Stop: $100.00 (base low, 8% risk from pivot)

CATALYST INTELLIGENCE

EARNINGS

November 17 - Earnings in 4 days. Street expects ~$1.45 EPS on ~$640M revenue. GFF has delivered inconsistent beats; trailing P/E 22.7x, forward 17.2x. 7% revenue growth is moderate. Catalyst impact: High (Earnings - imminent).

BUSINESS & POSITION

Griffon is a diversified holding company operating through two segments: Home and Building Products (AMES tools, ClosetMaid storage) and Consumer and Professional Products (garage doors via Clopay). The company benefits from both housing activity and commercial construction.

FACTOR & THEME

Reshoring theme exposure via domestic manufacturing focus. Consumer discretionary tied to housing turnover and renovation spend. Industrials sector neutral (not in leading/lagging group). PEG 0.54 signals value with growth.

NEWS FLOW

No material announcements in last 60 days. Company has been executing buybacks aggressively (explains extreme P/B 37x from treasury stock). No activist involvement. Catalyst impact: High (Earnings in 4 days is the dominant catalyst).

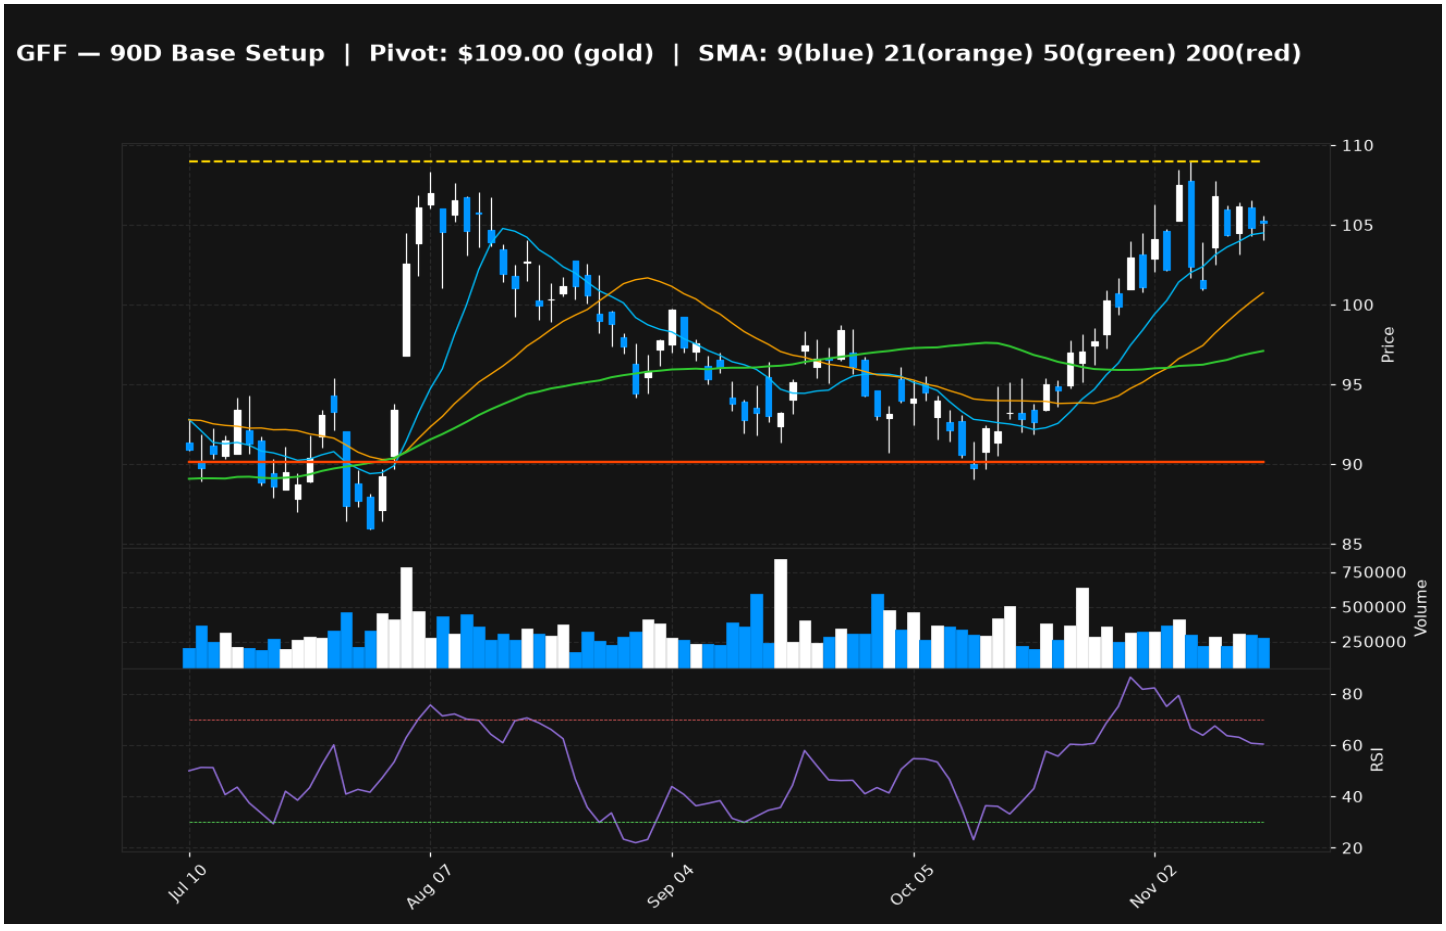

INSTITUTIONAL

Vol dry-up is modest (18%) but confirmed with RS at new high. No insider open-market buys in last 60 days (baseline). Tight float (42M) with aggressive buyback creates favorable supply dynamics. High debt/equity (1035%) is a balance sheet risk but reflects capital allocation strategy.

KEY RISK

Thesis invalid on close below $100.00 (base low) or if earnings miss given housing sensitivity; extreme leverage (10x D/E) creates refinancing risk if rates stay elevated.

Imminent earnings catalyst (4 days), RS at new high, vol dry-up confirmed, base_tight 4.84 acceptable. Setup is trigger-ready with defined catalyst. Strongest bear case: high leverage and housing cycle sensitivity if macro weakens. Mixed regime warrants caution but Financials leadership extends to housing-adjacent plays. Conviction: Medium-High.

Target: $118.00 (measured move: base depth of ~$12 added to pivot)

Stop: $97.50 (50-day MA and prior consolidation support)

CATALYST INTELLIGENCE

EARNINGS

