CATALYST INTELLIGENCE
EARNINGS
Aug 06 - Pre-revenue biotech; Street focus will be on cash runway, clinical milestones, and MBX 2109 Phase 2 data readouts. No EPS consensus meaningful (loss-making). Company has guided to key data catalysts in 2H26. Recent quarters have met operational milestones.
BUSINESS & POSITION
MBX Biosciences is a clinical-stage biotech developing precision peptide therapeutics for endocrine and metabolic disorders, with lead asset MBX 2109 targeting hypoparathyroidism - a condition with limited treatment options and clear unmet need. The company operates in a niche with high barriers and potential orphan drug economics, positioning it as a disruptor in the endocrine space.
FACTOR & THEME
Directly exposed to the biotech innovation cycle which has shown renewed institutional interest post-2024 trough; Healthcare sector is currently a leading performer (+4.2% 20d). Peer read-through from recent rare disease deal activity (e.g., Alexion, Ultragenyx) suggests strategic acquirer interest remains elevated.
NEWS FLOW
No major contract wins or partnerships disclosed in last 60 days. Key catalyst ahead is Q2 update expected to include clinical program progress for MBX 2109. Short interest at 17% (5.5 days to cover) reflects skepticism but also squeeze potential on positive data. Impact: Earnings / High.
INSTITUTIONAL
Vol dry-up with RS line at 52W high and price holding near highs suggests quiet institutional accumulation - textbook stealth positioning ahead of catalyst. No insider buying in last 60 days (baseline for pre-revenue biotech). Float is tight at 27M shares, amplifying potential move magnitude.
KEY RISK
Thesis invalid on a close below the \$58.00 base low or any clinical hold/negative data readout at the Aug 6 print - binary biotech event risk is elevated. High short interest could also pressure shares on any miss.

Textbook VCP: strict vol contraction confirmed across all three weeks (47%), RS line at 52W high (+121% vs SPY), tight base (2.12), pivot within 4%, and high-impact earnings catalyst in 8 days. Healthcare is a leading sector in current regime. Strongest disconfirming argument: binary clinical-stage biotech with 17% short interest - a data miss or cash runway concern could trigger violent reversal. Conviction: High.

Close above \$56.94 on volume >120% of 20-day avg (1.5M+ shares)
Target: \$68.00 (measured move + short squeeze premium, ~20% upside)
Stop: \$52.00 (breakdown of base structure)

CATALYST INTELLIGENCE
EARNINGS
Sep 16 - Consensus EPS ~\$1.10, revenue growth challenged (-2.9% recent). Earnings pattern has been mixed; the 239% YoY earnings growth reflects easy comps from depressed prior-year. Guidance trend has been cautiously maintained. No imminent catalyst - earnings 49 days out.
BUSINESS & POSITION
Cracker Barrel operates ~660 country-themed restaurant and retail stores primarily along US interstate highways, targeting value-conscious family diners. The company is a turnaround story with new management initiatives focused on menu innovation and cost optimization after years of declining same-store sales.
FACTOR & THEME
Consumer Cyclical is currently a lagging sector (-5.5% 20d), creating macro headwind. However, CBRL's RS line at new high diverges from sector weakness - idiosyncratic turnaround thesis. 42% short interest with 5 days to cover creates asymmetric squeeze setup on any positive catalyst.
NEWS FLOW
Limited newsflow in last 60 days; no major strategic announcements. The extreme short interest (41.9%) positions this as a squeeze candidate rather than a fundamental buy. Any activist involvement or strategic review announcement would be a major catalyst. Impact: None imminent / potential squeeze is speculative.
INSTITUTIONAL
RS line at new high despite sector weakness suggests quiet accumulation by value-oriented funds betting on turnaround. No insider buying in last 60 days - notable absence given turnaround narrative. The 42% short interest is among the highest in the restaurant space.

KEY RISK
Thesis invalid on a close below \$52.00 (recent base support) or continued same-store sales declines in next quarter. Consumer Cyclical sector weakness (-5.5%) in mixed macro regime is material headwind. High debt/equity (247) limits financial flexibility.

RS line at 52W high despite lagging Consumer Cyclical sector is notable divergence; 42% short interest with 5 days to cover creates squeeze asymmetry. However, vol dry-up is soft (not strict), base is loose (3.08), catalyst is 49 days away, and macro regime is headwind for cyclicals. Strongest disconfirming argument: fundamentally challenged casual dining in weak consumer environment with no near-term catalyst to ignite squeeze. Conviction: Medium.

