ANALYSIS

CATALYST / TODAY'S DRIVER

Massive earnings beat drove 28% gap to fresh 52w high; stock reporting TODAY after hours. Forward catalyst: next quarterly print (Nov 2026) with guidance for continued infrastructure spend tailwinds and potential margin expansion commentary.

BUSINESS & POSITION

Leading manufacturer of electrical conduit and raceways serving construction, data centers, and infrastructure end-markets. Positioned to capture accelerating U.S. reshoring and electrical infrastructure buildout (data centers, grid modernization, EV charging).

FACTOR & THEME

Infrastructure spend (BIL/IRA tailwinds), reshoring of manufacturing capacity, data center electrical backbone demand. Secular tailwinds remain intact but cyclical exposure to construction activity creates volatility.

BREAKOUT SIGNAL

Close above \$93.55 on vol >2500% of 20d avg

INSTITUTIONAL

Explosive 25x volume spike signals major institutional repositioning post-earnings. Small 30.7M float amplifies moves. Institutional ownership data unavailable from yfinance; recommend cross-referencing 13F filings. No insider buying in last 60 days.

EARNINGS

EARNINGS TODAY

EARNINGS CONTEXT

Earnings reported TODAY (after hours); consensus and beat history not yet available in feed. Company is serial infrastructure play with cyclical margin sensitivity-check guidance commentary for FY outlook.

KEY RISK

Thesis invalid on a close back below the \$73.00 pre-earnings base, or if guidance disappoints on construction end-market softness at today's print.

ANALYSIS

Strongest disconfirming evidence: base\_tight of 8.42 reflects a parabolic, uncontrolled move-this is gap-and-run euphoria, not a disciplined VCP. RS line NOT at new high despite 52w high breakout, and earnings TODAY introduces immediate binary risk. Massive volume confirms institutional involvement but the setup is extended and lacks the coiled structure of textbook A-grade breakouts. In a Risk-On/Large-Cap regime, SMID gap-ups face tough follow-through. This is a post-earnings momentum trade, not a pre-positioned asymmetric setup. Conviction: Low.

Signal: Close above \$93.55 on vol >2500% of 20d avg

Vol vs Avg: 25.02x

ANALYSIS

CATALYST / TODAY'S DRIVER

Reporting earnings TODAY; 22x volume surge into 52w high suggests major beat/guidance raise. Forward catalyst: next quarterly print (Nov 2026) and potential for raised FY guidance if cardiac device OEM demand remains strong.

BUSINESS & POSITION

Outsourced medical device manufacturing (cardiac, neuro, vascular) serving leading OEMs. Mission-critical supplier with sticky customer relationships and exposure to aging demographics driving implantable device volumes.

FACTOR & THEME

MedTech growth, aging demographics, outsourcing trend among device OEMs. Secular demand intact; recent strength suggests accelerating cardiac rhythm management orders or new platform wins.

BREAKOUT SIGNAL

Close above \$124.45 on vol >2200% of 20d avg

INSTITUTIONAL

Extreme 22x volume spike is textbook institutional pre-announcement positioning-smart money front-running a beat. Small 33.5M float creates explosive move potential. No insider buying last 60 days. Institutional ownership data unavailable; likely 70%+ given MedTech sector norms.

EARNINGS

EARNINGS TODAY

EARNINGS CONTEXT

Earnings TODAY after hours; consensus unavailable in feed. Historical pattern: medical device contract manufacturers re-rate on raised multi-year visibility and margin expansion commentary.

KEY RISK

Thesis invalid on a close back below \$115.00 post-earnings, or if guidance is inline/soft due to OEM order timing lumpiness.

ANALYSIS

Strongest disconfirming evidence: base\_tight of 7.6 is extremely wide-this is a vertical rally, not a controlled coil. RS line NOT at new high despite being at 52w high, which is a yellow flag (lagging vs. best performers). Earnings TODAY = immediate binary event risk. The 22x volume and strong RS suggest a high-probability beat setup, but the parabolic ascent and lack of technical discipline make this a post-result trade, not a pre-positioned A-grade. Conviction: Medium.

