Analysis
Catalyst / Today's Driver No identifiable fundamental catalyst today - RGTI is down -7.37% on below-average volume (0.93x), suggesting profit-taking, sector rotation out of quantum names, or sympathy selling following broader speculative tech weakness. This is a distribution day, not a breakout.
Business & Position Rigetti Computing designs and manufactures superconducting quantum processors and offers cloud-based quantum computing services via its Quantum Cloud Services (QCS) platform. The company competes against IBM, Google Quantum AI, IonQ, and well-funded startups in a pre-commercial market where quantum advantage over classical computing has not yet been demonstrated at scale for real-world applications.
Factor & Theme RGTI is a pure-play beneficiary of the quantum computing hype cycle, which has been turbocharged by government funding (DARPA, CHIPS Act adjacency) and enterprise curiosity from defense, pharma, and financial modeling sectors. However, quantum theme momentum is highly sentiment-driven and has proven violently mean-reverting - RGTI's collapse from \$58.15 to \$17.85 (a -69% drawdown from the 52-week high) illustrates the fragility of pre-revenue quantum valuations when retail enthusiasm fades.
Breakout Signal No actionable signal - stock is below its 20MA, extended -69% below 52W high, on sub-average volume during a down day. Pivot resistance at \$21.02; would need a reclaim of 20MA (~\$19-20 range) on volume >1.5x avg as a minimum re-entry precondition.
Institutional Institutional ownership is reported at 53.6% across 582 institutions, which is a meaningful holder base for a pre-commercial name. However, the insider activity profile is deeply concerning: zero open-market buys in the last 60 days AND zero in the full 12-month window, against 33 insider sales totaling approximately \$39.9M over the past 12 months. This is a unidirectional insider selling pattern with no offsetting conviction buys - a significant red flag. No silent-build pattern, no accumulation signal, no A/D data to counter the insider sell pressure.
Earnings Context No earnings date is available from this data feed (earnings_date is null). RGTI reported trailing revenue growth of 198.9% - impressive on a percentage basis but from an extremely small base (implied TTM revenue ~\$10M at a \$5.93B market cap, yielding a Price/Sales ratio of 592x). Forward P/E is negative and inapplicable for a pre-commercial stage company; valuation reflects pure optionality/narrative premium. Beat/miss history is secondary when the business is pre-scale.
Key Risk The stock is -69% off its 52-week high with no base formation, a 592x P/S ratio on pre-commercial revenue, zero insider buying against \$39.9M in insider sales, and faces an existential competitive threat from IBM, Google, and Microsoft Azure Quantum - any sustained risk-off rotation or quantum hype deflation could push RGTI toward its pre-2024 price structure below \$5.
Analysis RGTI fails every breakout criterion simultaneously: it is down -7.37% today, below its 20MA, trading at only 30.7% of its 52-week high, on below-average volume, with a wide and unstructured base (3.13), RS line nowhere near a new high, and a 12-month insider selling pattern of \$39.9M with zero open-market buys. In a Mixed/Transitional macro regime with small-cap underperformance (IWM 20d: +0.1% vs SPY +4.3%), speculative pre-commercial quantum names are exactly the category to avoid - this is a watch-and-wait at best, and the insider selling trend suggests smart money at the company level is actively reducing exposure.
Signal: No actionable signal - stock is below its 20MA, extended Vol vs Avg: 0.93x

Recent 13D / 13G Filings (last 12 months)

13D = activist stake, board pressure, takeover | 13G = passive 5%+ holder, lower-conviction

No 13D or 13G filings against this company in the last 12 months.

Ownership Interpretation

Smart Money:	Top holders skew 6 passive / 4 active. No high-conviction smart-money names identified.
Concentration:	Top 10 hold 28% - moderate concentration, normal for SMID.
13D/13G:	No 5%+ stake filings in last 12 months. Either nobody's gone over the threshold or the company is too large for 5% to be common (>\$10B caps rarely see 13D/G activity).
Insider Tape:	33 insider sales in 12 months, no open-market purchases - neutral to bearish (but typical for unprofitable growth companies).

Volume / Tape Synthesis

A/D Verdict: B-rated tape (Accumulation). Volume action favors buyers - institutions are net accumulating over the last 13 weeks.

Vol Footprint: Last 90d: 3 accumulation day(s) at >2x average volume. Net bullish - accumulation outpacing distribution.

TAPE-BASED ACTION: WATCH / SMALL STARTER OK
