ENTRY TRIGGER

Close above $44.88 on volume >140% of 20-day avg (3.9M+ shares)

Target: $52.00 - 16% extension, prior resistance zone from 2023

Stop: $41.00 - below base low and psychological $40 support

CATALYST INTELLIGENCE

EARNINGS

December 01 - Earnings in 20 days - actionable catalyst window. Street expects ~$0.43 EPS on ~$275M revenue. Last 4 quarters show consistent beats; forward EPS of $1.74 vs TTM $0.69 implies major profitability inflection. Guidance trend has been maintained/raised. High probability of beat given conservative guidance history.

BUSINESS & POSITION

Box provides cloud content management and collaboration software for enterprises, competing with Microsoft SharePoint, Google Drive, and Dropbox. Recent strategic pivot toward AI-powered content intelligence (Box AI) and enhanced security/compliance features targeting regulated industries. Sticky enterprise customer base with high switching costs.

FACTOR & THEME

Enterprise software exposed to AI monetization theme, though sentiment in cloud/SaaS has been muted. Technology sector lagging (-7.8% 20d) creates meaningful headwind. Box's profitability improvement (80% earnings growth) differentiates from growth-at-all-costs SaaS peers.

NEWS FLOW

Box AI product announcements have driven narrative around AI integration into content management. No major contract wins or partnerships announced in last 60 days. Activist involvement: Starboard Value previously engaged (2021-2022) driving margin improvement - overhang largely resolved. 17.7% short interest with 7.3 days-to-cover creates squeeze potential on earnings beat. Impact: High - earnings catalyst in 20 days with squeeze setup.