Signal: Close above \$124.45 on vol >2200% of 20d avg

Vol vs Avg: 22.1x

| Setup Metrics |             |

| Inst. Own     | -(data lag) |

ANALYSIS

CATALYST / TODAY'S DRIVER

10% surge on 2.16x volume ahead of TODAY's earnings; likely pricing in beat or major partnership/platform announcement. Forward catalyst: next quarterly print (Nov 2026) and ongoing pharma partnerships for DNA synthesis in antibody discovery and gene therapy.

BUSINESS & POSITION

Leader in synthetic DNA manufacturing using proprietary silicon-based platform; serves pharma, biotech, academic research, and emerging data storage markets. High-margin, recurring revenue model tied to drug discovery and gene editing workflows.

FACTOR & THEME

Synthetic biology, AI-driven drug discovery (DNA-encoded libraries), data storage in DNA (Microsoft partnership). Theme momentum accelerating with renewed biotech funding and AI pharma deals.

BREAKOUT SIGNAL

Close above \$101.06 on vol >216% of 20d avg

INSTITUTIONAL

2.16x volume + 10% move + RS of +74.1 vs SPY signals major institutional accumulation. No insider buying last 60 days. Pre-revenue/early commercialization stage; institutional ownership likely moderate (~40-60%) with growth funds positioned. Larger float (55M) provides better liquidity for institutions.

EARNINGS

EARNINGS TODAY

EARNINGS CONTEXT

Earnings TODAY after hours; consensus unavailable. Twist historically volatile on prints-focus on revenue growth acceleration, gross margin trajectory, and pharma partnership pipeline commentary.