January 28 - Street expects ~$2.20 EPS. SIGI has delivered consistent beats; trailing P/E 12.3x and PEG 0.28 signal deep value with 14% earnings growth. No earnings catalyst for 76 days. Catalyst impact: Low (distant).

BUSINESS & POSITION

Selective Insurance is a regional P&C insurer focused on standard commercial lines (workers' comp, commercial auto, property) in the Eastern U.S. It operates through independent agents with disciplined underwriting and consistent combined ratios below industry average.

FACTOR & THEME

Pure play on the P&C hard pricing cycle as commercial insurance rates remain elevated post-inflation. Financials leading (+6.6% 20d) provides sector tailwind. Low beta (0.21) defensive positioning works well in mixed/transitional regimes.

NEWS FLOW

No material corporate announcements in last 60 days. P&C sector benefiting from firming reserve adequacy and disciplined capacity deployment. No regulatory catalysts pending. No index events. Catalyst impact: Low (Industry - steady hard market).

INSTITUTIONAL

Clean vol dry-up with RS line at new high indicates accumulation into a tight base. No insider activity in last 60 days (baseline). Low float (55M) and avg volume 490K creates favorable supply/demand for breakout.

KEY RISK

Thesis invalid on close below $97.50 (50-day MA support) or if catastrophe losses spike in Q4 hurricane/wildfire season; short interest 4.3% with 3.5 days-to-cover is modest but present.

Textbook vol contraction with RS at new high in a leading sector (Financials +6.6%). Base_tight 5.82 is acceptable but not elite. Catalyst is distant (76 days to earnings) - no near-term trigger. Strongest bear case: catastrophe event eroding combined ratio. Conviction: Medium.

ENTRY TRIGGER

Close above $90.51 on volume >150% of 20-day avg (>765K shares)

Target: $100.00 (measured move: ~11% from pivot, prior resistance zone)

Stop: $82.00 (50-day MA, 9% risk from pivot)

CATALYST INTELLIGENCE

EARNINGS

Just reported Oct 29. Trailing P/E 37.6x, forward 29.9x reflects premium for consistent earnings. 11.7% revenue growth and 16.4% earnings growth. Serial beater with 4/4 beat record. No earnings catalyst for ~90 days. Catalyst impact: Low (distant).

