Target: \$94.00 (measured move from 20-day base depth of ~\$4.50 added to pivot)

Stop: \$82.50 (base low and 50-day MA support)

CATALYST INTELLIGENCE
EARNINGS
October 22 - Street expects ~\$2.05 EPS on ~\$215M revenue. Beat history strong: 4/4 last quarters. Forward P/E 10.3x vs peer group 11-12x suggests discount despite superior margins (28.6% net). Guidance maintained; no investor day scheduled.
BUSINESS & POSITION
Independent Bank Corp. operates Rockland Trust, a \$20B+ asset community bank serving Eastern Massachusetts with commercial lending, wealth management, and retail banking. Category leader in the Greater Boston community bank segment with strong deposit franchise and conservative credit culture.
FACTOR & THEME
Exposed to Fed rate trajectory and regional commercial real estate; benefits from steepening yield curve and loan repricing. Sentiment in regional banks recovering post-2023 crisis but remains below historical multiples - peer KRE +18% YTD signals sector tailwind.
NEWS FLOW
No material news in last 60 days. Sector catalyst: Fed minutes and potential rate trajectory clarity mid-September could drive regional bank re-rating. Industry read-through: WAL, EWBC, PNFP all breaking out of similar bases - sector rotation underway. Impact: Industry / Medium.
INSTITUTIONAL
Volume dry-up textbook (225K 367K 447K contracting to 225K) with price holding at highs signals quiet institutional accumulation into the pivot. Institutional ownership data unavailable from this feed. No insider activity in last 60 days - baseline for the sector.
KEY RISK
Thesis invalid on a close below \$82.50 (base low / 50-day MA confluence), or if CRE credit deterioration surfaces in Q3 commentary. 5.4% short interest (4.6 days to cover) - moderate squeeze potential if breakout confirms.

Textbook VCP structure: base_tight 1.41, vol contraction 49.6%, price within 1.6% of pivot. RS positive but not at new high caps at B-grade. Sector tailwind evident in peer breakouts. Bear case: 70 days to earnings with no near-term catalyst risks dead money; CRE exposure remains overhang. Conviction: Medium.

Stop: \$40.50 (base low and key support)

CATALYST INTELLIGENCE

EARNINGS

October 22 - Consensus ~\$1.00 EPS on ~\$390M revenue. Trailing P/E 12.4x with 834.8% y/y earnings growth reflects acquisition accretion. Beat history solid. Forward guidance constructive on merger synergies. No analyst day announced.

BUSINESS & POSITION

Atlantic Union Bankshares is a Virginia-based regional bank with \$24B+ assets serving the Mid-Atlantic through commercial, retail, and mortgage banking. Fast follower benefiting from 2024 Sandy Spring acquisition integration, expanding footprint into high-growth DC metro corridor.

FACTOR & THEME

Direct exposure to rate normalization and loan repricing cycle; Virginia/DC market benefits from federal government stability and defense contractor activity. Regional bank ETF (KRE) inflows accelerating - sentiment improving but not yet crowded.

NEWS FLOW

Sandy Spring integration progressing - cost synergies on track per Q2 commentary. No material news in 60 days. Sector read-through positive: regional bank breakouts clustering. Index note: potential Russell 1000 inclusion candidate given \$6B market cap approaching threshold. Impact: Industry / Medium.

INSTITUTIONAL

Clean volume dry-up (635K 888K 1.25M contracting 49%) with price pinned near highs - accumulation signature. Float of 141M shares provides institutional liquidity. Institutional ownership data unavailable. No insider activity in last 60 days.

KEY RISK

Thesis invalid below \$40.50 (base low and 200-day MA area). Integration execution risk from Sandy Spring acquisition; any synergy miss would compress multiple. 7% short interest (6.3 days to cover) adds squeeze potential but also reflects skepticism.

Strong VCP structure with excellent vol contraction (49%) and tight base (1.73). RS +13.7% outperforming SPY. Acquisition integration provides earnings catalyst but 70 days to print is distant. Bear case: M&A integration risk and no near-term catalyst keep this a B; RS line not at new high. Conviction: Medium.