KEY RISK

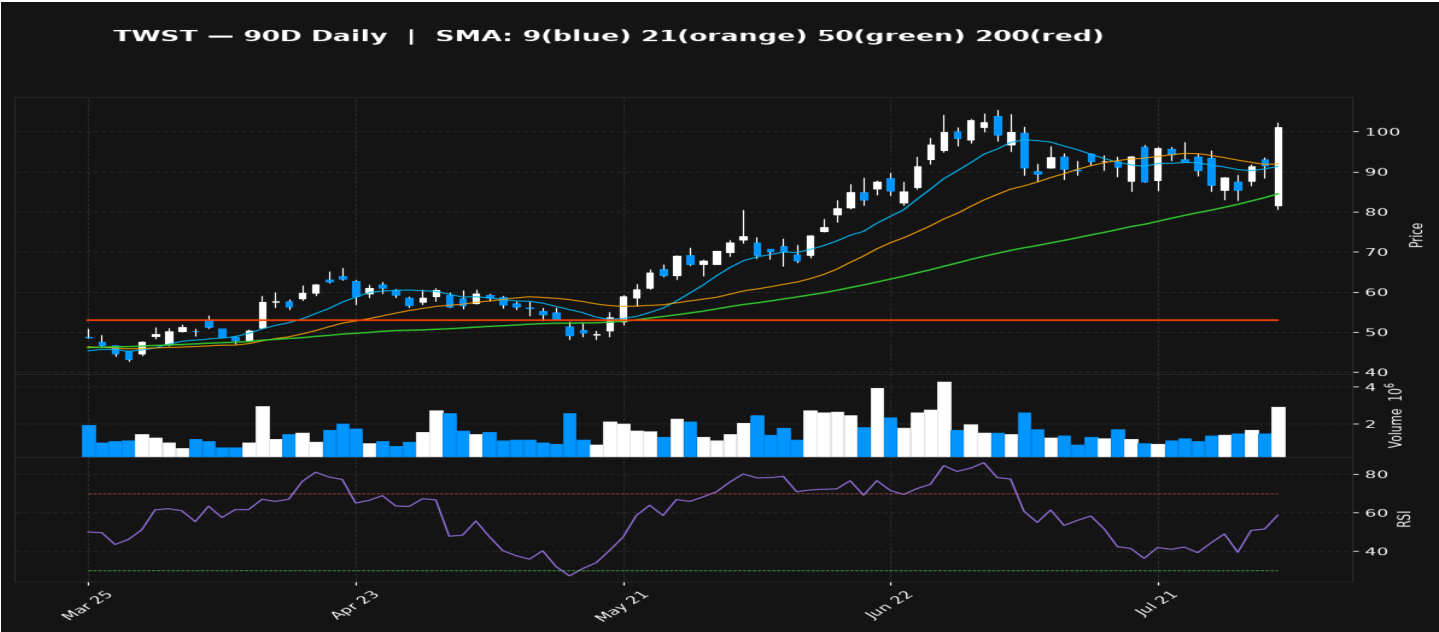

Thesis invalid on a close back below \$90.00 post-earnings, or if revenue guidance disappoints due to biotech customer budget delays.

ANALYSIS

Strongest disconfirming evidence: RS line NOT at new high despite outstanding +74.1 RS and proximity to 52w high-suggests prior peak was stronger. base\_tight of 2.18 is borderline acceptable but not textbook. Earnings TODAY introduces immediate binary risk in a volatile, unprofitable biotech name. The setup has strong thematic tailwinds (synthetic bio + AI drug discovery) and excellent relative strength, but the timing (reporting today) and lack of RS line confirmation downgrade from A. Conviction: Medium.

Signal: Close above \$101.06 on vol >216% of 20d avg

| Inst. Own     | -(data lag) |

ANALYSIS

CATALYST / TODAY'S DRIVER

4.8% move to within 0.2% of 52w high ahead of Aug 5 earnings. Forward catalyst: earnings in 2 days (Aug 5) likely to show AUM growth and fee margin expansion; sector benefits from risk-on equity inflows. Sector tailwind: Financials +1.0% vs SPY this week.

BUSINESS & POSITION

Diversified asset manager with \$180B+ AUM across equity, fixed income, alternatives, and solutions platforms. Growth via acquisitions and organic net inflows; levered to risk-on equity market rallies driving performance fees.

FACTOR & THEME

Financials sector strength (+2.4% leading sector this week), asset management fee leverage to rising equity markets, private credit/alternatives growth. Theme momentum solid; risk-on regime benefits AUM and performance fees.

BREAKOUT SIGNAL

Close above \$103.77 on vol >151% of 20d avg

INSTITUTIONAL

Moderate 1.51x volume into earnings suggests measured institutional positioning, not euphoric retail chase. Small 48.5M float creates upside leverage on a beat. No insider buying last 60 days. Institutional ownership unavailable; asset managers typically 80%+ institutionally held.

EARNINGS

EARNINGS IN 2D

EARNINGS CONTEXT

Earnings August 05. Focus on AUM net inflows, performance fee capture, and M&A pipeline commentary. Asset managers re-rate on sustained organic growth and margin expansion.

