CATALYST INTELLIGENCE
EARNINGS
August 6 - Fwd EPS \$5.27 vs TTM -\$1.25 - massive earnings inflection story. Rev growth re-accelerating to +10.4%. PEG 0.51 highlights cheapness relative to growth ramp. August 6 print is next major catalyst.
BUSINESS & POSITION
Synaptics provides connectivity, processor, and touch/display semiconductors for IoT, automotive, PC, and consumer devices. Pivoted strategy toward edge AI and wireless IoT with Broadcom IP acquisition driving margin expansion.
FACTOR & THEME
Pure-play edge AI semiconductor recovery beneficiary - IoT cycle turning post-2-year inventory correction, plus AI-at-the-edge thesis acceleration. RS +53.4 vs SPY is elite - top decile of entire universe.
NEWS FLOW
Recent quarter confirmed IoT recovery and edge AI design wins, with management citing accelerating bookings. [Catalyst: Earnings / High] - August print should validate the earnings inflection. 21.1% short interest with 6.2 days-to-cover provides massive squeeze fuel into the breakout.
INSTITUTIONAL
Vol_ratio 0.55 today with RS at new high and 21% short interest - quiet accumulation into a heavily-shorted name is a classic asymmetric setup. No insider buys in 60d window; insider absence is the one yellow flag.
KEY RISK
Thesis invalidates on close below \$120 (50-day MA) or any IoT/PC channel weakness signal from peer reads (LSCC, QCOM) before August 6 print.

Elite RS +53.4 vs SPY with RS line at new high, 21% short interest providing squeeze fuel, and a clean earnings inflection from -\$1.25 TTM to +\$5.27 fwd in the leading sector (Tech +11.5%).
Disconfirming case: vol_dryup_strict is FALSE (vol_w2 > vol_w3), base_tight 5.83 is wider than ideal, and no near-term catalyst until August 6 - pure tape strength + short squeeze drives the trigger. Conviction: High.

Target: \$246 (measured move from prior base depth + 14% from pivot)
Stop: \$200.00 (base low and round-number support)

CATALYST INTELLIGENCE
EARNINGS
April 29 - Q1 already reported April 29 - revenue growth re-accelerated to +30.8% with fwd EPS \$7.44 implying P/E compression to 28x. Next catalyst window opens with investor conferences and Q2 print (late July).
BUSINESS & POSITION
Materion produces advanced engineered materials including beryllium alloys, precision optics, and specialty thin-film coatings used in semiconductors, defense systems, aerospace, and medical devices. It holds near-monopoly positions in several critical materials categories with deep DoD and hyperscaler supply relationships.
FACTOR & THEME
Direct exposure to defense reshoring, AI/semi capex (advanced packaging materials), and critical minerals onshoring - three accelerating secular themes simultaneously. RS +34.6 vs SPY with RS line at new high confirms institutional rotation into the specialty materials sub-sector.
NEWS FLOW
Post-Q1 strength reflects ramping defense and semi-precision optics demand; management commentary highlighted multi-year DoD contract visibility. [Catalyst: Industry / High] - continued defense budget tailwinds and advanced packaging build-outs at TSMC/Intel feed materials throughput. No imminent binary event but tape action is reflecting accumulation.
INSTITUTIONAL
Volume contraction 8.1% with vol_ratio 0.87 today and RS line at new high - classic quiet accumulation in a thin float (20.5M). No insider buying in last 60 days; absence noted but not disqualifying given post-earnings blackout window.
KEY RISK
Thesis invalidates on a close below the \$200 base low or any softening in semi-cap materials demand signals from peer reads (ENTG, CCMP).
Tight VCP coil within 2.6% of pivot with RS line at new highs and dual exposure to defense + AI materials themes is a high-quality structural setup. Disconfirming case: base_tight 4.34 is wider than ideal A-grade (<2.0) and next earnings catalyst is >2 months away - trigger is purely technical without a near-term fundamental accelerant. Conviction: Medium.

ENTRY TRIGGER
Close above \$79.70 on volume >150% of 20-day avg (2.2M+)
Target: \$92 (15% measured move from pivot + short squeeze acceleration)
Stop: \$72.00 (50-day MA + gap support)

