ANALYSIS
CATALYST / TODAY'S DRIVER
No positive catalyst is driving today's move - UCTT is down 5.17% on volume that is only 0.22x average, suggesting a low-conviction, likely technically-driven sell-off or quiet profit-taking rather than a news-driven dislocation. Today is a red day, which disqualifies this from the breakout pre-filter criteria.
BUSINESS & POSITION
Ultra Clean Holdings is a Tier 1 supplier of critical subsystems, components, and parts for semiconductor capital equipment OEMs - primarily LRCX, AMAT, and KLA - providing gas delivery systems, chemical mechanical planarization (CMP) slurries delivery, and precision-machined components. It occupies a structurally embedded position in the semiconductor equipment supply chain, with high switching costs given the qualification cycles required by OEM customers, making it a leveraged play on wafer fab equipment (WFE) spending without the R&D intensity of the OEMs themselves.
FACTOR & THEME
UCTT is a direct derivative of the semiconductor capex supercycle driven by AI infrastructure buildout (HBM, advanced logic, leading-edge DRAM) and the reshoring of semiconductor manufacturing via CHIPS Act incentives - both TSMC Arizona and Intel Fab 52 expansions represent multi-year WFE demand tailwinds for UCTT's customer base. The theme is intact but decelerating from peak 2024 cycle expectations; WFE spending guidance from tier-1 OEMs has been mixed in early 2026, introducing some near-term cyclical uncertainty that caps multiple expansion.
BREAKOUT SIGNAL
Stock is NOT triggering a buy signal today - it is down 5.17% on 0.22x average volume. A valid re-entry signal would require a reclaim and close above the \$88.50 pivot (current 52W high) on volume exceeding 1.5x the 20-day average (~2.06M shares). Watch for a tight consolidation above \$80 support before that attempt.
INSTITUTIONAL
Institutional ownership is reported at 101.4% (consistent with heavy ETF + active fund overlap on a 43.9M float), with 424 institutional holders - this is a well-owned, liquid SMID name with genuine institutional sponsorship. No insider buying in the last 90 days and zero buys over the trailing 12 months; insiders have instead executed 14 sales totaling approximately \$6.25M over the past year, which is a notable negative signal - net insider sentiment is clearly distributive, not accumulative. There is no insider cluster upgrade applicable. AD rating and flow trend data not provided in this feed; recommend cross-referencing O'Neill MarketSmith for accumulation/distribution confirmation before adding exposure.
EARNINGS CONTEXT
Earnings date is not available from the yfinance feed for this ticker - do not rely on any externally generated estimate. No earnings context can be reliably stated. UCTT has historically been a moderate beat-and-raise name during strong WFE up-cycles, but with revenue growth at only 2.9% TTM, the current fundamental momentum is subdued relative to prior cycle peaks. Recommend monitoring consensus EPS and revenue estimates via Bloomberg or FactSet directly.
KEY RISK
The primary risk is a WFE spending deceleration if AI capex growth moderates - UCTT's revenue is highly concentrated among 2-3 OEM customers (LRCX alone has historically been 40%+ of revenue), meaning any push-out in customer tool shipments flows through immediately to UCTT's top line; combined with net insider selling of \$6.25M over 12 months and zero insider buying, the smart-money signal at the company level is cautionary.
ANALYSIS
UCTT fails the most basic pre-filter criteria today - it is down 5.17% (red on the day), which is an immediate disqualifier for any breakout grade regardless of its otherwise strong 12-week RS of +40.6 vs. SPY and solid proximity to the 52W high at 92.1. The RS line is not at a new high, the base is wider than ideal at 2.6 (above the 2.0 VCP threshold), volume is anemic at 0.22x average suggesting no institutional interest in today's action, insider sentiment over the trailing 12 months is net negative with 14 sales and zero buys, and the mixed macro regime with IWM significantly underperforming SPY (-3.8%) adds further headwind for SMID names. This is a watchlist hold - the underlying RS strength and institutional sponsorship (424 holders, 101.4% inst. ownership) keep it on radar, but the setup requires a constructive re-base above \$80 support, a tightening of the base (ideally sub-2.0 ATR range), and a RS line push to new highs before it earns breakout treatment.

Ownership Interpretation

Smart Money:	Top holders skew 6 passive / 4 active. No high-conviction smart-money names identified.
Concentration:	Top 10 hold 48% - heavy concentration. Outsized impact from any single fund's exit.
13D/13G:	No 5%+ stake filings in last 12 months. Either nobody's gone over the threshold or the company is too large for 5% to be common (>\$10B caps rarely see 13D/G activity).
Insider Tape:	14 insider sales in 12 months, no open-market purchases - neutral to bearish (but typical for unprofitable growth companies).

Volume / Tape Synthesis

- A/D Verdict:

C-rated tape (neutral). Buying and selling pressure roughly balanced - wait for a regime change before sizing up.
- Trajectory:

Recent month is distribution - sellers in control. Wait for monthly flow to flip green.
- Vol Footprint:

Last 90d: 3 accumulation, 2 distribution day(s) at >2x average volume. Net bullish - accumulation outpacing distribution.

TAPE-BASED ACTION: WAIT FOR CONFIRMATION