KEY RISK

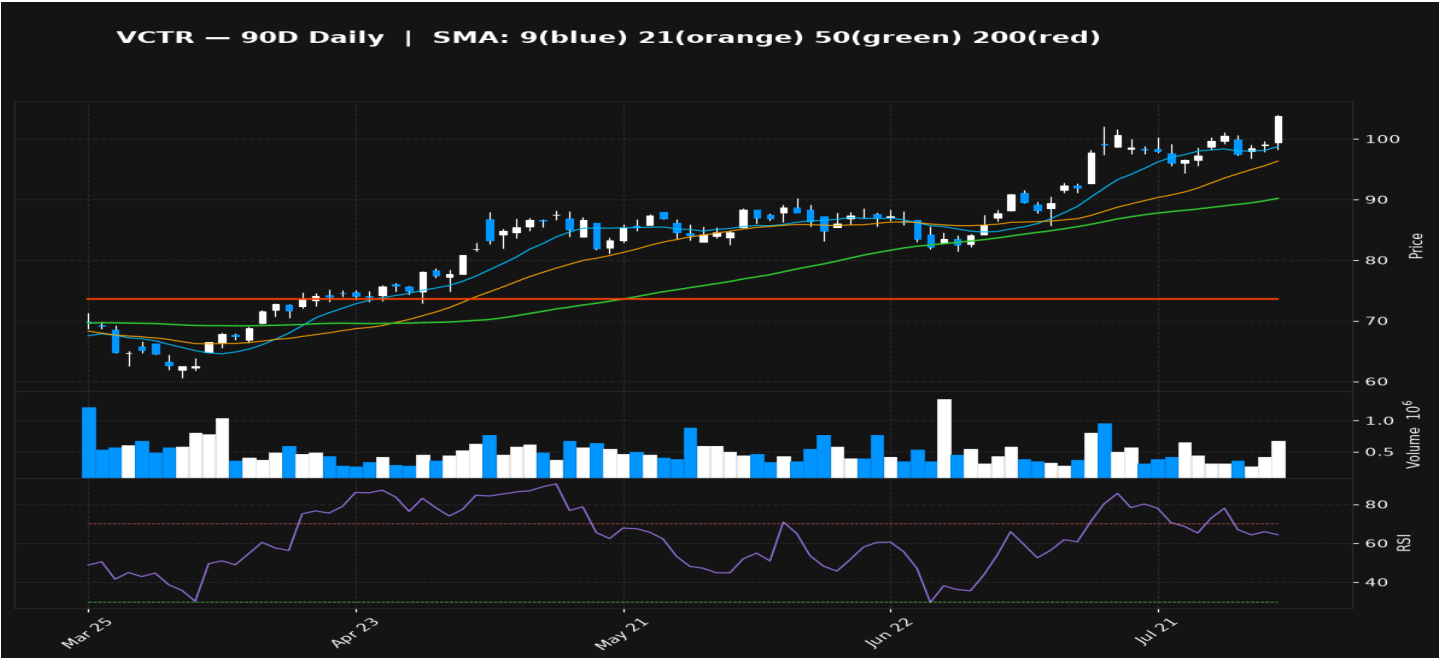

Thesis invalid on a close back below \$98.00 post-earnings, or if AUM net outflows or fee compression is reported on Aug 5.

ANALYSIS

Strongest disconfirming evidence: RS line NOT at new high despite being 99.8% to 52w high-prior leadership peak was stronger. base\_tight of 2.67 is decent but not elite. Earnings in 2 days = high binary risk. The setup benefits from sector tailwind (Financials leading) and tight proximity to breakout, but lacks the volume surge and RS confirmation of an A-grade. In a mega-cap-led regime, financials face crosswinds. Conviction: Medium.

