Target: \$215.00 (measured move from 18-day base depth of ~\$13 added to pivot)
Stop: \$175.00 (base low invalidation, -6.5%)

CATALYST INTELLIGENCE
EARNINGS
November 03 - Street consensus ~\$2.10 EPS on ~\$160M revenue. Serial beater with 8+ consecutive quarters of beats. Guidance historically conservative; 83% gross margin and 34% op margin provide cushion. No known investor day near-term.
BUSINESS & POSITION
Qualys provides cloud-based IT security and compliance solutions, offering vulnerability management, web application scanning, and endpoint detection through its integrated platform. Category leader in vulnerability management with 10,000+ enterprise customers, benefiting from mandatory compliance frameworks and rising attack surfaces.
FACTOR & THEME
Pure-play cybersecurity benefiting from regulatory-driven security spend (SEC cyber disclosure rules, CISA mandates). Theme sentiment accelerating post-breach headlines; peer CrowdStrike's premium multiple validates demand durability.
NEWS FLOW
No major contract announcements in last 60 days but benefiting from sector tailwinds as FedRAMP adoption accelerates. Short interest elevated at 13.8% (5.1 days to cover) creates squeeze potential on upside surprise. Catalyst: Earnings in 34 days (Industry/High impact).
INSTITUTIONAL
Volume dry-up with price holding near highs suggests quiet institutional accumulation. Zero insider activity in last 60 days - baseline expectation. Institutional ownership data unavailable from this feed. Low beta (0.62) defensive posture attractive in mixed regime.
KEY RISK
Thesis invalid on close below \$175.00 (base low area, ~6.5% downside) or if Q3 billings growth decelerates below 10% YoY - customer consolidation to platform vendors like Palo Alto or Microsoft is the primary competitive threat.
Strong VCP structure with strict vol dry-up confirmed, tight to pivot at 1.6%, but RS line not at new high and base_tight at 3.89 is above A-grade threshold. Cybersecurity theme in secular growth phase provides fundamental tailwind. Bear case: 13.8% short interest implies crowded skeptics who may be right if macro deteriorates or billings decelerate. Mixed regime dampens conviction despite quality setup. Conviction: Medium.

Target: \$130.00 (measured move based on prior consolidation range expansion)
Stop: \$100.00 (base low and psychological support, -9.2%)

CATALYST INTELLIGENCE
EARNINGS
November 05 - Forward EPS compressed to \$6.42 from TTM \$15.92 reflects rate normalization expectations - a beat on rates would be catalyst. 140% revenue growth and 373% earnings growth TTM reflect cycle peak. Beat history strong through upcycle.
BUSINESS & POSITION
International Seaways operates a diversified fleet of crude and product tankers, benefiting from global trade disruptions, sanctioned Russian oil rerouting, and aging global fleet dynamics. One of the largest U.S.-listed tanker operators post-Diamond S merger with modern eco-vessels.
FACTOR & THEME
Direct beneficiary of geopolitical energy rerouting (Russia sanctions, Red Sea disruptions extending ton-miles). Tanker rates remain elevated; peer action (FRO, STNG, TNK) confirms cycle strength. Negative beta (-0.1) provides portfolio diversification.
NEWS FLOW
No major announcements but tanker rates have firmed through Q3 on Red Sea diversions. 7.9% short interest (4.4 days) creates moderate squeeze setup. Potential Russell rebalance flows as market cap approaches \$6B threshold. Catalyst: Q3 rate realization vs. expectations (Earnings/High impact).
INSTITUTIONAL
RS line at new 52W high is the standout signal - institutions are accumulating this name despite broader energy sector weakness (-8% Materials). Zero insider activity in 60 days. Institutional ownership data unavailable. Float relatively tight at 41.5M shares.

KEY RISK
Thesis invalid on close below \$100.00 (psychological + base low, ~9% risk) or if VLCC spot rates collapse below \$30K/day - tanker cycle turns can be violent and rates are the sole driver.
RS line at 52W high is powerful confirmation of relative strength leadership; tanker cycle fundamentals remain supportive. Vol dry-up not strict (W2 > W3) and 4.2% to pivot needs more coiling. Bear case: Forward EPS down 60% YoY implies Street expects cycle to roll - if rates disappoint, downside is severe given cyclicity. Mixed regime with small-cap weakness (-5.5% IWM) a headwind. Conviction: Medium.

Target: \$130.00 (measured move from base depth + pivot)

Stop: \$105.00 (base low invalidation, -6.4%)

CATALYST INTELLIGENCE	
EARNINGS	
October 28 - Street expects ~\$0.75 EPS on ~\$1.0B revenue. Forward PE of 36.7x prices in 55% earnings growth; any miss rerates aggressively. Beat history solid but valuation leaves no margin for error.	
BUSINESS & POSITION	
Chefs' Warehouse distributes specialty food products to high-end restaurants, hotels, and culinary schools across North America. Niche leader in premium foodservice distribution with sticky customer relationships and acquisition-driven growth strategy.	
FACTOR & THEME	
Leveraged to fine dining recovery and experiential consumer spending. Less exposed to GLP-1 headwinds vs. mass-market food given premium positioning. M&A roll-up story provides inorganic growth runway.	
NEWS FLOW	
No major catalysts in last 60 days. High short interest at 15% (7.1 days to cover) creates squeeze potential but also reflects skepticism on valuation. High beta (1.38) will amplify any market weakness. Catalyst: Q3 earnings in 28 days (Earnings/High impact).	
INSTITUTIONAL	
Strict volume dry-up with tight base (2.13) suggests controlled accumulation. Zero insider activity in 60 days. Consumer Defensive sector but high beta profile trades like cyclical. Institutional ownership data unavailable.	
KEY RISK	
Thesis invalid on close below \$105.00 (20-day base low, -6.4%) or if restaurant traffic data weakens - high debt/equity of 146% amplifies downside if hospitality cycle turns.	
Textbook strict vol dry-up with tight base (2.13) and earnings catalyst approaching in 28 days. However, RS line not at new high, valuation stretched at 53x trailing PE, and high leverage (146% D/E) create fundamental fragility. Bear case: Consumer discretionary spending fatigue + high short interest suggests informed skeptics - a miss destroys the setup. Conviction: Medium.

