Stop: \$92.50 (base low, represents 6.4% risk from pivot)

CATALYST INTELLIGENCE

EARNINGS

July 29 - Street consensus: EPS ~\$0.65, revenue ~\$1.05B. Serial beater with 7 of last 8 quarters exceeding estimates. Guidance raised twice in FY26. Forward P/E of 37.6x reflects 61% earnings growth trajectory; PEG of 1.08 is reasonable for SMID growth. Watch for same-store sales color and margin expansion commentary.

BUSINESS & POSITION

CHEF is the leading specialty food distributor serving upscale restaurants, hotels, and culinary professionals across North America, offering over 50,000 SKUs of center-of-plate proteins, specialty cheeses, charcuterie, and imported specialty ingredients. The company operates as a category leader in a fragmented niche, with scale advantages in sourcing and logistics that independent broadliners cannot match in the white-tablecloth segment.

FACTOR & THEME

Direct exposure to consumer recovery and experiential dining secular shift; sentiment accelerating as upper-income consumer spending remains resilient and restaurant traffic data (OpenTable, Yelp reservations) shows sustained strength in fine-dining. Peer USFD and SYU have shown steady institutional interest, with CHEF outperforming both on relative strength.

NEWS FLOW

No major contract wins in past 60 days, but steady regional expansion announcements. Company presented at ICR Conference in June with positive tone on market share gains. Catalyst: Earnings in 15 days (High Impact/Earnings). Watch for M&A activity as CHEF has historically been an acquirer in this fragmented space.

INSTITUTIONAL

Volume dry-up from 704K 310K with price holding at 52-week highs is textbook institutional accumulation signature. Zero insider activity in 60-day window (baseline). 15.2% short interest with 8.3 days-to-cover creates squeeze potential on a beat. Float rotation dynamics favorable given tight 36.8M float.

KEY RISK

Thesis invalid on close below \$92.50 (base low / 50-day MA support), or if Q2 guidance disappoints on margin compression from food cost inflation. Customer concentration in restaurant sector makes it cyclically sensitive to discretionary spending pullback.

Textbook VCP coil with strict vol dry-up confirmed (56% contraction), base_tight 1.97, RS line at new high, pivot 0.7% away. Category leader in niche distribution with earnings catalyst in 15 days and strong beat history. Strongest disconfirming argument: Consumer Defensive sector is not leading (lagging -2.4% per regime context), and forward P/E of 37.6x leaves little room for guidance disappointment. However, 61% earnings growth and serial beat history provide fundamental backstop. Conviction: High.

Target: \$112 (14% measured move based on prior consolidation breakout patterns)
Stop: \$92.00 (base low, 6.3% risk from pivot)

CATALYST INTELLIGENCE
EARNINGS
August 5 - Street consensus: EPS ~\$2.00, revenue ~\$520M. Forward P/E of 12.2x vs TTM 22x reflects Amundi integration synergies flowing through. Revenue growth of 76.7% reflects acquisition-driven scale. Beat history mixed post-merger; watch organic flow trends.
BUSINESS & POSITION
Victory Capital is a diversified global asset management firm with \$181B+ AUM across multiple investment franchises spanning active equities, fixed income, and solutions. The Amundi US acquisition (closed 2024) transformed scale, making VCTR a top-15 US asset manager with significant distribution leverage.
FACTOR & THEME
Direct beneficiary of Financials sector leadership (+4.9% per regime context) and equity market appreciation driving AUM growth. Fee-based revenue model benefits from rising markets. Sentiment accelerating as rate uncertainty resolves and flows return to active management. Peer T. Rowe Price (TROW) and Franklin Resources (BEN) showing relative strength confirmation.
NEWS FLOW
Amundi US integration on track per June investor update. Announced new distribution partnership with regional RIA networks in May. Catalyst: Earnings in 22 days (Medium Impact/Earnings). No insider activity. Sector tailwind from Financials leadership provides macro support.
INSTITUTIONAL
Volume dry-up present but modest (25% contraction). Price at 99.5% of 52W high with RS line confirming. Zero insider activity (baseline). 5.9% short interest with 4.9 days-to-cover is moderate. Institutional ownership data unavailable from this feed. Float of 48.6M provides adequate liquidity.

