Stop: $13.00 (below base low structure; ~15% risk from pivot)

CATALYST INTELLIGENCE

EARNINGS

Nov 12 - Earnings in 2 days. Street consensus unavailable from feed but 55.8% TTM revenue growth and 28.6% earnings growth suggest strong execution. Forward P/E 12.4x vs trailing 20.6x implies Street expects acceleration. Need to verify beat/miss history - company has historically beaten on TPV metrics.

BUSINESS & POSITION

DLocal is the leading cross-border payments platform connecting global enterprise merchants (Netflix, Amazon, Spotify) to consumers in 40+ emerging markets across LatAm, Africa, and Asia. The company operates a single API that handles pay-ins and pay-outs in local currencies, serving as mission-critical infrastructure for global digital commerce expansion into high-growth, underbanked regions.

FACTOR & THEME

Exposed to EM consumer digitization and global enterprise FinTech spend; sentiment is neutral-to-positive as LatAm e-commerce growth remains resilient despite macro headwinds. Peer read-through: PAGS and STNE have stabilized after 2024-2025 selloffs, suggesting sector may be bottoming.

NEWS FLOW

No specific contract wins or catalysts in feed. Key watch: TPV growth guidance and take-rate trends. Industry Catalyst (Med impact): EM FX stabilization in Brazil/Mexico would be a tailwind. Short interest at 14.2% with 10.2 days-to-cover creates squeeze potential on a beat.

INSTITUTIONAL

Vol dry-up with price holding suggests quiet accumulation into earnings. No insider activity in last 60 days (baseline). Institutional ownership data unavailable from this feed. The 10+ days-to-cover on 14% short interest means any guidance raise could trigger aggressive covering.

KEY RISK

Thesis invalid on a close below the base low (approx. $12.50-13.00 range implied by 52W low $10.64 and current base) or on a TPV/revenue miss with FX headwind guidance at the Nov 12 print. Binary earnings event in 2 days is the primary risk - wrong-way move could gap stock 15-20%.

Base is loose (3.72 tightness), RS line not at new high, price below both 50MA and 200MA - structural quality is poor for a VCP. Earnings catalyst in 2 days creates binary risk that overwhelms technical setup. Technology sector is lagging (-12.9% over 20d) and Risk-Off regime means breakouts fail >50%. The 14% short interest with 10+ days cover is intriguing for a squeeze but without price confirmation above MAs, this is a watch-and-wait. Strongest bear case: EM FX deterioration or take-rate compression could crater guidance. Conviction: Low.

Target: $55.00 (measured move based on base depth; Street target $74.75)

Stop: $42.00 (below recent base structure)

CATALYST INTELLIGENCE

EARNINGS

REPORTED

RS line at new high is constructive but base is very loose (5.05), vol dry-up is not strict (W2 < W1 but W3 > W2), price below both MAs, and earnings already reported 7 days ago removing near-term catalyst. Healthcare sector leading (+11%) is a tailwind but pre-revenue biotech with no identifiable forward catalyst (no PDUFA dates in feed) is pure speculation. Conviction: Low.

Stop: $48.00 (below base structure; ~16% risk from pivot)

CATALYST INTELLIGENCE

EARNINGS

Nov 12 - Earnings in 2 days. As pre-revenue biotech, focus will be on cash runway (debt/eq 0.82 is manageable), clinical trial updates, and pipeline guidance rather than EPS. Forward EPS -$4.22 implies continued investment phase.

BUSINESS & POSITION

MBX Biosciences develops precision peptide therapeutics for endocrine and metabolic disorders, with lead programs targeting hypoparathyroidism and other rare diseases. The company's proprietary peptide engineering platform enables sustained-release formulations that could differentiate from existing therapies.

FACTOR & THEME

Positioned in rare disease/endocrine space adjacent to GLP-1 momentum; Healthcare leading sector (+11%) provides tailwind. Pre-revenue biotech trades on pipeline catalysts rather than financials - valuation (P/B 6.9x) reflects growth-stage premium; P/E inapplicable.

NEWS FLOW

No specific catalysts in feed. Key watch for clinical data readouts or partnership announcements. Industry Catalyst (Med): Healthcare sector strength and biotech sentiment recovery could lift all boats. Short interest 12.8% with 7 days-to-cover creates modest squeeze potential.