CATALYST INTELLIGENCE
EARNINGS
July 29 - Q1 print drove the breakout setup - revenue +37.3%, earnings +61.3% YoY, fwd P/E 38.5x. Beat pattern: 4-of-last-4 beats with guidance raises. Next print July 29 is the key catalyst.
BUSINESS & POSITION
Vita Coco is the dominant US coconut water brand (~50%+ category share) with expanding international and adjacent category (Vita Coco Spiked, oil, juice) footprint. Asset-light branded beverage model with 37% gross margins and net cash balance sheet.
FACTOR & THEME
Better-for-you / functional hydration secular tailwind, GLP-1 beneficiary (hydration + low-calorie positioning), and category share gains vs Gatorade/Powerade in convenience channel. RS +37.9 vs SPY with RS at new high is best-in-class consumer-defensive momentum.
NEWS FLOW
Recent quarter delivered category share gains, private-label resilience, and international expansion traction. [Catalyst: Earnings / High] - July 29 print is the binary event; sell-side has been incrementally raising estimates. Short interest 12.8% with 3.9 days-to-cover creates squeeze fuel.
INSTITUTIONAL
Volume contraction 48.7% with today's vol at just 50% of average - textbook dry-up, but RS at new high and 52w prox 98.9% indicates institutions accumulated heavily into Q1 and are now sitting tight. No insider buys in last 60 days (post-earnings blackout typical).
KEY RISK
Thesis invalidates on a close below \$72 (50-day MA and gap-fill) or any coconut commodity-input cost shock that compresses Q2 margins at the July 29 print.

Best-in-class growth fundamentals (+37% rev, +61% EPS) with elite RS, tight coil within 1.1% of pivot, and 12.8% short interest provides squeeze asymmetry. Disconfirming case: base_tight 8.76 is wide (not a clean VCP - more an extended cup), price target \$73.67 is BELOW current price suggesting Street is behind, and analyst skepticism could cap upside. Conviction: Medium-High.

Stop: \$29.00 (50-day MA and prior consolidation high)

CATALYST INTELLIGENCE
EARNINGS
August 5 - Q1 reported earlier; fwd EPS \$3.14 vs TTM \$1.73 implying significant operating leverage. Beat 3-of-last-4. Next catalyst is Agamree script-trend updates and any BD activity ahead of August 5 print.
BUSINESS & POSITION
Catalyst commercializes Firdapse (LEMS), Fycompa (epilepsy), and Agamree (DMD) - three rare-disease franchises generating 84% gross margins and 49% operating margins. Profitable, debt-light, and acquisitive in neurology rare-disease assets.
FACTOR & THEME
Rare disease cash-flow compounder theme + biotech sector recovery (XBI bounce). Unique in profitable small-cap biotech category - fwd P/E 10x with 11% earnings growth offers value-meets-growth profile.
NEWS FLOW
Agamree DMD launch traction continues to be the swing factor; recent quarterly script data showed sequential growth. [Catalyst: Corporate / Medium] - pipeline expansion and tuck-in M&A optionality is the bull case. No imminent binary FDA event.
INSTITUTIONAL
Vol contraction 26.4% with RS line at new high indicates quiet accumulation. Short interest 7.9% with 4.3 days-to-cover provides modest squeeze fuel. No insider buys in 60d window.
KEY RISK
Thesis invalidates on close below \$29 (50-day MA) or any negative Firdapse generic/IP development that threatens the core \$300M+ franchise.

Tight VCP setup with RS at new high, fwd P/E 10x on a profitable rare-disease compounder, and re-emerging biotech sentiment. Disconfirming case: pct_to_pivot 4.1% is the wide end of the watch range, RS +20.6 is good but not elite, and no near-term catalyst until August earnings - trigger is purely technical. Conviction: Medium.

CPRX — 90D Base Setup | Pivot: \$32.56 (gold) | SMA: 9(blue) 21(orange) 50(green) 200(red)

Close above \$47.95 on volume >150% of 20-day avg (1M+)
Target: \$54 (13% measured move based on fwd P/E re-rate to 11x)
Stop: \$44.00 (50-day MA and prior breakout support)

CATALYST INTELLIGENCE
EARNINGS
July 27 - Fwd EPS \$4.95 vs TTM \$2.48 (+85% earnings growth) at 9.6x fwd - exceptional value-growth combo. Beat 4-of-last-4 with consistent guidance raises. July 27 print is next catalyst.
BUSINESS & POSITION
CNO Financial serves middle-income Americans with life insurance, health insurance, and annuities through Bankers Life, Washington National, and Colonial Penn brands. Capital-light insurance compounder with consistent buyback and dividend growth.
FACTOR & THEME
Beneficiary of stable-to-higher rates (annuity spread economics) + financial sector rotation. RS +6.1 is modest but RS line at new high signals quiet relative leadership in a value-heavy sub-sector.
NEWS FLOW
Recent quarter showed strong annuity sales growth and book value expansion. [Catalyst: Earnings / Medium] - July print is the key event; capital return story (buybacks at 6%+ pace) provides downside floor. No major M&A or regulatory catalysts pending.
INSTITUTIONAL
Vol contraction 20.7% with vol_ratio 0.57 today and RS line at new high - institutional rotation into rate-resilient insurers visible. No insider buys in 60d window.
KEY RISK
Thesis invalidates on close below \$44 (50-day MA + prior breakout level) or any sharp credit spread widening that pressures the bond portfolio.

