ANALYSIS

CATALYST / TODAY'S DRIVER

Technical breakout near 52-week high as regional banks rally on stabilizing rate environment. Forward catalyst: Q3 earnings on October 27 (47 days out) will provide visibility into net interest margin trends and credit quality as the rate cycle matures.

BREAKOUT SIGNAL

Close above \$47.17 on vol >1.6x of 20d avg

ANALYSIS

Disconfirming: RS vs SPY is barely positive (+1.5), RS line is NOT at new high (critical Qullamaggie signal absent), base is wide (2.57 vs ideal <2.0), volume is only 1.62x (below institutional 2.0x threshold), and financials are underperforming in current mixed regime (sector not leading). This is a lagging sector participant with weak relative strength attempting a breakout without the technical confirmation signals required for follow-through. The 47-day runway to earnings is too long to provide near-term positioning edge. Watch for tighter setup or sector rotation catalyst. Conviction: Low