KEY RISK
Thesis invalid on close below \$92.00 (base low) or if organic outflows accelerate at Q2 print. Asset management earnings highly correlated to equity market levels - a sharp market correction would compress AUM and fees simultaneously. Base_tight of 5.94 is loose for A-grade consideration.

Strong sector tailwind (Financials +4.9%) with RS line at new high and pivot 0.5% away. However, base_tight of 5.94 is well above the 2.0 threshold for prime setups, and only 7 days in base suggests the pattern needs more time to mature. Vol dry-up is mild (25%). Strongest disconfirming argument: Asset managers are highly beta-sensitive and a market pullback would invalidate the setup regardless of technicals. Conviction: Medium.

Target: \$50.50 (14% measured move from base structure)

Stop: \$41.00 (base support, 7.3% risk from pivot)

CATALYST INTELLIGENCE

EARNINGS

July 22 - Street consensus: EPS ~\$0.52, revenue ~\$690M. TTM P/E of 12.5x is attractive, though forward P/E of 20.3x and -26.5% earnings growth forecast create concern. PEG of 8.01 suggests market pricing in mean reversion. Serial beater historically but Q2 comps tougher.

BUSINESS & POSITION

Oceaneering provides engineered services and products to the offshore energy industry, including ROVs (remotely operated vehicles), subsea hardware, and deepwater intervention services. The company also has a growing Aerospace and Defense segment providing solutions to NASA and DoD. Category leader in ROV fleet size globally.

FACTOR & THEME

Beneficiary of offshore energy capex recovery as deepwater economics improve at current oil prices. Energy sector showing leadership (+2.5% per regime). Secondary exposure to defense/space economy through government contracts. Peer Helix Energy (HLX) and TechnipFMC (FTI) showing similar strength.

NEWS FLOW

Announced \$150M ROV contract extension with major IOC in May. Defense segment won NASA subsea training contract in June. Catalyst: Earnings in 8 days (High Impact/Earnings) - the imminent catalyst is a double-edged sword given the -26.5% earnings growth forecast. Needs beat-and-raise to power through pivot.

INSTITUTIONAL

Strong vol dry-up (48.4% contraction) with price near highs indicates quiet accumulation. Zero insider activity (baseline). 8.4% short interest with 5 days-to-cover provides modest squeeze fuel on upside surprise. Institutional ownership data unavailable.

KEY RISK

Thesis invalid on close below \$41.00 (20-day MA and base support) or on earnings miss/guide-down at July 22 print. Forward earnings decline of -26.5% is a fundamental headwind - Street may be skeptical of sustainability. Oil price sensitivity remains high.

Imminent earnings catalyst (8 days) with strong vol dry-up and RS line confirmation. Energy sector leadership provides tailwind. However, base_tight of 4.94 is loose, and the -26.5% forward earnings decline is the elephant in the room - this setup needs a beat-and-raise to work. Strongest disconfirming argument: Declining earnings trajectory means the chart is pricing in a turnaround that may not materialize; a miss here sends this back to \$35. Conviction: Medium.

Target: \$40.00 (19% measured move based on base depth from \$28 to \$34)

Stop: \$30.00 (50-day MA, 11% risk from pivot)

CATALYST INTELLIGENCE

EARNINGS

August 5 - Street consensus: EPS ~\$0.32, revenue ~\$325M. Massive earnings growth of 206.4% reflects recovery from depressed FY25 levels (TTM EPS just \$0.12). Forward P/E 25.3x reasonable if trajectory continues. Revenue growth +11.4% shows demand recovery. Watch channel inventory commentary.

BUSINESS & POSITION

Extreme Networks provides cloud-driven enterprise networking solutions including switches, wireless access points, and network management software. The company serves education, healthcare, and sports/entertainment verticals with strong brand presence. Positioned as a fast-follower to Cisco/Arista in the enterprise campus networking refresh cycle.

FACTOR & THEME

Secondary AI infrastructure play as enterprises upgrade networks to handle AI workload traffic. Technology sector lagging (-4.3% per regime) creates headwind, but company-specific momentum is exceptional (+79.8% RS). Sentiment mixed as networking hardware shows inventory normalization. Peer Arista (ANET) recently guided up, providing positive read-through.