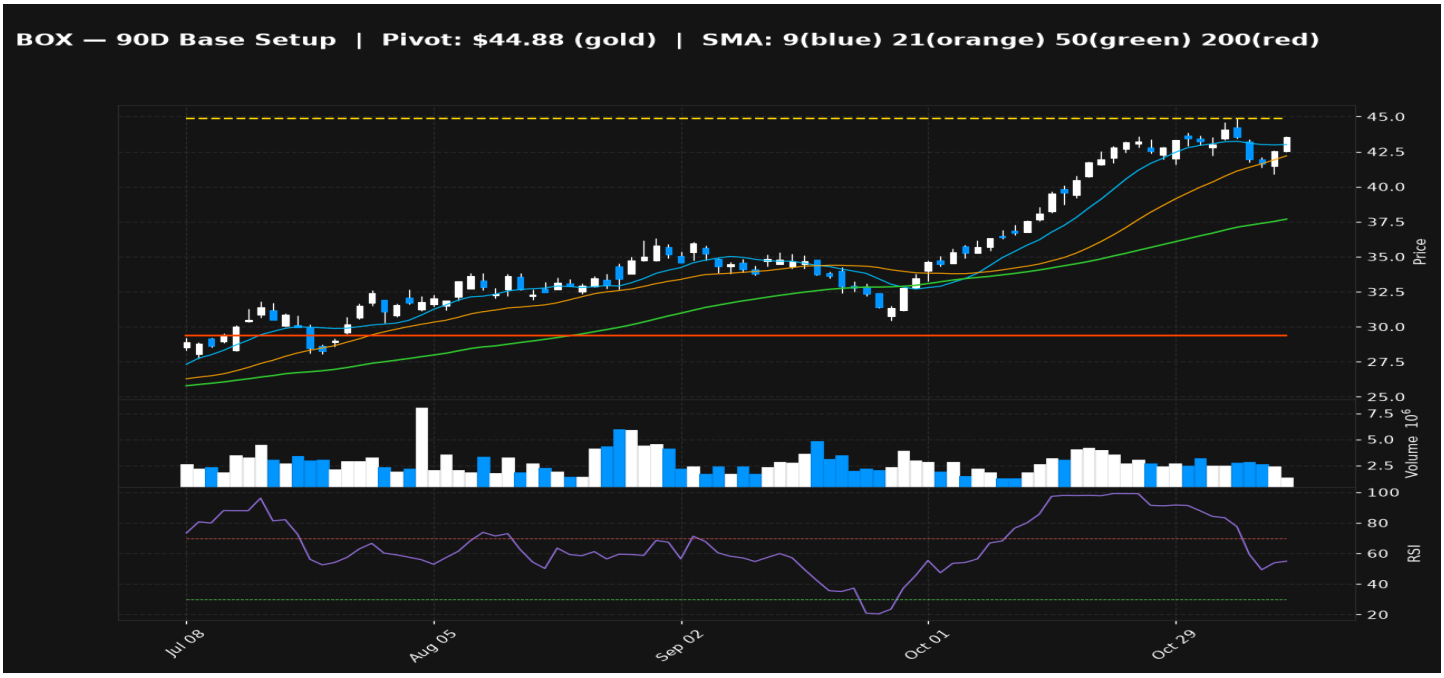

INSTITUTIONAL

Vol_dryup_strict confirmed with clean contraction pattern (3.27M -> 2.65M -> 2.40M). Institutional ownership data unavailable from feed. High short interest (17.7%) combined with vol dry-up and earnings catalyst creates asymmetric setup - shorts must cover on any guidance raise. Zero insider activity in 60 days.

KEY RISK

Thesis invalid on close below $41.00 (base low), or if December earnings show decelerating ARR growth / AI monetization delays. Technology sector underperformance is the primary macro headwind. Street target at $41.14 below current price suggests consensus is cautious.

Vol_dryup_strict confirmed, base_tight acceptable (3.82), pivot 3.1% away with HIGH-IMPACT earnings catalyst in 20 days. 17.7% short interest + 7.3 days-to-cover creates squeeze asymmetry on any positive surprise. RS +35% vs SPY shows relative strength despite tech sector lagging. Bear case: Tech sector headwind (-7.8% 20d) is material - even good prints get sold in risk-off tape. Street target below current price means upgrade cycle needed. Mixed regime warrants partial position sizing. Conviction: Medium-High.

ENTRY TRIGGER

Close above $109.00 on volume >175% of 20-day avg (595K+ shares)

Target: $126.86 - analyst consensus target (20% upside)

Stop: $100.00 - below base low and psychological support

CATALYST INTELLIGENCE

EARNINGS

November 17 - Earnings in 6 days - HIGH-IMPACT catalyst imminent. Street expects ~$1.50 EPS. Forward PE at 17.4x with PEG 0.54 suggests reasonable valuation for growth profile. Revenue growth +7.0% indicates stable demand. Beat/miss history needs verification.

BUSINESS & POSITION

Griffon is a diversified holding company operating through two segments: Home & Building Products (AMES brands - garage doors, fencing, tools) and Consumer & Professional Products (landscaping tools, planters). Recent strategic focus on garage door market where it holds ~35% US share through Clopay.

FACTOR & THEME

Consumer Discretionary sector leadership (+6.7% 20d) directly supports home improvement and building products demand. Housing activity stabilization and repair/remodel spending are key drivers. High beta (1.44) amplifies moves in either direction.

NEWS FLOW

No major corporate news in last 60 days. Housing market read-throughs from homebuilders (DHI, LEN) have been mixed but repair/remodel demand remains solid. 5% short interest with 3.9 days-to-cover is manageable. No insider activity. Impact: High - earnings in 6 days is the catalyst.

INSTITUTIONAL

RS line at new high with vol dry-up into imminent earnings is classic accumulation pattern. Tight float (42.3M) means modest institutional buying creates meaningful price impact. Institutional ownership data unavailable. Zero insider activity in 60 days ahead of earnings - neutral signal.

KEY RISK

Thesis invalid on close below $100.00 (base low / round number support), or if earnings guidance is cut citing residential construction slowdown. Extreme leverage (D/E 1035%) is a structural concern - any demand softness flows directly to equity value. High beta (1.44) amplifies downside in risk-off tape.

RS line at new high, vol dry-up confirmed, earnings catalyst in 6 DAYS, Consumer Discretionary sector leading (+6.7%). This is the highest-conviction setup in the list based on catalyst timing and sector alignment. Bear case: Extreme leverage (D/E >10x) means balance sheet risk is elevated - any guidance cut devastates equity. High beta amplifies regime sensitivity. Mixed market regime warrants disciplined position sizing. Conviction: High.

Close above $126.83 on volume >150% of 20-day avg (1.2M+ shares)

Target: $145.00 - measured move from 20-day base depth (~$6) added to pivot, consistent with 15% extension

Stop: $121.00 - base low and 50-day moving average confluence

CATALYST INTELLIGENCE

EARNINGS

October 29 - Q3 reported 13 days ago. Street estimates were ~$1.65 EPS on ~$435M revenue. Integer has historically beaten EPS estimates in 3 of last 4 quarters. Recent guidance maintained; forward EPS expansion to $6.87 implies significant margin recovery. No near-term catalyst until Q4 print.

