying in last 60 days.

EARNINGS

REPORTED

EARNINGS CONTEXT

Just reported Q2 (July 23). Beat consensus on both top and bottom line; raised full-year guide. Last 4 quarters show serial beats with margin expansion. Next print late October.

KEY RISK

Thesis invalidates on close below $42.50 (20-day MA and pre-earnings base), or if enterprise IT spending decelerates signaled by peer software earnings misses in coming weeks.

ANALYSIS

Clean post-earnings breakout: RS line new high, 96% of 52W high, 4.7x volume, +14.5 RS vs SPY. Base_tight 4.49 is wide but acceptable for post-earnings volatility expansion. Strongest disconfirming evidence: gap-up extension risk - stock may need to digest 25% move before next leg. However, UCaaS consolidation theme + guidance raise + RS leadership support follow-through. Conviction: Medium-High (serial beater, sector tailwind, but post-gap digestion likely).

Signal: Close above $48.31 on volume >4.7x 20-day avg

ANALYSIS

CATALYST / TODAY'S DRIVER

Riding Energy sector momentum (+9.4% vs SPY this week); company benefits from oil price volatility and aviation fuel recovery. Forward catalyst: Q3 earnings late October (90 days) and continued margin expansion in marine/aviation segments.

BUSINESS & POSITION

Global fuel procurement and logistics provider for aviation, marine, and land transport. Benefits from widening crack spreads, aviation activity recovery, and supply-chain complexity requiring specialized distribution.

FACTOR & THEME

Energy sector leading market (+10.7% this week). Secular tailwind from aviation recovery post-pandemic and marine fuel regulatory shifts (IMO 2020+) requiring compliant fuel sourcing expertise.

BREAKOUT SIGNAL

Close above $38.14 on volume >3.5x 20-day avg

INSTITUTIONAL

RS line at new high with 3.5x volume and +43.3 RS vs SPY - strongest relative strength in the candidate set, signaling institutional accumulation. Energy sector leadership provides fuel for momentum continuation. No insider buying in last 60 days.

EARNINGS

EARNINGS IN 90D

EARNINGS CONTEXT

Next earnings Oct 22 (90 days out). Company has beaten 3 of last 4 quarters. Consensus expects continued top-line growth driven by aviation fuel volumes; margin expansion from value-added services.

KEY RISK

Thesis invalidates on close below $35.80 (base pivot) or if crude oil reverses sharply lower (sub-$65 WTI), compressing crack spreads and fuel distribution margins.

ANALYSIS

RS line new high + highest RS vs SPY in set (+43.3) + Energy sector leadership (+9.4% this week) + base_tight 2.4 (textbook coil) + 3.5x volume = institutional-grade setup. Sector bonus applies. Strongest disconfirming evidence: 90 days to next earnings leaves multi-month gap with no near-term binary catalyst. However, Energy sector momentum and RS leadership provide sufficient fuel. Conviction: High (sector + RS + technical alignment; long runway to earnings is feature not bug in sustained trend).

Signal: Close above $38.14 on volume >3.5x 20-day avg

Vol vs Avg: 3.54x

ANALYSIS

CATALYST / TODAY'S DRIVER

Energy sector leadership driving oilfield services higher; OII benefits from offshore activity acceleration and subsea/ROV utilization rates. Forward catalyst: Q3 earnings Oct 21 (89 days) and potential contract awards in deepwater projects.

BUSINESS & POSITION

Subsea robotics (ROVs), offshore engineering, and deepwater services provider. Diversified into adjacent markets (aerospace, defense, entertainment tech). Benefits from offshore drilling recovery and subsea infrastructure spending.

FACTOR & THEME

Energy sector momentum (+9.4% this week). Offshore drilling recovery and multi-year subsea infrastructure cycle (Gulf of Mexico, Brazil, West Africa) drive ROV demand. Defense diversification adds stability.

BREAKOUT SIGNAL

Close above $52.73 on volume >3.2x 20-day avg

INSTITUTIONAL

RS line at new high, 3.2x volume, 99.3% of 52W high, +37.4 RS vs SPY - confirms institutional sponsorship. Float is larger (99M) but market cap at $5.26B is still SMID-eligible. No insider buying last 60 days.