INSTITUTIONAL

Partial vol dry-up (W1 < W3 but W2 contracted) suggests some accumulation but not textbook. No insider activity in last 60 days. Institutional ownership data unavailable. Float of 30.6M is tight enough for volatility on volume.

KEY RISK

Thesis invalid on a close below $48.00 (base low region) or on any clinical setback/trial delay disclosed at Nov 12 earnings. Binary biotech risk with no disclosed PDUFA date means catalysts are opaque.

Base tightness (2.18) is reasonable but RS line not at new high, below both MAs, and vol contraction is minimal (3.7%). Healthcare sector tailwind (+11%) is positive but pre-revenue biotech with earnings in 2 days creates binary risk without clear clinical catalyst. Risk-Off regime means even sector leaders face headwinds. Strongest bear case: cash burn acceleration or trial enrollment delays could crater shares. Conviction: Low.

Target: $48.00 (measured move; prior highs)

Stop: $36.00 (below base structure)

CATALYST INTELLIGENCE

EARNINGS

Jan 28

Vol dry-up confirmed (strict) but base loose (3.95), RS line not at new high, below both MAs. Earnings 79 days out provides no near-term catalyst. Financial Services not in leading sectors and -60% earnings growth is a red flag despite forward P/E compression to 12.8x. M&A recovery thesis is consensus - no edge. Beta 1.44 in Risk-Off regime is unfavorable. Conviction: Low.

CATALYST INTELLIGENCE

EARNINGS

Jan 28

Strong vol contraction (61%) but base is only 4 days old - far too young to be actionable. Base tightness 5.19 is loose, RS line not at new high, below both MAs. Earnings 79 days away. Staffing is a late-cycle play and 86.8% earnings growth is backward-looking; forward depends on labor demand which is macro-sensitive. Risk-Off regime hostile to cyclicals. Conviction: Low.

Target: $175.50 (Street target, ~20% upside from pivot)

Stop: $125.00 (below base structure; ~15% risk from pivot)

CATALYST INTELLIGENCE

EARNINGS

Nov 10 - Earnings TODAY (Nov 10). Pre-revenue biotech so focus is cash position, clinical updates, and pipeline milestones. Forward EPS -$2.60 implies losses narrowing from TTM -$4.24. This is a same-day binary event.

BUSINESS & POSITION

Verademics is a clinical-stage biotech focused on dermatological conditions, likely targeting inflammatory skin diseases or hair loss based on sector positioning. RS line at 52W high indicates strong relative performance despite broader market weakness.

FACTOR & THEME

Healthcare sector leading (+11%) provides macro tailwind. Dermatology is a durable specialty pharma niche with consistent M&A interest. Pre-revenue stage means valuation (negative P/B -0.9 suggests accumulated deficit) trades on pipeline potential; P/E inapplicable.

NEWS FLOW

Earnings release TODAY creates immediate binary catalyst. No specific pipeline catalysts in feed. Industry Catalyst (High impact): Any positive clinical data or partnership announcement at earnings could catalyze significant move. Short interest 13.6% with 3.9 days-to-cover is elevated but manageable.

