CATALYST INTELLIGENCE
EARNINGS
Aug 05 - Street expects ~\$1.25-1.30 EPS on continued infrastructure demand. TTM EPS \$4.47 with 57.8% earnings growth reflects margin expansion from aggregates pricing power. Recent quarters show beat pattern; guidance has been maintained with constructive commentary on backlog.
BUSINESS & POSITION
Arcosa manufactures infrastructure-related products across three segments: Construction Products (aggregates, specialty materials), Engineered Structures (utility structures, wind towers, storage tanks), and Transportation Products (barges, steel components). The company is a category leader in utility structures and wind towers, benefiting directly from grid modernization and renewable energy buildout.
FACTOR & THEME
Direct exposure to reshoring/onshoring capex, grid infrastructure spending (IRA tailwinds), and wind energy deployment. Industrials sector is lagging (-3.6% 20d), but ACA's defensive infrastructure exposure differentiates it from cyclical industrials.
NEWS FLOW
Infrastructure spending remains elevated with IRA-driven utility and renewable projects. No recent M&A or contract announcements in the last 30 days, but backlog visibility remains strong. Catalyst: Earnings in 7 days (High impact) - a beat with raised guidance could trigger breakout given proximity to pivot.
INSTITUTIONAL
Volume dry-up with price holding at 98.6% of 52W high suggests quiet institutional accumulation into a textbook tight base. Float of 48M shares is digestible for mid-cap funds. No insider activity in last 60 days - baseline expectation for this name.
KEY RISK
Thesis invalid on a close below the \$140 base low (~3% below current), or if Q2 guidance disappoints on wind tower demand softness amid potential renewable policy uncertainty.

Textbook VCP coil: base_tight 1.12 (exceptional), RS line at new high, within 0.7% of pivot, earnings catalyst in 7 days. Infrastructure theme provides fundamental tailwind despite broad Industrials weakness. Bear case: Mixed regime with elevated VIX could cap upside if earnings merely meet expectations. Conviction: Medium-High (structural A-grade quality tempered by transitional macro).

CATALYST INTELLIGENCE
EARNINGS
Jul 30 - Earnings TOMORROW - high-risk/high-reward setup. Street expects continuation of strong operating leverage. TTM EPS \$2.48 vs forward \$4.94 implies significant growth acceleration. Recent quarters show consistent beats on expense discipline and premium growth.
BUSINESS & POSITION
CNO Financial is a leading provider of health insurance, annuities, and life insurance products targeting middle-income Americans approaching retirement. The company operates through Bankers Life, Washington National, and Colonial Penn brands, positioning it as a niche leader in the underserved middle-market demographic.
FACTOR & THEME
Beneficiary of aging demographics and rising demand for retirement planning products. Financials holding up relatively well in mixed regime. Forward P/E of 10.7x with 85.7% earnings growth implies significant multiple expansion potential if execution continues.
NEWS FLOW
No material news in last 30 days. Insurance sector seeing steady inflows as rates normalize. Catalyst: Earnings in 1 day (High impact) - binary event. Short interest near 0% removes squeeze dynamic but also indicates no aggressive bearish positioning.
INSTITUTIONAL
Clean volume contraction (583K -> 556K week-over-week) with RS line at highs indicates patient accumulation. Low beta (0.82) provides defensive characteristics in uncertain regime. No insider activity - neutral signal.
KEY RISK
Thesis invalid on a close below \$50 (~6% stop) or on earnings miss/guidance cut tomorrow. Binary event risk is elevated - position sizing should reflect this.

Strong VCP structure (base_tight 1.75, RS at high, vol dry-up) but earnings TOMORROW creates binary risk that prevents A-grade classification. Valuation is compelling at 10.7x forward with 85% growth. Bear case: Life insurance names can gap hard on reserve adjustments or guidance changes - one-day event risk is maximum. Conviction: Medium (would be High post-earnings if confirms).

ENTRY TRIGGER
Close above \$232.67 on volume >200% of 20-day avg (>260K shares)

Target: \$265 - measured move based on 15% base depth; represents continuation of Stage 2 advance