Target: \$310.00 (measured move from \$25 base depth; analyst target \$277 conservative)
Stop: \$240.00 (consolidation low and psychological support)

CATALYST INTELLIGENCE
EARNINGS
October 22 - Street expects ~\$5.10 EPS on ~\$650M revenue. Forward P/E 12.7x attractive for 40% earnings growth. Strong beat history. Guidance has been raised twice in 2026. ROE of 26% exceptional for the space.
BUSINESS & POSITION
Enova is a leading online lender providing short-term consumer loans and SMB financing to non-prime borrowers through AI-driven underwriting. Category leader in online subprime lending with proprietary risk models and 83% gross margins demonstrating pricing power.
FACTOR & THEME
Counter-cyclical credit exposure - benefits when traditional banks tighten lending standards. Consumer resilience theme playing out; delinquencies normalizing. Fintech lending peers (UPST, LC) showing similar strength - sector sentiment inflecting positive.
NEWS FLOW
Q2 showed credit performance better than feared; management raised FY guidance. AI underwriting improvements driving loss rate outperformance. No regulatory overhang currently. Small float (23.5M) creates volatility on volume. Impact: Corporate / Medium.
INSTITUTIONAL
RS line at 52-week high is the key differentiator - leadership confirmed. Vol dry-up present but base_tight 5.57 is loose for A-grade. 10.4% short interest (5.1 days) sets up squeeze on breakout. Institutional data unavailable. No insider activity in 60 days.
KEY RISK
Thesis invalid below \$240.00 (recent consolidation low). High debt/equity (337%) creates leverage risk in credit deterioration scenario. Regulatory risk ever-present in subprime lending. Binary risk: any CFPB action would crater shares.

RS line at new high is powerful - marks true leadership. Vol dry-up confirmed but base_tight 5.57 is loose, disqualifying from A-grade. 10% short interest adds squeeze fuel. Bear case: Leverage ratio 337% debt/equity is alarming if credit cycle turns; subprime lender in late-cycle warrants caution despite strong technicals. Conviction: Medium.

ENVA — 90D Base Setup | Pivot: \$265.54 (gold) | SMA: 9(blue) 21(orange) 50(green) 200(red)

Target: \$95.00 (measured move from ~\$9 base depth; prior resistance zone)
Stop: \$79.00 (base low and 50-day MA)

CATALYST INTELLIGENCE
EARNINGS
September 09 - Q1 FY27 report in 27 days - NEAR-TERM CATALYST. Consensus ~\$1.55 EPS on ~\$710M revenue. Forward P/E 13.4x reasonable for 15% earnings growth. Beat history: 3 of last 4 quarters. Management tone constructive on executive search demand recovery.
BUSINESS & POSITION
Korn Ferry is a global organizational consulting firm providing executive search, leadership development, and RPO services. Category leader in C-suite executive search with expanding digital/AI-enabled assessment tools. \$2.8B revenue with diversified Fortune 500 client base.
FACTOR & THEME
Exposed to corporate hiring cycles and M&A activity - both recovering in 2026. AI workforce transition theme: companies restructuring talent for AI era drives consulting demand. Staffing peers (RHI, HAYS) mixed but executive search segment outperforming.
NEWS FLOW
AI-enabled talent assessment platform gaining traction - mentioned in Q4 call. Corporate restructuring cycle (AI-related workforce changes) driving consulting engagement. September earnings is a legitimate near-term catalyst. Impact: Earnings / High.
INSTITUTIONAL
Earnings in 27 days provides the catalyst missing from other setups. Vol dry-up confirmed (288K 313K 389K). RS +29% shows sector leadership. Institutional data unavailable. No insider activity in 60 days. Base_tight 3.49 is moderate - not A-grade structure.
KEY RISK
Thesis invalid below \$79.00 (50-day MA and base low confluence). Hiring slowdown or recession fears would compress multiples rapidly. Analyst target \$81 is BELOW current price - Street consensus bearish, which is either contrarian opportunity or warning.

Earnings in 27 days is the clear catalyst - differentiates from the 70+ day waits elsewhere. RS +29% confirms leadership. Base_tight 3.49 is loose for A-grade but acceptable. Bear case: Analyst target \$81 below current price signals Street skepticism on growth sustainability; cyclical exposure to hiring freezes. Conviction: Medium.

ENTRY TRIGGER

Close above \$109.42 on volume >140% of 20-day avg (1.82M+ shares)

Target: \$150.00 (analyst target \$149.58; short squeeze could overshoot)

Stop: \$95.00 (consolidation low; accept wide stop for biotech volatility)

CATALYST INTELLIGENCE

EARNINGS

November 11 - Pre-revenue biotech - earnings irrelevant. Focus on clinical data readouts and cash burn. P/E inapplicable; valuation reflects pipeline optionality. Key dates are clinical milestones, not quarterly prints.

BUSINESS & POSITION

Oruka Therapeutics is a clinical-stage biotech developing novel biologics for chronic skin diseases including psoriasis and atopic dermatitis. Pipeline includes differentiated IL-23 and IL-13 antibodies with potential best-in-class profiles. Pre-revenue with \$600M+ cash runway.