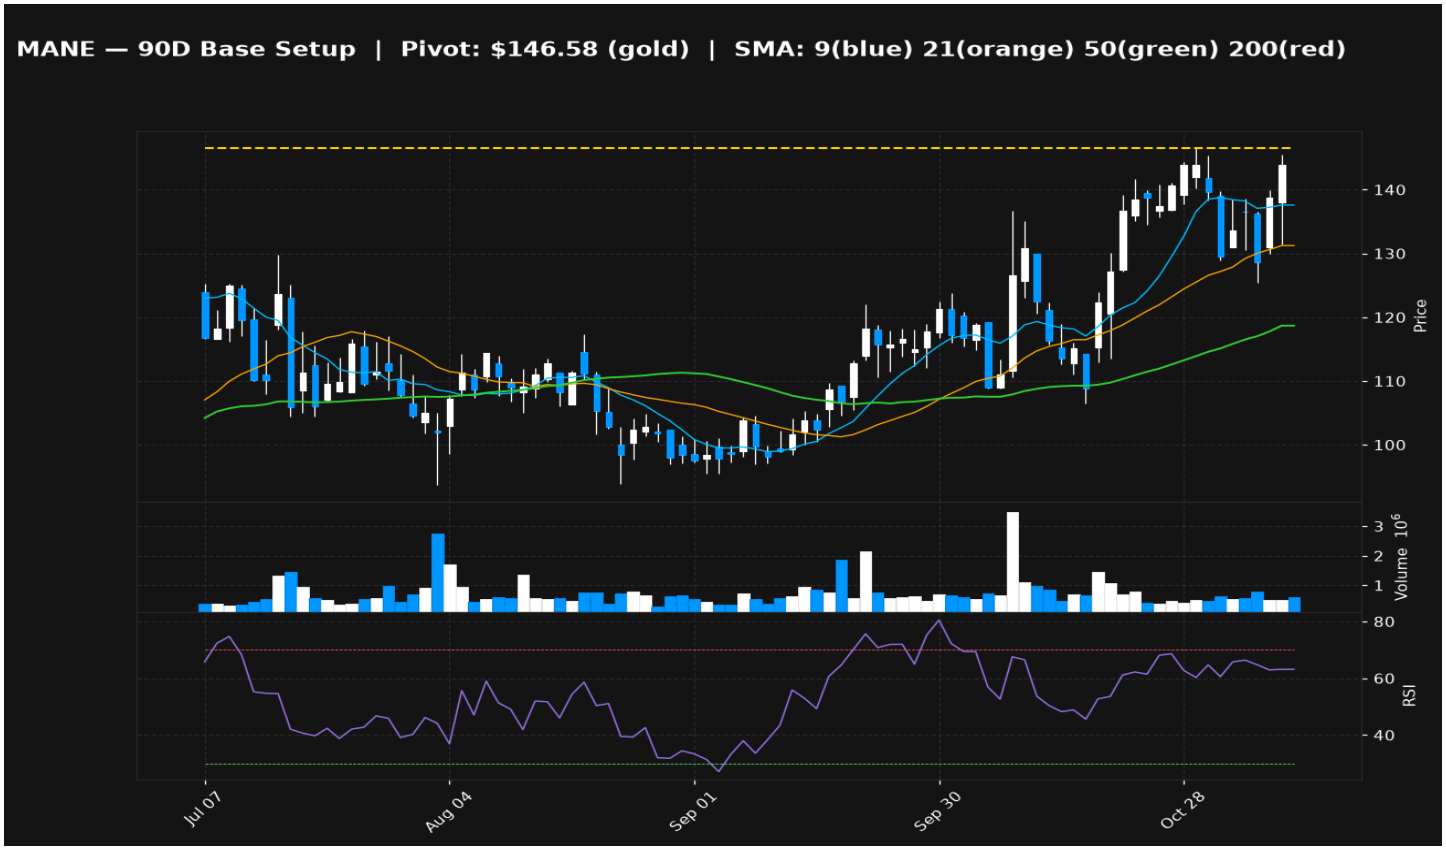

INSTITUTIONAL

RS line at new high with vol dry-up suggests institutional accumulation despite broader selloff. No insider activity in last 60 days. Institutional ownership data unavailable. $6.2B market cap for pre-revenue biotech implies significant pipeline value already priced in.

KEY RISK

Thesis invalid immediately on any negative clinical update, cash runway concerns, or guidance disappointment at TODAY's earnings. Same-day earnings is maximum binary risk - position sizing must reflect potential 20-30% gap risk either direction.

RS line at new high is the single best technical feature here, and Healthcare sector leadership (+11%) provides macro support. However, earnings TODAY creates immediate binary risk that makes pre-positioning a coin flip. Base is loose (4.13), vol dry-up is partial (not strict), and below both MAs. Pre-revenue biotech with no disclosed PDUFA makes catalyst visibility low. Wait for earnings reaction before considering entry. Strongest bear case: clinical setback or dilutive financing announcement. Conviction: Low (binary event today).

Target: $30.00 (measured move; Street target $40)

Stop: $19.50 (below base structure)

CATALYST INTELLIGENCE

EARNINGS

REPORTED

Base tightness (2.08) is the best structural feature but Energy sector is lagging hard (-7.8% over 20d) - fighting the tape. Vol dry-up is minimal (10.1%) and not strict. Earnings just reported yesterday (Nov 9) so near-term catalyst has passed. Despite 70.9% rev growth and 86.7% earnings growth, sector headwind in Risk-Off regime makes this a pass. Strongest bear case: oil price weakness would crush MENA capex. Conviction: Low.