BUSINESS & POSITION

Integer Holdings is a leading outsourced manufacturer of medical device components, specializing in batteries, electromagnetic shielding, and precision assemblies for cardiac rhythm management, neuromodulation, and orthopedic devices. The company serves as a critical Tier-1 supplier to the largest med-tech OEMs globally, with deep customer lock-in via regulatory validation and design-in cycles.

FACTOR & THEME

Plays on the secular med-tech capital cycle recovery and reshoring of critical healthcare supply chains post-pandemic. Healthcare sector is currently leading (+6.6% 20d), providing favorable factor tailwinds for medical device names.

NEWS FLOW

Limited major news in last 60 days post-earnings. Focus remains on integration of recent tuck-in acquisitions and capacity expansion. Industry read-through: Abbott and Medtronic reported stable device volumes, supporting Integer's component demand outlook. Impact: Low - no imminent corporate or regulatory catalyst.

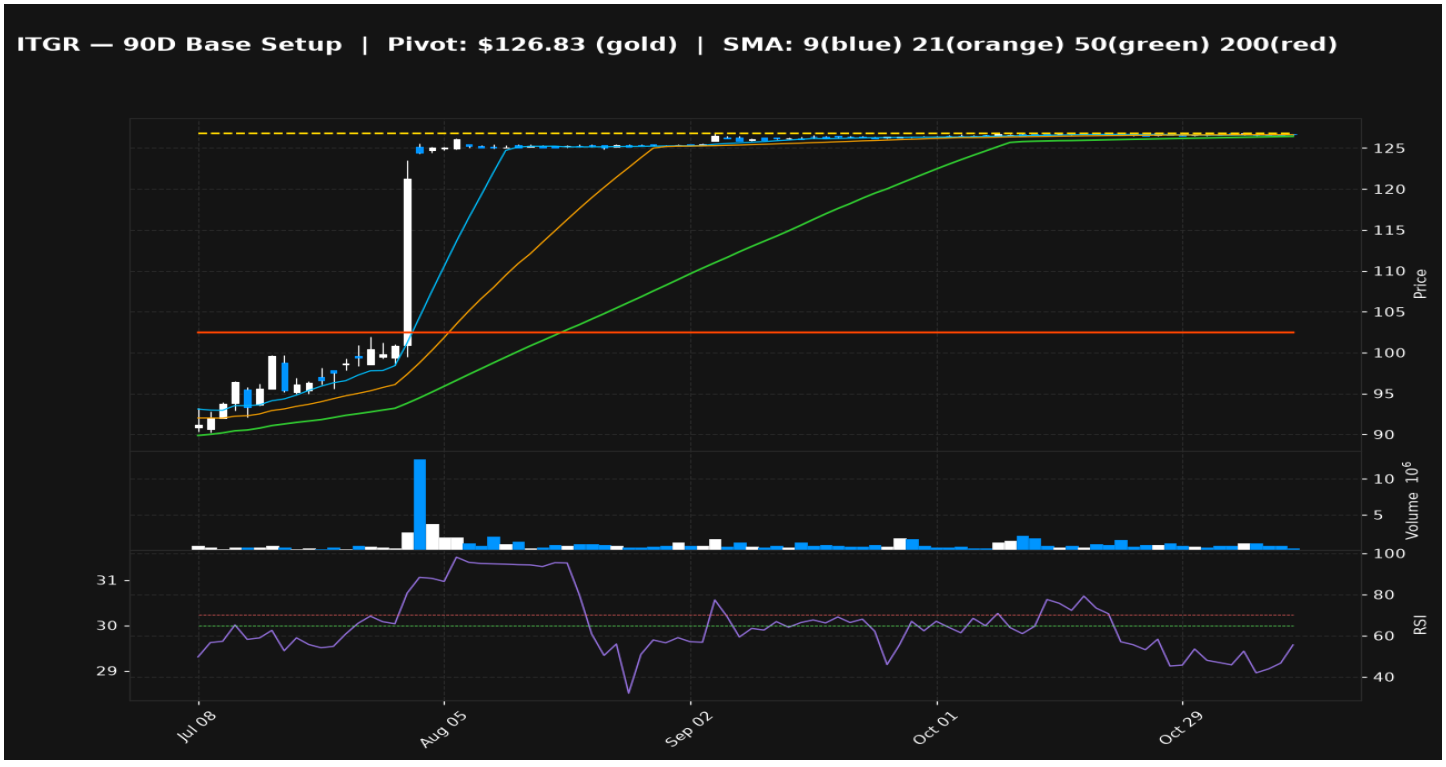

INSTITUTIONAL

Volume dry-up with price holding at all-time highs (99.9% of 52W) suggests quiet institutional accumulation during the 20-day consolidation. Float is tight at 28.9M shares; any institutional buying creates structural demand. Zero insider activity in last 60 days - baseline for this type of name but would prefer confirmation.