Clean technical coil within 1.2% of pivot with strong earnings growth (+85%) at compelling 9.6x fwd P/E and RS line at new high. Disconfirming case: RS +6.1 vs SPY is unimpressive in a Tech-led tape, base_tight 4.85 is wide for A-grade, and insurance is not a hot-money theme - breakout may grind rather than explode. Conviction: Medium.

CNO — 90D Base Setup | Pivot: \$47.95 (gold) | SMA: 9(blue) 21(orange) 50(green) 200(red)

Stop: \$94.00 (50-day MA and base low)

CATALYST INTELLIGENCE
EARNINGS
May 5 - Q1 already reported May 5; revenue growth +99% on partnership milestones. Fwd EPS -\$0.68 (still pre-profit on operating basis). Catalysts are clinical readouts, not earnings.
BUSINESS & POSITION
Protagonist develops peptide therapeutics partnered with Takeda (rusfertide for polycythemia vera, Phase 3) and J&J (icotrokinra for psoriasis, late-stage). Royalty/milestone-driven model with multiple late-stage readouts ahead.
FACTOR & THEME
Late-stage biotech catalyst stack + big pharma partnership leverage. Rusfertide is a potentially category-defining therapy for PV with peak sales estimates \$1B+. RS +8.7 is modest but base is exceptionally tight.
NEWS FLOW
Rusfertide Phase 3 VERIFY data supports BLA filing; icotrokinra Phase 3 readouts at J&J expected over coming quarters. [Catalyst: Corporate / High] - clinical/regulatory news flow is the binary driver. 13.6% short interest with 10.7 days-to-cover is extreme squeeze setup.
INSTITUTIONAL
Exceptionally tight base_tight 1.68 with vol contraction 32.8% - best structural quality in the list. RS line NOT at new high is the one technical knock. No insider buys in 60d.
KEY RISK
Thesis invalidates on close below \$94 (50-day MA + base low) or any negative rusfertide regulatory/safety update from Takeda.
Best-in-class base tightness (1.68) with strong vol dry-up, partnered late-stage biotech catalyst stack, and 10.7 days-to-cover short squeeze fuel. Disconfirming case: RS line NOT at new high (key A-grade requirement missing), pct_to_pivot 3.9% on the wide side, and biotech remains a beta-sensitive sub-sector - failed breakouts in biotech are common without binary catalyst proximate. Conviction: Medium.

CATALYST INTELLIGENCE
EARNINGS
May 7 - Q3 reported May 7 - fwd EPS \$2.53 vs TTM \$1.03 implies major earnings inflection. Fwd P/E 27.4x. Next print August 6.
BUSINESS & POSITION
MSG Entertainment operates Madison Square Garden, Radio City Music Hall, Beacon Theatre, and the Christmas Spectacular franchise. Trophy-asset live entertainment company with high operating leverage on incremental events.
FACTOR & THEME
Live experience premiumization theme + NYC tourism recovery. Modest RS +3.3 vs SPY but RS line at new high indicates relative leadership within entertainment sub-sector.
NEWS FLOW
Recent quarter showed event monetization strength and pricing power on premium seating. [Catalyst: Earnings / Medium] - Christmas Spectacular guidance and Sphere-related strategic clarity remain ongoing storylines. No imminent binary event.
INSTITUTIONAL
Vol contraction 13.9% with vol_ratio 0.61 and RS line at new high - modest but real institutional accumulation. Float 35.5M is thin which adds breakout torque. No insider buys in 60d.

KEY RISK
Thesis invalidates on close below \$65 (50-day MA) or any NYC live-event demand softening signal in summer concert bookings.
Tight base 2.36, RS line at new high, thin float 35.5M, and earnings inflection profile. Disconfirming case: vol_dryup_strict is FALSE (vol_w2 spiked), debt/equity 2473 reflects post-spin capital structure that limits valuation re-rate, and modest RS +3.3 caps explosive upside potential. Conviction: Medium.

CATALYST INTELLIGENCE
EARNINGS
July 21

Tight base with vol dry-up but RS line not at new high and price target \$57.40 implies Street sees minimal upside - needs a catalyst before promotion. Conviction: Low.

CATALYST INTELLIGENCE

EARNINGS

August 4

Tight coil within 0.6% of pivot but RS -2.7 vs SPY and RS line not at new high disqualifies A/B - SYNA is the better IoT semi expression with elite RS. Conviction: Low.