Target: \$72.00 (measured move from base + historical resistance zone)
Stop: \$54.00 (base low invalidation)

CATALYST INTELLIGENCE
EARNINGS
Aug 05 - Consensus EPS ~\$0.50-0.55 for Q2, revenue growth ~20%. Company has been a serial beater with expanding margins (65.5% gross, 24.5% operating). Guidance trend has been raised. Forward P/E of 22.5x on 47% earnings growth is reasonable for the growth profile.
BUSINESS & POSITION
Clear Secure operates biometric identity verification platforms primarily in airports, enabling expedited security screening for 25M+ members. The company benefits from structural travel growth and expanding use cases beyond airports into stadiums, healthcare, and age verification.
FACTOR & THEME
Technology sector is the worst performer (-10.3% 20d) creating significant macro headwind. Travel recovery theme is mature. Clear's airport monopoly positioning provides defensiveness, but RS vs SPY at only +7% shows lack of leadership. Peer TSA PreCheck competition is increasing.
NEWS FLOW
No major contract wins or partnership announcements in last 60 days. The company continues steady airport location expansion. 17.6% short interest with 8 days to cover creates friction. Earnings in 7 days is the key catalyst - positive surprise could trigger breakout. Impact: Earnings / Medium.
INSTITUTIONAL
Vol pattern shows accumulation attempt but w3 spike breaks the clean dry-up pattern. RS line NOT at new high despite price near highs - a divergence suggesting lack of conviction from momentum buyers. No insider buying in last 60 days. Tech sector underperformance is headwind.

KEY RISK
Thesis invalid on a close below \$54.00 (base low) or any deceleration in member growth metrics at Aug 5 print. Technology sector (-10.3%) is worst-performing sector in current regime - significant macro headwind.
Tight base (2.3), imminent earnings catalyst (7d), strong fundamentals (109% ROE, serial beater), and reasonable valuation. However, RS line NOT at new high is a key negative divergence, vol dry-up is incomplete (w3 spike), and Technology sector is the worst performer (-10.3%). Strongest disconfirming argument: sector headwind and RS divergence suggest institutional buyers are not aggressively accumulating despite tight base. Conviction: Medium.

Stop: \$13.50 (base low)

CATALYST INTELLIGENCE	
EARNINGS	
Aug 13 - Consensus expects continued strong revenue growth (~50%+) but margin pressure from investment phase. P/E 22.8x trailing with 35% ROE is reasonable. Beat/miss history has been mixed with volatility around guidance. Earnings in 15 days provides catalyst runway.	
BUSINESS & POSITION	
DLocal provides cross-border payment processing infrastructure enabling global merchants to accept payments in 40 emerging markets across LatAm, Africa, and Asia. The Uruguay-based company serves enterprise clients like Amazon, Microsoft, and Spotify seeking EM payment rails.	
FACTOR & THEME	
Technology sector headwind (-10.3%) applies. LatAm/EM fintech theme has been volatile. 55% revenue growth is exceptional but earnings growth negative (-6.7%) raises margin questions. Peer Mercado Libre and PagSeguro have shown mixed action. Currency volatility in LatAm is ongoing risk.	
NEWS FLOW	
One insider buy (\$237K) in last 60 days - notable but single buyer, non-senior, cluster score of 2 is below upgrade threshold. No major contract wins announced. Short interest at 12.8% with 4.9 days to cover. Impact: Earnings / Medium.	
INSTITUTIONAL	
Insider activity present (1 buy, \$237K) is a positive signal but insufficient for grade upgrade (cluster 2 < 5 threshold). Base is tight (1.9) but w3 volume spike disrupts VCP pattern. RS line NOT at new high. Float is large (86M) limiting squeeze dynamics.	
KEY RISK	
Thesis invalid on a close below \$13.50 (base low) or any take rate compression/customer concentration concerns at Aug 13 print. LatAm currency volatility and regulatory changes in key markets (Brazil, Mexico) are ongoing risks.	

Tightest base in the group (1.9), exceptional revenue growth (55%), and one insider buy (\$237K) adds minor conviction. However, vol dry-up broken by w3 spike, RS line not at new high, Technology sector worst performer, and EM/currency risk. Insider cluster (2) insufficient for grade upgrade. Strongest disconfirming argument: negative earnings growth despite 55% revenue growth suggests margin deterioration that could continue. Conviction: Medium.

Energy sector leading (+11%) but CHRD underperforming (RS -8.6%) - wrong stock in right sector, same issue as MUR. Base very loose (7.24), vol soft. Better E&P setups available. Conviction: Low.

CHRD — 90D Base Setup | Pivot: \$141.84 (gold) | SMA: 9(blue) 21(orange) 50(green) 200(red)

CATALYST INTELLIGENCE

EARNINGS

Aug 06

Loose base (4.95), 7.3% to pivot is far, RS negative vs SPY (-1.7%), for-profit education faces regulatory scrutiny risk. Defensive sector tailwind but poor technical structure. Conviction: Low.

PRDO — 90D Base Setup | Pivot: \$37.08 (gold) | SMA: 9(blue) 21(orange) 50(green) 200(red)