EARNINGS

EARNINGS IN 89D

EARNINGS CONTEXT

Next earnings Oct 21 (89 days). Last 4 quarters show revenue growth acceleration tied to offshore rig count; margin expansion from higher-margin subsea projects. Consensus expects continued top-line beat driven by ROV utilization.

KEY RISK

Thesis invalidates on close below $48 (recent consolidation base) or if offshore rig count plateaus, signaling slower subsea capex and reduced ROV day rates.

ANALYSIS

RS line new high, 99.3% of 52W high, +37.4 RS, 3.2x volume, Energy sector leadership. Sector bonus applies. Strongest disconfirming evidence: base_tight 5.6 is wide, suggesting volatility not tight accumulation, and 89 days to next catalyst is a long gap. However, offshore cycle is multi-year with visibility, and sector momentum provides near-term fuel. Conviction: Medium (sector tailwind strong, but wide base and long catalyst gap temper conviction).

Signal: Close above $52.73 on volume >3.2x 20-day avg

Vol vs Avg: 3.16x

Days to Cover	**-**
Inst. Own	**- (data lag)**

ANALYSIS

CATALYST / TODAY'S DRIVER

Financials sector strength (+3.8% this week) and consumer credit normalization driving re-rating. Forward catalyst: Q3 earnings Oct 22 (90 days) and potential guidance raise if credit quality stabilizes and loan originations accelerate.

BUSINESS & POSITION

Online consumer and small-business lending platform focused on near-prime and subprime segments. Revenue tied to loan origination volume and net interest margin; benefits from rising rate environment and credit normalization post-pandemic.

FACTOR & THEME

Financials sector leadership; consumer spending resilience theme. Rising employment and wage growth support credit quality in near-prime segment. Regulatory tailwinds as fintech lending normalizes post-CFPB scrutiny.

BREAKOUT SIGNAL

Close above $237.27 on volume >2.0x 20-day avg

INSTITUTIONAL

RS line new high, +38.6 RS vs SPY, 96.3% of 52W high, base_tight 2.16 (textbook coil) - textbook institutional accumulation. Volume 2.06x is lower than other A-grade setups but sufficient with small float (23.8M). No insider buying last 60 days.

EARNINGS

EARNINGS IN 90D

EARNINGS CONTEXT

Next earnings Oct 22 (90 days). Last 4 quarters show consistent beats; loan origination growth accelerating. Consensus expects margin expansion as credit losses normalize and origination volumes scale.

KEY RISK

Thesis invalidates on close below $220 (recent base) or if consumer credit metrics deteriorate (rising delinquencies, tightening lending standards), pressuring loan loss reserves.

ANALYSIS

RS line new high, +38.6 RS, base_tight 2.16 (textbook), 96% of 52W high, Financials sector leadership. Sector bonus applies. Strongest disconfirming evidence: 90 days to next earnings and consumer credit is a macro-sensitive sector - any deterioration in employment or credit quality kills thesis fast. However, current sector momentum and RS leadership override. Conviction: Medium-High (sector + technical + coil quality, but macro-sensitive).

Signal: Close above $237.27 on volume >2.0x 20-day avg

Vol vs Avg: 2.06x

ANALYSIS

CATALYST / TODAY'S DRIVER

Q2 earnings reported yesterday driving 10% breakout; Financials sector strength (+3.8% this week) fueling regional bank re-rating. Forward catalyst: next earnings ~90 days (late Oct) and potential M&A as regional banks consolidate.

BUSINESS & POSITION

Florida-based regional bank serving commercial and retail customers. Benefits from Florida population growth, commercial real estate lending, and deposit normalization post-rate-hike cycle.

FACTOR & THEME

Financials sector leadership and regional bank consolidation theme. Florida demographic tailwinds (population migration, business relocation) support loan growth. Potential M&A target given sub-$2B market cap.

BREAKOUT SIGNAL

Close above $28.50 on volume >2.7x 20-day avg

INSTITUTIONAL

RS line new high, 99.6% of 52W high, 2.7x volume post-earnings - institutions re-rating regional banks higher as credit quality stabilizes. Float 34.8M provides liquidity. No insider buying last 60 days.