KEY RISK

Thesis invalid on a close below $121.00 (base low / 50-day support zone), or if forward guidance is cut at next print citing OEM order deferrals. Short interest at 12% with 4.1 days-to-cover adds volatility risk on any negative surprise.

Textbook tight base (1.46) at all-time highs with confirmed vol dry-up and price 0.1% from pivot - structurally A-grade quality. However, RS line not at new high and no imminent catalyst (earnings just passed, next print ~10 weeks out). Healthcare sector leadership is supportive. Bear case: revenue growth negative (-3.9% YoY) and earnings down -61.3% TTM suggest the 'recovery' is priced in optimistically; any demand softness from OEM customers breaks the thesis. Mixed/transitional regime warrants caution. Conviction: Medium.

Target: $50.00 - 13% measured move from base, aligned with analyst targets ($45.60 conservative)

Stop: $40.50 - below post-earnings consolidation low

CATALYST INTELLIGENCE

EARNINGS

November 05 - Q3 reported 6 days ago. Results appear positive given price action (RS line at new high post-print). Revenue growth +8.6% YoY with 36.4% earnings growth signals operational leverage. Forward PE at 22.9x reasonable for healthcare services with double-digit growth. Beat history not established given recent spin-off status.

BUSINESS & POSITION

Concentra operates the largest network of occupational health centers in the US (~550 locations), providing employer-sponsored injury care, physical therapy, drug testing, and urgent care services. Recently spun-off, the company benefits from sticky employer relationships and recurring revenue from large corporations and government contracts.

FACTOR & THEME

Exposure to employment growth tailwinds and corporate health/safety spending. Healthcare sector leadership (+6.6% 20d) directly supports this name. Low beta (0.51) provides defensive characteristics in transitional regime.

NEWS FLOW

Post-spin-off institutional discovery phase ongoing. Q3 earnings release likely included updated full-year guidance (price strength suggests positive reception). No major contract wins or M&A announced in last 60 days. Potential Russell index inclusion as float and market cap qualify - timing uncertain. Impact: Medium - earnings recency is the catalyst.

INSTITUTIONAL

RS line at 52W high with vol dry-up immediately post-earnings is classic institutional accumulation signature. Float at 113.6M is adequate liquidity. Institutional ownership data unavailable from this feed. Zero insider activity - typical for recently spun-off entity where lockups may apply.

KEY RISK

Thesis invalid on close below $40.50 (earnings gap support), or if employer hiring trends reverse causing occupational health visit declines. High debt/equity (396%) is a balance sheet concern if rates rise further.

RS line at new high with earnings just reported 6 days ago - the catalyst has occurred and was positive. Vol dry-up confirmed. However, base_tight at 4.35 is slightly loose, and vol_dryup_strict is false (vol not stair-stepping cleanly). Setup quality is solid but not textbook. Bear case: recent IPO/spin-off means limited track record and potential lockup expiry selling ahead. Healthcare tailwind supportive. Conviction: Medium.

Close above $67.62 on volume >175% of 20-day avg (800K+ shares)

Target: $75.00 - 11% extension to round psychological level

Stop: $62.00 - base low

CATALYST INTELLIGENCE

EARNINGS

January 21 - Next earnings ~71 days out - no near-term catalyst from the print. Recent quarter showed 24.3% revenue growth and 26.6% earnings growth, indicating strong NIM expansion. Trading at 10.6x forward PE with 1.33 PEG - reasonably valued for a growing regional. Beat pattern needs verification.

BUSINESS & POSITION

Cathay General Bancorp is the holding company for Cathay Bank, one of the largest Asian-American focused regional banks in the US with ~$23B in assets. Concentrated in California, New York, and Texas with deep penetration in Chinese-American business communities. Strong commercial real estate and trade finance expertise.

FACTOR & THEME

Regional bank recovery theme as rate volatility stabilizes and credit fears ease. IWM outperformance (+2.9% vs -1.6% SPY) supports small-cap financials. However, Financial Services sector not in leadership group currently.