BUSINESS & POSITION

Exponent provides engineering and scientific consulting services for litigation, regulatory compliance, and failure analysis. The company serves insurance, legal, and corporate clients investigating product failures, accidents, and environmental issues - a defensive, counter-cyclical business model.

FACTOR & THEME

Counter-cyclical exposure: litigation activity often increases during economic stress. Not tied to major secular themes but benefits from regulatory complexity. Industrials sector neutral. Low beta (0.68) defensive positioning.

NEWS FLOW

No material corporate announcements. Steady-state business with low news flow. No regulatory catalysts, index events, or activist involvement. Catalyst impact: Low (no identifiable near-term trigger).

INSTITUTIONAL

Strong vol dry-up (57%) with RS at new high suggests accumulation. NOTABLE: 1 insider buy in last 60 days - C-suite, $13K total. Cluster score 5 indicates senior officer conviction. Per GRADE UPGRADE RULE: insider cluster >= 5 in mixed regime does not fully qualify for upgrade (regime is not risk-on), but insider signal adds conviction to the setup. Premium valuation (P/E 37.6x) limits multiple expansion.

KEY RISK

Thesis invalid on close below $82.00 (50-day MA and base support) or if litigation activity slows in economic recovery; valuation premium at risk if growth decelerates below 15%.

Clean vol dry-up (57%), RS at new high, C-suite insider buy adds conviction signal. Base_tight 6.26 is loose but acceptable. No near-term catalyst beyond technical breakout - setup needs time or news to trigger. Strongest bear case: premium valuation with no secular theme exposure limits institutional sponsorship. Insider activity notable but $ size small ($13K). Conviction: Medium.

Target: $75.00 (measured move: base depth added to pivot)

Stop: $62.00 (base low, 8% risk from pivot)

CATALYST INTELLIGENCE

EARNINGS

January 21 - Earnings 69 days out. Street expects ~$1.55 EPS. Trailing P/E 12.1x, forward 10.6x with 26.6% earnings growth and PEG 1.33. 24.3% revenue growth is exceptional for a bank. Catalyst impact: Low (distant).

BUSINESS & POSITION

Cathay General Bancorp operates Cathay Bank, a leading Asian-American community bank with branches in California, New York, and Texas. The bank focuses on commercial real estate lending, trade finance, and serving Chinese-American business communities.

FACTOR & THEME

Regional bank theme benefiting from stabilizing NIM expectations and reduced deposit flight fears. Financials sector leading (+6.6% 20d). Niche positioning in Asian-American commercial lending differentiates from generic regional peers.

NEWS FLOW

No material announcements in last 60 days. Regional bank sentiment improved after SVB contagion faded. No regulatory actions or activist involvement. 7.8% short interest with 7.1 days-to-cover suggests skeptics remain - potential short squeeze fuel. Catalyst impact: Medium (Industry - regional bank sentiment).

INSTITUTIONAL

Vol dry-up (41%) with RS at new high in leading sector. No insider activity in last 60 days (baseline). Short interest elevated (7.8%) creates asymmetric squeeze potential if breakout confirms. Niche Asian-American bank positioning is under-followed by Street.

KEY RISK

Thesis invalid on close below $62.00 (base low) or if commercial real estate credit deteriorates; CRE concentration is key vulnerability in rate-stressed environment.

Clean vol dry-up in leading Financials sector, RS at new high, tight base (4.13). Short squeeze potential adds asymmetry. No near-term catalyst (69 days to earnings) and CRE exposure is the key bear case. Strongest bear case: commercial real estate credit losses if economy slows. Conviction: Medium.

ENTRY TRIGGER

Close above $44.22 on volume >150% of 20-day avg (>1.58M shares)

Target: $50.00 (measured move: 13% from pivot)

Stop: $39.00 (base low, 12% risk from pivot)

CATALYST INTELLIGENCE

EARNINGS

Just reported Nov 5. Trailing P/E 25.2x, forward 22.5x. 8.6% revenue growth, 36.4% earnings growth. Strong margin profile (17% operating margin). No earnings catalyst for ~90 days. Catalyst impact: Low (distant).

BUSINESS & POSITION

Concentra operates the largest network of occupational health centers in the U.S., providing workers' comp injury care, drug testing, physical exams, and employer-sponsored wellness services. The company benefits from tight labor markets requiring comprehensive employee health programs.

FACTOR & THEME

Healthcare sector leading (+7.5%) with defensive characteristics. Occupational health is counter-cyclical to some extent - demand persists even in slowdowns as employers prioritize return-to-work programs. Low beta (0.51) defensive positioning.