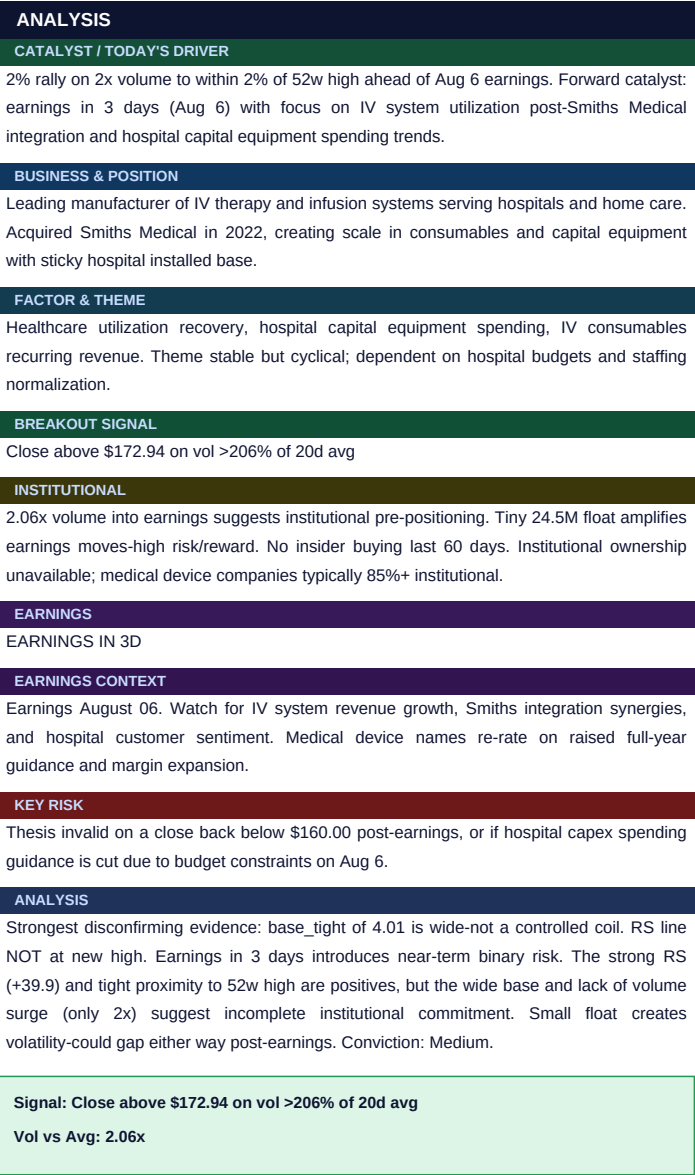

Signal: Close above \$103.77 on vol >151% of 20d avg

| Thesis invalid on a close back below \$42.00 post-earnings, or if fundraising guidance disappoints due to LP allocation slowdown on Aug 6. Negative RS of -17.9 vs SPY is a yellow flag.                                                                                                                                                                                                                                                                                                           |
| ANALYSIS                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| Strongest disconfirming evidence: RS is deeply negative at -17.9 vs SPY-this is a laggard attempting recovery, not a leader. prox_52w of 59.9 means stock is 40% below highs. However, \$5M insider buying (cluster grade 7) is a RARE and powerful signal-insiders see value the market doesn't. Earnings in 3 days provides immediate catalyst. Upgraded from C to B due to insider cluster + risk-on macro. This is a contrarian turnaround setup, not a momentum breakout. Conviction: Medium. |

ANALYSIS

CATALYST / TODAY'S DRIVER

4% surge on 1.95x volume to 93.7% of 52w high; likely sector rotation into industrials or contract win. Forward catalyst: earnings Oct 22 (80 days out) with focus on modular classroom and commercial rental utilization trends; infrastructure/school construction spending could drive re-rating.

BUSINESS & POSITION

Provider of modular buildings, classrooms, and portable storage container rentals serving education, construction, and commercial end-markets. Recurring revenue model with long-duration classroom contracts; cyclical exposure to construction activity.

FACTOR & THEME

Infrastructure spending (school construction), commercial real estate recovery, disaster relief/temporary housing demand. Theme mixed-education budgets stable but commercial construction softening.

BREAKOUT SIGNAL

Close above \$119.66 on vol >195% of 20d avg

INSTITUTIONAL

1.95x volume is solid; tiny 24.1M float amplifies moves. base\_tight of 1.68 is textbook VCP territory-very tight coil. No insider buying last 60 days. Institutional ownership unavailable; rental/leasing companies typically 70-85% institutional.

EARNINGS

EARNINGS IN 80D

EARNINGS CONTEXT

Earnings October 22. Watch for classroom rental utilization, commercial rental demand, and margin trends. Rental companies re-rate on sustained utilization improvement and pricing power.

KEY RISK

Thesis invalid on a close back below \$110.00, or if Oct 22 earnings show commercial rental utilization declining due to construction slowdown.

ANALYSIS

Strongest disconfirming evidence: RS of only +2.0 vs SPY is barely positive-this is NOT a relative strength leader. RS line NOT at new high. However, base\_tight of 1.68 is textbook VCP quality (near-perfect coil), and prox\_52w of 93.7% signals breakout proximity. The 80-day runway to next earnings provides time for follow-through without immediate binary risk. Small float (24.1M) creates upside leverage. This is a clean technical setup in a non-leader-tactical B-grade. Conviction: Medium.