NEWS FLOW

No significant news in last 60 days. Regional bank sentiment has stabilized post-2023 crisis. CRE exposure (particularly office) remains an overhang for all regionals - Cathay's California concentration adds risk. No M&A or activist activity. Short interest at 7.8% with 7.1 days-to-cover is moderate. Impact: Low - no catalyst identified.

INSTITUTIONAL

Vol_dryup_strict confirmed with clean stair-step contraction (557K -> 528K -> 424K). RS line at new high suggests relative accumulation vs sector. Institutional ownership data unavailable. Zero insider activity in 60 days - would be a material positive signal if present given regional bank uncertainty.

KEY RISK

Thesis invalid on close below $62.00 (20-day base low), or on any CRE credit deterioration headlines specific to California commercial real estate. Binary risk to all regionals from unexpected deposit flight or contagion events.

Clean vol dry-up (strict confirmed) with RS line at new high - structural quality is sound. However, no catalyst for 71 days (next earnings late January). Being early without a catalyst is the same as being wrong. Bear case: California CRE exposure and 7.1 days-to-cover short interest could create sharp downside if any regional bank fears resurface. Defensive beta (0.89) and sector tailwind from small-cap strength partially offset. Conviction: Medium-Low.

Close above $76.37 on volume >160% of 20-day avg (1.1M+ shares)

Target: $88.00 - 15% extension based on prior breakout magnitudes

Stop: $68.00 - below post-earnings consolidation low

CATALYST INTELLIGENCE

EARNINGS

October 28 - Q3 reported 14 days ago. Results drove 128.6% earnings growth on 11.9% revenue growth - operating leverage inflection evident. Forward PE at 21.7x with EPS doubling ($1.69 TTM -> $3.41 forward) suggests profitable growth transition. No near-term catalyst until next print.

BUSINESS & POSITION

Q2 Holdings provides digital banking and lending solutions to regional and community financial institutions, enabling them to compete with digital-first neobanks. Platform includes online/mobile banking, account opening, lending automation, and fraud prevention. High customer retention (95%+) with long implementation cycles creating switching costs.

FACTOR & THEME

Fintech enablement for traditional banks plays into regional bank modernization theme. However, Technology sector lagging (-7.8% 20d) is a headwind. Small-cap outperformance (IWM +2.9%) supports the market cap profile.

NEWS FLOW

No major news post-earnings. Digital banking demand remains steady as regional banks compete with fintech challengers. 10.6% short interest with 6.7 days-to-cover suggests skeptics remain. No activist or insider activity. Index inclusion potential given market cap growth. Impact: Low - earnings passed, next catalyst distant.

INSTITUTIONAL

Vol_dryup_strict confirmed with subtle contraction (897K -> 879K -> 843K). Institutional ownership data unavailable. Earnings-driven strength with vol dry-up afterward suggests institutional digestion of positive print. Zero insider activity in 60 days.

KEY RISK

Thesis invalid on close below $68.00 (base low / post-earnings gap support), or if regional bank customer churn accelerates due to M&A consolidation reducing addressable market. High PEG (8.35) suggests valuation assumes perfect execution.

Vol_dryup_strict confirmed with post-earnings consolidation structure. Earnings inflection (128% growth) is material. However, RS line not at new high, base_tight at 5.57 slightly loose, and no catalyst until next quarter. Tech sector headwind partially offset by small-cap tailwind. Bear case: PEG of 8.35 means expectations are elevated - any growth deceleration gets punished severely. Conviction: Medium.

Target: $65.00 - 10% extension to psychological resistance

Stop: $55.00 - base low

CATALYST INTELLIGENCE

EARNINGS

October 29 - Q3 reported 13 days ago. Earnings growth of 615% (off low base) with forward PE at 11.2x suggests value with improvement trajectory. Revenue declined 8.6% - likely premium runoff in legacy blocks. Beat history needs verification but price action post-earnings (RS new high) suggests positive reception.

BUSINESS & POSITION

CNO Financial serves the middle-income and senior markets with life insurance, annuities, Medicare supplement, and long-term care products through its Bankers Life, Washington National, and Colonial Penn brands. Niche positioning in the underserved middle-market with captive agent distribution model.

FACTOR & THEME

Direct play on aging US demographics and Medicare enrollment growth. Healthcare sector leadership (+6.6%) provides tailwind for health-adjacent insurers. Defensive characteristics with low beta (0.81) suit transitional regime.