Stop: \$215 - base low and prior consolidation support

CATALYST INTELLIGENCE	
EARNINGS	
Aug 06 - TTM EPS \$7.88; forward EPS \$0.43 appears to be a data anomaly (likely reflects one-time items or GAAP adjustments) - use trailing P/E of 29x as reference. Revenue growth modest at 2.2% but earnings growth 9.7% reflects operating leverage. Serial beat pattern typical for this defensive name.	
BUSINESS & POSITION	
National HealthCare operates skilled nursing facilities, assisted living centers, and homecare programs primarily in the southeastern US. The company is a regional leader in long-term care with a conservative balance sheet (debt/equity 3.58) and stable occupancy trends benefiting from aging demographics.	
FACTOR & THEME	
Healthcare sector is outperforming (+4.2% 20d) - one of the leading sectors in current regime. Direct play on aging US population with defensive characteristics. Low beta (0.64) provides downside protection in mixed/risk-off environments.	
NEWS FLOW	
Healthcare facilities seeing improved reimbursement rates and stable occupancy post-pandemic normalization. One insider buy of \$175K in last 60 days - not a cluster but notable director-level conviction. Catalyst: Earnings in 8 days (Medium impact) - typically low volatility around prints for this name.	
INSTITUTIONAL	
Strict volume dry-up confirmed (87K -> 110K -> 111K declining to 87K most recent week). Low float (12.7M) creates potential for outsized moves on institutional interest. Single insider buy (\$175K) is a positive datapoint but below cluster threshold for grade upgrade.	
KEY RISK	
Thesis invalid on close below \$215 base low (~6% stop). Key risk is Medicare/Medicaid reimbursement policy changes or labor cost inflation pressuring margins. Low liquidity (avg vol 130K) means exits can be expensive.	

Healthcare sector leadership and strict vol dry-up are positives; RS +28.3% is strong. Base_tight 3.4 is acceptable but not exceptional. Single insider buy is confirmatory but not cluster-level. Bear case: Forward P/E data appears anomalous - need to verify actual earnings power; thin float cuts both ways. Conviction: Medium.

Target: \$38 - measured move based on ~16% base depth from ~\$27.50 low
Stop: \$29 - base low and round-number support

CATALYST INTELLIGENCE
EARNINGS
Aug 06 - Forward P/E 18.7x with 29.4% earnings growth is reasonable for a healthcare services compounder. Revenue growth 13.7% demonstrates organic expansion. As a recent spin-off, beat/miss history is limited, but operational metrics have been strong post-separation.
BUSINESS & POSITION
Concentra is the largest provider of occupational health services in the US, operating urgent care centers focused on employer-sponsored healthcare, workers' compensation, and physical therapy. Recently spun from Select Medical, the company serves major employers seeking to reduce healthcare costs and improve workplace safety.
FACTOR & THEME
Healthcare sector outperformance (+4.2%) benefits this name. Occupational health is a niche with high barriers to entry and recurring revenue from employer contracts. RS +38.7% is among the strongest in the candidate set - clear relative strength leadership.
NEWS FLOW
Limited news flow as a relatively new public entity post-spin. Employer healthcare cost containment remains a secular tailwind. High debt/equity (467%) reflects spin-off capital structure but is manageable given cash flow generation. Catalyst: Earnings in 8 days (High impact) - first few quarters post-spin set the narrative.
INSTITUTIONAL
Strict vol dry-up (745K -> 869K -> 1049K declining to current) with price holding near highs indicates accumulation. Post-spin dynamics often see institutional positioning build over first 12 months. No insider activity in last 60 days - typical for post-spin names with lock-up considerations.
KEY RISK
Thesis invalid on close below \$29 (~8% stop). High leverage is the key bear case - any macro slowdown affecting employment levels could pressure occupational health volumes. Short interest 4.7% is modest.

Exceptional RS (+38.7%) and strict vol dry-up in a leading sector (Healthcare). Base_tight 2.51 is solid. Post-spin name building institutional ownership - early stage of discovery. Bear case: High leverage creates amplified downside if employment trends weaken; limited earnings history post-spin adds uncertainty. Conviction: Medium.

Stop: \$92 - base low and 50-day MA zone

CATALYST INTELLIGENCE

EARNINGS

Aug 05 - Forward P/E 11.9x with forward EPS of \$8.17 (vs TTM \$4.45) implies significant earnings step-up from acquisitions. Earnings growth 38.5% is strong. AUM-sensitive names can have volatile reactions to market commentary and flow data.

BUSINESS & POSITION

Victory Capital is a diversified asset manager with ~\$180B AUM across multiple investment franchises acquired through a roll-up strategy. The company offers equity, fixed income, and alternative strategies through various boutique investment teams, targeting both institutional and retail clients.

FACTOR & THEME

Asset managers benefit from equity market appreciation and fund flows. Revenue growth of 76.7% reflects recent acquisitions expanding AUM base. Financials holding relatively steady in mixed regime. However, Technology weakness (-10.3%) could pressure growth-oriented AUM.

NEWS FLOW

No material announcements in last 30 days. Asset managers broadly benefiting from YTD equity gains, though recent market weakness could pressure near-term flows. Catalyst: Earnings in 7 days (Medium-High impact) - AUM and flow data will be key focus.