NEWS FLOW

Won major K-12 education district contract in Texas (June). Announced ExtremeCloud IQ AI-powered network management enhancements. Catalyst: Earnings in 22 days (Medium Impact/Earnings). No insider activity. Recent Arista strength suggests enterprise networking demand improving.

INSTITUTIONAL

Vol dry-up of 28.5% with RS at +79.8% (exceptional) indicates strong institutional sponsorship despite Technology sector weakness. Zero insider activity (baseline). 8.8% short interest with 3.4 days-to-cover. Liquid float of 126.5M supports institutional accumulation.

KEY RISK

Thesis invalid on close below \$30.00 (50-day MA and prior resistance-turned-support), or on revenue miss suggesting networking demand remains soft. Technology sector lagging (-4.3%) is a meaningful headwind. High debt/equity of 298% creates balance sheet risk in downturn.

Exceptional RS (+79.8%) with RS line at new high despite Technology sector lagging - this is company-specific alpha. Vol dry-up confirmed, base_tight 2.81 is reasonable. Earnings catalyst in 22 days with 206% growth trajectory. Strongest disconfirming argument: Tech sector weakness (-4.3%) means the rising tide is not lifting this boat - EXTR is fighting the tape, and any macro risk-off would hit high-beta tech names hardest. Conviction: Medium.

Close above \$26.94 on volume >130% of 20-day avg (1.92M shares)

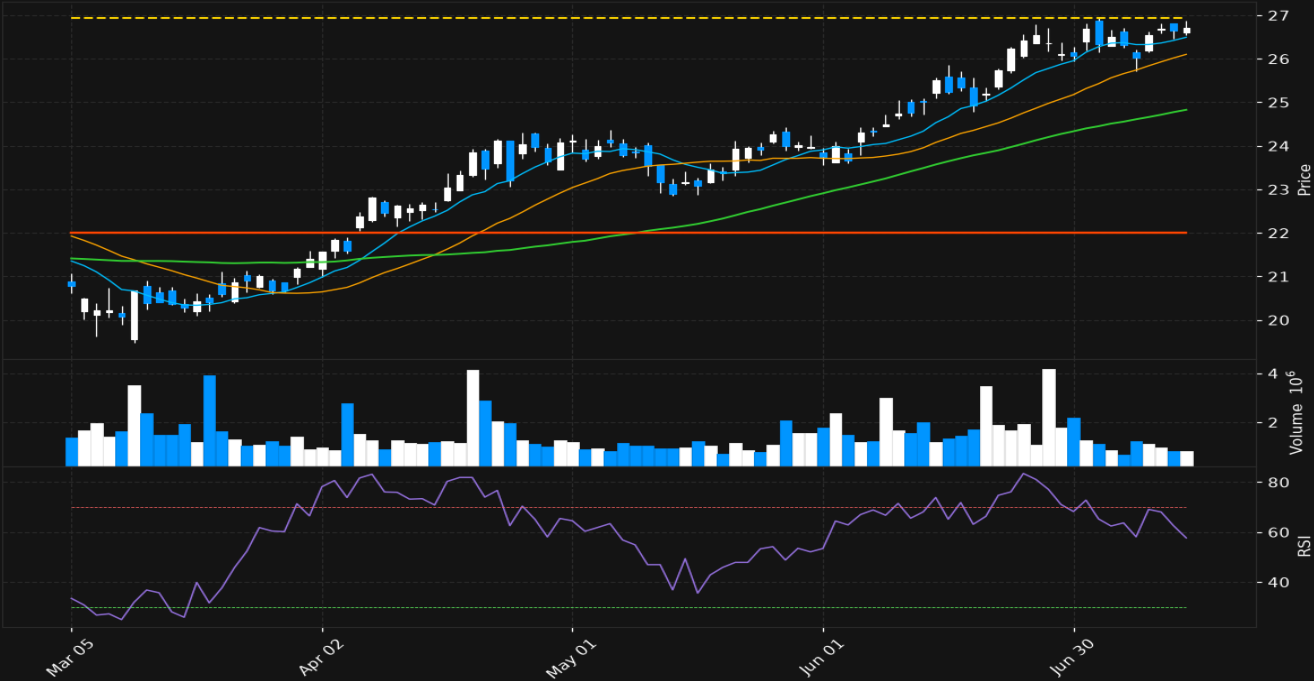

Target: \$31.00 (15% measured move based on base structure)