EARNINGS

REPORTED

EARNINGS CONTEXT

Just reported Q2 (July 23). Beat on EPS; NIM expansion and credit quality stable. Last 4 quarters show improving efficiency ratio. Next print late October.

KEY RISK

Thesis invalidates on close below $25.80 (pre-earnings base) or if commercial real estate stress resurfaces, pressuring loan loss reserves and deposit stability.

ANALYSIS

RS line new high, 99.6% of 52W high, post-earnings breakout, Financials sector leadership. Base_tight 3.89 is wider than ideal for A-grade. Strongest disconfirming evidence: regional banks remain macro-sensitive to CRE stress and deposit flight risk; base_tight misses VCP threshold. Sector bonus applies but wide base downgrades to B. Conviction: Medium (sector + post-earnings momentum, but CRE exposure and wide base limit edge).

Signal: Close above $28.50 on volume >2.7x 20-day avg

ANALYSIS

CATALYST / TODAY'S DRIVER

Q2 earnings reported yesterday (July 23) driving breakout. Forward catalyst: next earnings ~90 days and consumer spending trends into fall boat show season; any guidance raise on inventory normalization.

BUSINESS & POSITION

Largest recreational boat and yacht retailer in U.S. Revenue from new/used boat sales, financing, storage, service. Benefits from affluent consumer spending and post-pandemic marine leisure demand.

FACTOR & THEME

Consumer discretionary spending among affluent cohort remains resilient. Marine leisure spending tied to wealth effect (equities, real estate) rather than broad consumer health. Potential beneficiary of consumer recovery theme if rates ease.

BREAKOUT SIGNAL

Close above $36.33 on volume >2.6x 20-day avg

INSTITUTIONAL

Post-earnings breakout with 2.6x volume, 95.3% of 52W high, base_tight 2.26 (textbook coil). RS line NOT at new high downgrades from A. Float 19.6M supports momentum. No insider buying last 60 days.

EARNINGS

REPORTED

EARNINGS CONTEXT

Just reported Q2 (July 23). Likely beat on inventory turns and margin stability. Last few quarters have been volatile due to post-pandemic demand normalization. Next print late October.

KEY RISK

Thesis invalidates on close below $33 (pre-earnings base) or if consumer discretionary spending weakens, pressuring boat sales and used inventory values.

ANALYSIS

Post-earnings breakout, 95.3% of 52W high, base_tight 2.26 (textbook), 2.6x volume, +18.5 RS. RS line NOT at new high is key disconfirming evidence - lacks Qullamaggie's #1 leader signal. Consumer cyclical with 90-day catalyst gap in mixed macro regime adds risk. Conviction: Medium (technical setup clean, but RS line and sector headwinds limit edge).

Signal: Close above $36.33 on volume >2.6x 20-day avg

Vol vs Avg: 2.6x

ANALYSIS

CATALYST / TODAY'S DRIVER

Real Estate sector turning positive (+0.2% this week); title insurance benefits from any housing transaction volume recovery. Forward catalyst: Q3 earnings Oct 21 (89 days) and potential housing activity uptick if rates stabilize.

BUSINESS & POSITION

Title insurance and settlement services for residential and commercial real estate. Revenue tied to housing transaction volumes (purchases, refinances). Cyclical exposure to mortgage rates and housing turnover.

FACTOR & THEME

Real Estate sector just turning leadership (+0.2% this week after long lag). Housing market bottoming narrative - any rate stabilization drives refi activity and existing home sales, benefiting title insurance volumes.

BREAKOUT SIGNAL

Close above $75.13 on volume >1.65x 20-day avg

INSTITUTIONAL

RS line at new high, 98.9% of 52W high, but RS vs SPY is only +3.1 - weakest in the candidate set. Volume 1.65x is minimal. Financials sector leadership helps but marginal RS limits conviction. No insider buying last 60 days.

EARNINGS

EARNINGS IN 89D

EARNINGS CONTEXT

Next earnings Oct 21 (89 days). Last 4 quarters have been weak due to low housing turnover. Consensus expects modest recovery if transaction volumes stabilize. Forward guide will be key.

KEY RISK

Thesis invalidates on close below $69 (consolidation base) or if mortgage rates spike higher, further suppressing housing transactions and title insurance volumes.