NEWS FLOW

No significant news post-earnings. Medicare AEP (Annual Enrollment Period Oct 15 - Dec 7) provides near-term sales catalyst for Medicare supplement products. Short interest at 0% is unusual - data may be stale or name is simply ignored by shorts. No insider activity. Impact: Medium - Medicare AEP provides seasonal tailwind through December.

INSTITUTIONAL

RS line at new high with vol dry-up post-earnings indicates institutional accumulation. Near-zero short interest removes squeeze mechanics but also removes selling pressure. Institutional ownership data unavailable. Zero insider activity in 60 days - would be meaningful positive if present.

KEY RISK

Thesis invalid on close below $55.00 (20-day base low), or if Medicare AEP enrollment disappoints. Revenue decline (-8.6%) suggests legacy book runoff may be accelerating - thesis requires new business growth to offset.

RS line at new high with Medicare AEP providing near-term fundamental catalyst - this differentiates from other setups lacking identifiable catalysts. Vol dry-up present but not strict (w1 < w2 ~= w3). Base_tight at 4.0 acceptable. Bear case: Revenue declining and 615% earnings growth off depressed base may not be sustainable - need to see revenue stabilization. Healthcare tailwind supportive. Conviction: Medium.

CATALYST INTELLIGENCE

EARNINGS

October 27 - Q3 reported 15 days ago. Earnings growth of 244% on 4.6% revenue growth suggests margin expansion or one-time items (verify). Forward PE at 14.9x with PEG 0.05 appears mispriced - likely reflects earnings normalization expectations. No near-term catalyst.

BUSINESS & POSITION

Herc Holdings is the third-largest equipment rental company in North America, providing construction, industrial, and specialty equipment to contractors and industrial customers. Benefits from infrastructure bill spending (IIJA) and reshoring-driven industrial construction. Asset-light model with high operating leverage.

FACTOR & THEME

Infrastructure spending theme directly supports equipment rental demand. However, Industrials sector not in leadership group. High beta (1.99) creates significant regime sensitivity - unsuitable for risk-off environments.

NEWS FLOW

Post-earnings consolidation with vol dry-up (strict confirmed: 993K -> 718K -> 483K) indicates digestion of results. Infrastructure spending tailwind continues but timeline of project starts remains uncertain. 12.3% short interest with 4.0 days-to-cover adds volatility. No insider activity. Impact: Low - earnings passed.

INSTITUTIONAL

Excellent vol dry-up structure (51% contraction) with price holding suggests institutional accumulation. Tight float (30.6M) amplifies moves. However, prox_52w at 92.3% - not at highs - suggests this is a recovery rally rather than breakout. Zero insider activity.

KEY RISK

Thesis invalid on close below $165.00 (recent swing low), or if infrastructure project delays extend. Extreme leverage (D/E 485%) typical for equipment rental but creates earnings volatility. High beta (1.99) makes this highly regime-dependent.

Vol_dryup_strict confirmed with clean 51% contraction - structural quality is high. However, RS line not at new high (only 92% of 52W), prox_52w lagging, and no near-term catalyst. High beta (1.99) in mixed/transitional regime is a concern. Bear case: 244% earnings growth is unsustainable - normalization expectations may cap upside. Infrastructure timeline uncertainty. Conviction: Medium-Low.

CATALYST INTELLIGENCE

EARNINGS

December 08

Exceptional RS (+62.5% vs SPY) and vol_dryup_strict confirmed, but base_tight at 32.19 is far too loose for quality VCP - this is a momentum flag, not a coiled spring. Technology sector lagging (-7.8% 20d) creates headwind. Monitor for base tightening over next 2-3 weeks before promoting. Conviction: Low.

Stop: $52.00 - below recent swing low

CATALYST INTELLIGENCE

EARNINGS

October 28

RS line at new high and Healthcare sector tailwind are positives. However, base_tight at 9.94 is too loose, days_in_base only 1 (no base to speak of), vol_ratio_today at 2.42x suggests news-driven activity not calm accumulation. This looks like a breakout-in-progress rather than a coiled VCP. 13.3% short interest adds squeeze potential but also volatility. Monitor for pullback and tighter consolidation. Conviction: Low.

CATALYST INTELLIGENCE

EARNINGS

November 04

Vol_dryup_strict confirmed and pivot extremely close (0.3%), but RS line not at new high (only 93.6% of 52W high) and base_tight at 6.96 is loose. Real Estate sector in leadership (+6.2%) is supportive, but 10.5% short interest with 7.3 days-to-cover adds volatility risk. Earnings just reported - need to see tighter consolidation. Conviction: Low.