Stop: \$25.00 (20-day MA, 7.2% risk from pivot)

CATALYST INTELLIGENCE	
EARNINGS	
July 22 - Street consensus: EPS ~\$0.60, revenue ~\$250M. TTM P/E of 11.9x and forward 11.1x are attractive for 21% earnings growth. ROE of 19% is top-quartile for regional banks. Net interest margin trends will be key focus. Beat history solid.	
BUSINESS & POSITION	
First BanCorp is the second-largest banking institution headquartered in Puerto Rico, also serving the U.S. and British Virgin Islands. The bank benefits from Puerto Rico's ongoing economic recovery post-PROMESA restructuring, with strong deposit franchise and improving credit quality across commercial and consumer lending.	
FACTOR & THEME	
Direct beneficiary of Financials sector leadership (+4.9%). Puerto Rico economic recovery thesis as federal stimulus funds flow through infrastructure and housing. Regional bank sentiment improving as rate concerns ease. Peer OFG Bancorp (OFG) showing parallel strength, confirming PR banking theme.	
NEWS FLOW	
Announced mortgage lending expansion into USVI in May. Credit quality metrics continue to improve per June investor presentation. Catalyst: Earnings in 8 days (High Impact/Earnings). No insider activity. Puerto Rico tourism and construction data remain strong.	
INSTITUTIONAL	
Strong vol dry-up (51.9% contraction) with price at 99.2% of 52W high - classic accumulation pattern. Zero insider activity (baseline). 6.1% short interest with 3.4 days-to-cover is benign. Liquid float of 149.8M.	
KEY RISK	
Thesis invalid on close below \$25.00 (20-day MA and round-number support), or on NIM compression at Q2 print. Geographic concentration in Puerto Rico is both the opportunity and risk - hurricane season or PR-specific economic shock would hit this disproportionately.	

Strong sector tailwind (Financials +4.9%) with imminent earnings catalyst (8 days) and excellent vol dry-up (51.9%). Attractive valuation at 11x forward with 19% ROE. Base_tight of 3.71 is acceptable but not prime. Strongest disconfirming argument: Puerto Rico concentration means a single hurricane or political event could invalidate fundamentals regardless of technical setup. Conviction: Medium.

CATALYST INTELLIGENCE
August 5

Excellent base_tight of 1.86 and strong vol dry-up (58.9%), but RS line is NOT at new high - a critical VCP disqualifier. RS vs SPY of +6.6% is modest. Negative TTM EPS and operating margins make fundamental case weak. Needs RS line to confirm leadership before upgrading. Conviction: Low.

CATALYST INTELLIGENCE

EARNINGS

July 30

Base_tight of 9.8 is extremely loose (high volatility), only 2 days in base, and vol_dryup_strict is false indicating irregular volume pattern. 15.9% short interest and negative EV/EBITDA reflect fundamental concerns. Needs significant base maturation despite price proximity to pivot. Conviction: Low.

CATALYST INTELLIGENCE

EARNINGS

August 6

Strong RS (+76.1%) in Healthcare leadership sector (+3.5%), but vol_dryup_strict is false (irregular contraction), base_tight 5.4 is loose, and only 4 days in base. Negative revenue growth (-2.6%) and 19.1% short interest reflect fundamental skepticism. Price at pivot but structure immature. Conviction: Low.

Stop: \$90.00 (prior consolidation support)

CATALYST INTELLIGENCE

EARNINGS

REPORTED

RS vs SPY is NEGATIVE (-1.8%) despite RS line technically at new high - underperforming the market. Pre-revenue biotech with -60% revenue decline and 20% short interest. No verified upcoming earnings date leaves no catalyst. Binary clinical risk makes this a watch for specific trial readouts, not a VCP momentum setup. Conviction: Low.