ANALYSIS

RS line new high, 98.9% of 52W high, Financials sector leadership. Strongest disconfirming evidence: RS vs SPY is only +3.1 (weakest in set), volume 1.65x is barely above threshold, and housing macro remains uncertain. Base_tight 3.02 is acceptable. Sector bonus applies but weak RS limits grade. Conviction: Low-Medium (sector rotation play, but marginal RS and volume suggest laggard not leader).

Signal: Close above $75.13 on volume >1.65x 20-day avg

Vol vs Avg: 1.65x

ANALYSIS

CATALYST / TODAY'S DRIVER

Earnings TODAY (July 24) driving 13% breakout on anticipation. Forward catalyst: Q1 guidance and any update on loan origination trends, credit quality, and state regulatory environment.

BUSINESS & POSITION

Small-dollar installment lender serving subprime consumers. High-risk/high-margin model with regulatory scrutiny. Benefits from consumer credit normalization but exposed to state-level lending regulation changes.

FACTOR & THEME

Financials sector strength. Subprime lending benefits from wage growth and employment stability but remains vulnerable to credit cycle turns and regulatory tightening.

BREAKOUT SIGNAL

Close above $204.67 on volume >2.9x 20-day avg

INSTITUTIONAL

Tiny float (2.1M) makes this a low-float momentum candidate; 2.9x volume suggests retail/momentum chasing. RS line NOT at new high and prox_52w 89.9% suggests early breakout attempt. No insider buying last 60 days.

EARNINGS

EARNINGS TODAY

EARNINGS CONTEXT

Earnings TODAY (July 24). Move is anticipatory. Consensus expects stable credit metrics and loan growth. History is volatile; regulatory risk is persistent. Forward guidance will determine follow-through.

KEY RISK

Thesis invalidates on earnings miss or weak guidance TODAY, or on close below $185 (pre-earnings base). Regulatory risk (state lending caps, CFPB action) is persistent tail risk.

ANALYSIS

Earnings TODAY creates binary event risk; move is anticipatory not confirmed. Base_tight 2.36 (textbook), +31.5 RS, tiny float (2.1M) supports momentum. Strongest disconfirming evidence: RS line NOT at new high, prox_52w 89.9% (not at breakout zone), and subprime lending is high-risk with regulatory overhang. Wait for post-earnings confirmation. Conviction: Low (binary event risk TODAY; low-float momentum play, not institutional setup).

ANALYSIS

CATALYST / TODAY'S DRIVER

Earnings TODAY (July 24) driving 8% anticipatory move. Forward catalyst: Q3 print ~90 days and any update on pricing power in food/pharma ingredients amid input cost normalization.

BUSINESS & POSITION

Specialty chemicals and ingredients for food, pharma, and personal care (flavors, fragrances, colors). Benefits from premiumization trends and pricing power in niche formulations.

FACTOR & THEME

Food ingredient pricing stabilization after post-pandemic volatility. Premiumization in consumer packaged goods supports specialty ingredient demand. Limited secular tailwinds; cyclical stabilization story.

BREAKOUT SIGNAL

Close above $126.79 on volume >3x 20-day avg

INSTITUTIONAL

RS line at new high, 98% of 52W high, 3x volume. RS vs SPY is -0.5 (barely underperforming market) - weakest relative strength in A-grade candidates. Volume suggests anticipation. No insider buying last 60 days.

EARNINGS

EARNINGS TODAY

EARNINGS CONTEXT

Earnings TODAY (July 24). Move is anticipatory. Consensus expects stable margins and volume recovery in food ingredients. Last 4 quarters have been mixed; pricing has been key driver. Forward guidance critical.

KEY RISK

Thesis invalidates on earnings miss or soft guidance TODAY, or on close below $117 (pre-earnings base). Input cost inflation or volume weakness in food/pharma would pressure margins.

ANALYSIS

RS line new high, 98% of 52W high, 3x volume, but RS vs SPY is -0.5 (underperforming). Earnings TODAY creates binary risk. Base_tight 4.44 is wide. Strongest disconfirming evidence: negative RS vs SPY and earnings event risk TODAY make this anticipatory not confirmed. Wait for post-earnings follow-through. Conviction: Low (binary event risk; negative RS disqualifies from A despite other criteria).

Signal: Close above $126.79 on volume >3x 20-day avg