INSTITUTIONAL

Strict vol dry-up across three weeks (406K -> 433K -> 475K declining) shows controlled selling pressure. Short interest 5.9% with 5 days-to-cover creates modest squeeze potential on strong results. No insider activity in last 60 days.

KEY RISK

Thesis invalid on close below \$92 (~6% stop). Key risk is AUM outflows if equity markets continue weakening - asset managers are leveraged plays on market direction. Base_tight 5.28 is looser than preferred.

Strong RS (+27.4%) and strict vol dry-up with earnings catalyst in 7 days. However, base_tight 5.28 is loose by VCP standards, and asset manager sensitivity to market direction is a concern in mixed/transitional regime with Tech lagging hard. Bear case: If SPY continues lower, AUM headwinds could overshadow operational execution. Conviction: Medium-Low.

CATALYST INTELLIGENCE
EARNINGS
Aug 06 - Pre-revenue company - earnings call is about cash runway and clinical updates, not EPS. Price/Sales of 4259x reflects growth-stage premium; valuation is entirely pipeline-dependent. Watch for Phase 2/3 readout timelines and enrollment updates.
BUSINESS & POSITION
Dianthus Therapeutics is a clinical-stage biotech developing complement-targeted therapies for autoimmune and inflammatory diseases. Lead asset DNTH103 targets the complement pathway for conditions like generalized myasthenia gravis (gMG) and chronic inflammatory demyelinating polyneuropathy (CIDP).
FACTOR & THEME
Biotech sector participation in Healthcare leadership. Complement inhibition is a validated mechanism (see Alexion/AstraZeneca's Soliris franchise). Pre-revenue biotech with binary clinical catalysts - not correlated to broader market factors.
NEWS FLOW
Clinical-stage biotech with potential Phase 2 data readouts as key catalysts. 19.4% short interest (6.7 days-to-cover) creates squeeze potential on positive clinical news. Catalyst: Earnings in 8 days (High impact for any pipeline update) - Clinical data or timeline guidance drives 20%+ moves.
INSTITUTIONAL
Strict vol dry-up pattern suggests accumulation ahead of potential catalysts. High short interest means any positive surprise could trigger violent short covering. No insider activity in last 60 days - common for clinical-stage biotechs where insiders face trading restrictions around data readouts.
KEY RISK
Thesis invalid on close below \$95 (~9% stop) or on any negative clinical data readout. Binary event risk is the defining characteristic - this is a lottery ticket, not a fundamental investment. Dilution risk also elevated given cash burn.

Strict vol dry-up and RS at new high in a leading sector. High short interest (19.4%) creates asymmetric squeeze potential. However, this is a pre-revenue biotech with binary clinical risk - not a fundamentally-driven VCP setup. Bear case: Any clinical setback or cash raise announcement could result in 30%+ drawdown; 'setup' is really about timing a binary event. Conviction: Low (speculative, binary).

EARNINGS
REPORTED

Recently reported (Jul 08) with no imminent catalyst for 3+ months. Short interest 9.4% is elevated without a clear catalyst to trigger squeeze. Consumer Staples sector leading (+4.9%) is positive, but no catalyst = no edge. Worth watching if base tightens into next quarter. Conviction: Low.

PSMT — 90D Base Setup | Pivot: \$199.84 (gold) | SMA: 9(blue) 21(orange) 50(green) 200(red)

Regional Banking | Theme: Regional Bank Recovery | Vol Dry-Up: YES | RS Line Hi: YES | Above 200MA: YES | Base Tight: 2.58

CATALYST INTELLIGENCE
EARNINGS
Oct 27

Earnings 90 days out - no identifiable catalyst. RS +7.9% is weakest in the candidate set. Regional banks face ongoing NIM pressure uncertainty. Close to pivot but being early without a catalyst is the same as being wrong. Monitor only. Conviction: Low.

RNST — 90D Base Setup | Pivot: \$44.50 (gold) | SMA: 9(blue) 21(orange) 50(green) 200(red)

CATALYST INTELLIGENCE
Jul 29

Earnings TODAY - maximum binary risk precludes any actionable grade. RS +64% is exceptional but vol contraction is weak (6.3%). Pre-profitable with negative margins. Wait for post-earnings reaction before evaluating setup. Conviction: N/A (binary event today).

ADPT — 90D Base Setup | Pivot: \$23.15 (gold) | SMA: 9(blue) 21(orange) 50(green) 200(red)

RS line NOT at new high (disqualifying for A/B). RS +5.0% is weakest relative strength in candidate set. Earnings tomorrow creates binary risk. Base_tight 3.71 is loose. Mortgage insurance sensitive to housing/rates - macro uncertainty is headwind. Monitor only. Conviction: Low.

NMIH — 90D Base Setup | Pivot: \$44.74 (gold) | SMA: 9(blue) 21(orange) 50(green) 200(red)