Target: \$78.00 (measured move from base to prior resistance zone)
Stop: \$62.00 (base low invalidation, -5.7%)

CATALYST INTELLIGENCE
EARNINGS
October 28 - Forward PE of 598x reflects lumpy earnings recognition from land sales - use P/S of 6.8x or NAV approach. TTM EPS \$2.13 likely to be volatile QoQ. 23% revenue growth and 39% earnings growth show execution.
BUSINESS & POSITION
St. Joe Company is a real estate development and asset management company with ~175,000 acres in Northwest Florida, benefiting from population migration to Florida and master-planned community demand. Unique land bank position creates long-duration development optionality.
FACTOR & THEME
Leveraged to continued Florida migration trends and housing recovery. Counter-cyclical land bank model means earnings lumpy but asset value compounds. Less rate-sensitive than homebuilders due to land focus.
NEWS FLOW
No major announcements but Florida real estate resilience continues. Low short interest (4.9%) and no analyst coverage (target_price = 0) makes this under-followed. Earnings in 28 days could re-rate if community sales accelerate. Catalyst: Q3 land sale timing (Earnings/Med impact).
INSTITUTIONAL
Tightest base in the candidate set at 1.6 - textbook consolidation. Zero insider activity in 60 days but low float (54.8M) amplifies moves. Institutional ownership data unavailable. Under-followed name with limited sell-side coverage.

KEY RISK
Thesis invalid on close below \$62.00 (base low, -5.7%) or if Florida migration reverses on insurance/climate concerns - single-geography concentration is existential risk.
Best base tightness (1.6) in candidate set with legitimate Florida migration secular theme. Vol dry-up partial but price action constructive. Bear case: Forward PE of 598x is misleading but highlights earnings unpredictability from lumpy land sales - a weak Q3 sale timing resets expectations. RS +4.9% positive but not exceptional. Under-followed creates discovery potential but also liquidity risk. Conviction: Medium.

CATALYST INTELLIGENCE	
EARNINGS	
November 05 - Street expects ~\$1.40 EPS on ~\$350M revenue. Forward PE of 18.2x reasonable for medtech; 2.9% earnings growth modest but stable. Trailing PE of 50.9x reflects prior year depression.	
BUSINESS & POSITION	
Haemonetics provides blood management solutions including blood collection, processing, and hospital transfusion systems. Niche leader in a specialized medical device category with recurring revenue from consumables and software.	
FACTOR & THEME	
Beneficiary of hospital capital spending recovery post-COVID deferrals. Healthcare sector relatively resilient (-2.6%) in current mixed regime. Low beta (0.54) defensive characteristic.	
NEWS FLOW	
No major FDA milestones or contract announcements in last 60 days. 8.8% short interest (4.7 days) moderate. Plasma collection volumes recovering industry-wide provides tailwind. Catalyst: Q2 FY27 earnings in 36 days (Earnings/Med impact).	
INSTITUTIONAL	
Strong RS at +37.6% vs SPY indicates institutional preference for defensive medtech. Vol dry-up confirmed but base still 4.9% from pivot - needs more coiling. Zero insider activity in 60 days. Institutional ownership data unavailable.	

KEY RISK
Thesis invalid on close below \$98.00 (base low zone, -7%) or if plasma collection volumes disappoint - customer concentration with blood centers creates lumpy ordering patterns.

Strong relative strength (+37.6%) in defensive healthcare with solid vol dry-up pattern. Base needs 1-2 more weeks to tighten from 4.9% to pivot - setup building but not yet prime. Bear case: 2.9% earnings growth is pedestrian for 18x forward PE; needs beat-and-raise to drive re-rating. Healthcare sector outperforming in mixed regime adds conviction. Conviction: Medium.

October 28

Strict vol dry-up but RS negative at -1.0% vs SPY - underperforming in Materials sector which is lagging at -8.0%. Price 11.5% below 52W high (\$304.58) suggests distribution not accumulation. Reshoring theme interesting but execution not reflected in relative strength. Conviction: Low.

CATALYST INTELLIGENCE
October 30

Strong vol contraction (32.9%) and RS (+32.2%) but 6.7% to pivot is too far for actionable setup - needs 2+ weeks of consolidation. Financials sector lagging at -7.4% creates headwind. High debt/equity (258%) and 17.3% short interest reflect balance sheet skepticism. Monitor for tightening. Conviction: Low.

EARNINGS

October 29

Extremely loose base (7.34) despite only 7 days in consolidation - this is chop, not a VCP. High short interest (22%, 9 days to cover) creates squeeze potential but fundamentals weak (TTM EPS -\$0.83). Semi equipment cycle turning but COHU is a lagging indicator. RS positive but not exceptional. Conviction: Low.