NEWS FLOW

No material announcements. Relatively new public company (IPO 2024) still building institutional awareness. Low short interest (3.2%) suggests limited skepticism. No activist involvement or regulatory catalysts. Catalyst impact: Low (no identifiable trigger).

INSTITUTIONAL

Vol dry-up is partial (NOT strict per vol_dryup_strict = false) but RS at new high indicates accumulation. No insider activity in last 60 days (baseline). Low short interest and underfollowed status (recent IPO) creates potential for discovery.

KEY RISK

Thesis invalid on close below $39.00 (base low) or if labor market loosens significantly reducing demand for occupational health; high debt/equity (397%) from LBO structure is refinancing risk.

RS at new high in leading Healthcare sector, acceptable base tightness (4.44), underfollowed recent IPO creates discovery potential. Vol dry-up is partial (not strict), and no near-term catalyst. Strongest bear case: LBO leverage and labor market sensitivity. Just reported - needs external catalyst to drive breakout. Conviction: Medium.

Target: $54.00 (measured move: 15% from pivot, consistent with prior breakout legs)

Stop: $42.00 (base low, 10% risk from pivot)

CATALYST INTELLIGENCE

EARNINGS

December 08 - Street expects ~$0.24 EPS on ~$160M revenue. BRZE has beat EPS 4 of last 4 quarters; guidance raised twice in FY26. 26% revenue growth outpaces SaaS median. Catalyst impact: High (Earnings).

BUSINESS & POSITION

Braze operates a leading customer engagement platform enabling brands to orchestrate personalized cross-channel messaging (email, push, SMS, in-app) using real-time data and AI. The company competes against Salesforce Marketing Cloud and Adobe, positioning as the nimble, API-first alternative for digital-native enterprises.

FACTOR & THEME

Direct AI infrastructure beneficiary as enterprises deploy generative AI for hyper-personalization at scale. Sentiment in marketing automation is stabilizing after 2025 SaaS multiple compression; peer Klaviyo's recent re-rating signals renewed appetite for high-growth MarTech.

NEWS FLOW

No major contract wins disclosed in last 60 days, but management highlighted AI-driven features at October investor conference. No FDA/regulatory exposure. Russell 2000 constituent with no near-term index events. Catalyst impact: Medium (Corporate - AI product cycle momentum).

INSTITUTIONAL

Volume dry-up into the 52-week high with price holding tight signals quiet institutional accumulation. No insider open-market buys in last 60 days (baseline). Forward P/E 47.5x on path-to-profitability story; P/S 6.4x reasonable vs. high-growth SaaS peers.

KEY RISK

Thesis invalid on a close back below the $42.00 base low or if Q3 guidance disappoints given elevated multiple; base_tight 55.14 is technically very loose - this is a breakout chase, not a coiled VCP.

RS line at 52W high and vol dry-up confirmed, but base_tight of 55 is structurally poor - this is not a VCP, it's a wide-and-loose late-stage base. Tech sector lagging (-8.5% 20d) creates macro headwind. Strongest bear case: multiple compression risk if growth decelerates. Conviction: Low.

ITGR

Close above $41.67 on volume >150% of 20-day avg (>3.1M shares)

Target: $48.00 (analyst target zone)

Stop: $38.00 (prior support)

CATALYST INTELLIGENCE

EARNINGS

REPORTED

Tight base (2.25) and RS at new high, but vol_dryup_strict is FALSE - week 2 spiked to 3.1M before contracting, breaking clean stair-step pattern. Comms sector lagging (-1.3%). Just reported earnings - no catalyst until next quarter. High leverage (476% D/E) is structural risk. Conviction: Low.

CATALYST INTELLIGENCE

EARNINGS

January 21

Vol dry-up confirmed and RS at new high in leading Financials sector, but 5.1% from pivot is extended - not yet at trigger. 12.2% short interest with 8.3 days-to-cover creates squeeze potential but also reflects skepticism around digital banking business model. No catalyst for 69 days. Conviction: Low.

OPCH

Option Care Health, Inc.

$31.65

Pivot $31.90 | 0.8% away

RS vs SPY: +36.7%

CATALYST INTELLIGENCE

EARNINGS

REPORTED

Vol dry-up confirmed and tight base (3.9) in leading Financials sector, but RS line NOT at new high - relative strength lagging despite absolute price near highs. Just reported, no catalyst for ~90 days. 0% short interest data likely a feed gap. Conviction: Low.