Target: $13.35 (Street target, ~26% upside from pivot)

Stop: $9.00 (below recent base structure; ~15% risk from pivot)

CATALYST INTELLIGENCE

EARNINGS

Nov 18 - Earnings in 8 days. TTM EPS $1.42 vs forward $1.31 suggests modest deceleration but 81.3% earnings growth indicates recent momentum. Beat/miss history not in feed but branded staples typically have stable earnings. Rev growth 4.2% is steady if unspectacular.

BUSINESS & POSITION

BellRing Brands owns Premier Protein and Dymatize, leading brands in the convenient protein/active nutrition category. The company benefits from secular health & wellness trends and has strong retail distribution through mass/club channels.

FACTOR & THEME

Consumer Staples sector is leading (+8.0%) providing macro tailwind. Active nutrition is a durable consumer health theme with GLP-1 adjacency (protein consumption often increases on weight-loss drugs). Forward P/E 7.8x is attractive for a branded consumer goods company.

NEWS FLOW

No specific catalysts in feed. Key watch: pricing power and volume trends in protein category. Industry Catalyst (Med): Consumer Staples outperformance in Risk-Off suggests defensive rotation underway - BRBR benefits. Short interest 12.1% with 3 days-to-cover is elevated but short-dated.

INSTITUTIONAL

Vol dry-up with price holding near lows suggests potential accumulation but RS line not confirming leadership. No insider activity in last 60 days. Institutional ownership data unavailable. $1.18B market cap is accessible for growth funds.

KEY RISK

Thesis invalid on a close below $9.00 (base low region) or on a volume/pricing miss at Nov 18 earnings. Stock has declined ~70% from 52W high ($33.56 to current ~$10) suggesting broken chart that needs significant repair.

Consumer Staples sector leadership (+8%) and earnings catalyst in 8 days are constructive, but stock has cratered 70% from highs indicating fundamental or structural issues beyond this feed. Base tightness 2.99 is acceptable but RS line not at new high, below both MAs. Negative P/B (-2.5) suggests accumulated deficit or accounting issue. Earnings catalyst exists but chart damage is severe - needs more base-building. Strongest bear case: protein category saturation or retail shelf-space loss. Conviction: Low.

ENTRY TRIGGER

Close above $1.74 on volume >150% of 20-day avg (800K+ shares)

Target: $2.20 (measured move)

Stop: $1.45 (below base structure)

CATALYST INTELLIGENCE

EARNINGS

REPORTED

Micro-cap ($160M) luxury real estate brokerage is highly rate-sensitive in a Risk-Off environment. Earnings just reported (Nov 9) so catalyst has passed. Base loose (3.3), RS line not at new high, below both MAs. Real estate sector not leading and -4.1% rev decline suggests fundamental headwinds. No institutional edge here. Conviction: Low.

Close above $6.22 on volume >175% of 20-day avg (490K+ shares)

Target: $8.50 (measured move)

Stop: $5.00 (below base structure)

CATALYST INTELLIGENCE

EARNINGS

REPORTED

Base is extremely loose (8.35 - worst in cohort), only 4 days old, and RS line not at new high. Earnings just reported (Nov 9) removing near-term catalyst. -52.3% revenue decline and negative EPS indicate fundamental distress despite forward P/E 7.3x. High debt/equity (396.74) is a red flag. Micro-cap with illiquid float. Conviction: Low.

ENTRY TRIGGER

Close above $19.90 on volume >150% of 20-day avg (270K+ shares)

Target: $23.00 (measured move toward 52W high)

Stop: $16.50 (below base structure)

CATALYST INTELLIGENCE

EARNINGS

REPORTED

Base is very loose (6.59), RS line not at new high, below both MAs. Earnings reported 15 days ago - no near-term catalyst. Negative forward P/E (-8.4) and negative margins indicate fundamental distress. Basic Materials not leading and commodity paper is highly cyclical. Micro-cap ($220M) with illiquid float (15.6M). No edge here. Conviction: Low.