FACTOR & THEME

Healthcare sector leading (+4.5% 20d) provides tailwind. Biotech sentiment improving with XBI +12% QTD. GLP-1/obesity adjacency theme: skin conditions improve with weight loss, creating read-through interest. High short interest (17.7%) sets up potential squeeze.

NEWS FLOW

Stock up ~650% from 52-week low signals major positive catalyst already absorbed - likely clinical data or partnership. 17.7% short interest with 6.7 days to cover creates explosive squeeze setup on any incremental positive news. Need to identify next PDUFA or data readout date. Impact: Corporate / High (if data catalyst identified).

INSTITUTIONAL

RS line at 52-week high confirms extreme leadership - rare +65% vs SPY. Vol dry-up present but not strict (vol_w1 vol_w2). Short squeeze potential is the institutional angle here - 17.7% SI is highest in this cohort. Institutional data unavailable. No insider activity.

KEY RISK

Thesis invalid below \$95.00 (recent consolidation support). BINARY BIOTECH RISK: single failed clinical readout would destroy 50%+ of market cap. Pre-revenue, cash-burn business model. Base only 8 days old - needs more time to prove constructive.

RS line at new high (+65% vs SPY) is exceptional leadership. 17.7% short interest creates squeeze fuel. However: base only 8 days old (immature), base_tight 3.7 is loose, vol_dryup_strict false, and binary biotech risk is extreme. Bear case: No identified near-term catalyst; clinical-stage biotech can gap down 50% on any data miss - position sizing must reflect binary risk. Conviction: Low-Medium (structure promising but binary risk caps conviction).

ENTRY TRIGGER
Close above \$145.98 AND above 200-day MA on volume >140% of 20-day avg (1.0M+ shares)
Target: \$160.00 (measured move; prior highs)
Stop: \$138.00 (200-day MA and psychological support)

CATALYST INTELLIGENCE	
EARNINGS	
October 29 - Consensus ~\$1.25 EPS on ~\$720M revenue. Forward P/E 28.3x reflects infrastructure growth premium. 448% earnings growth is base effect - underlying growth mid-teens. Beat history mixed.	
BUSINESS & POSITION	
Arcosa manufactures infrastructure-related products including aggregates, specialty materials, and utility structures (transmission poles, wind towers). Diversified industrial benefiting from grid modernization, renewable buildout, and IJIA infrastructure spending. Niche leader in utility structures.	
FACTOR & THEME	
Direct exposure to US infrastructure spending (IJIA tailwind), grid modernization for AI data centers, and renewable energy (wind tower demand). Reshoring theme as domestic manufacturing capacity expands. Industrials sector +2.1% 20d - in-line with market.	
NEWS FLOW	
Infrastructure spending backdrop supportive - grid upgrades for AI/data center load growth driving utility structure demand. No company-specific news in 60 days. BELOW 200-day MA is technical concern despite base tightness. Impact: Macro / Medium.	
INSTITUTIONAL	
Tightest base in the cohort (1.33) with strong vol contraction - quality accumulation pattern. However, below 200-day MA is a yellow flag; true Stage 2 leaders trade above both moving averages. Low short interest (2%) limits squeeze potential. No insider activity.	
KEY RISK	
Thesis invalid below \$138.00 (200-day MA currently resistance, not support). Trading below 200-day MA disqualifies from true Stage 2 leadership - this is a recovery pattern, not a breakout pattern. 77 days to earnings is extended.	

Tightest base in cohort (1.33) with clean vol dry-up is textbook accumulation. Infrastructure theme provides secular tailwind. HOWEVER: below 200-day MA is significant flaw - not true Stage 2, more of a recovery/reclaim setup. Bear case: Below 200-day MA means institutional momentum buyers may wait for confirmation; 77 days to catalyst. Structure earns B but conviction capped by MA position. Conviction: Medium.

ACA — 90D Base Setup | Pivot: \$145.98 (gold) | SMA: 9(blue) 21(orange) 50(green) 200(red)

Target: \$48.00 (analyst target; measured move supports \$47.50)
Stop: \$42.00 (base low)

CATALYST INTELLIGENCE
EARNINGS
October 27 - Consensus ~\$0.95 EPS. Forward P/E 11.2x reasonable. Earnings growth reported at 9300% is base effect distortion from prior-year one-time charge - normalize to mid-single-digit growth. Solid but not spectacular beat history.
BUSINESS & POSITION
Renasant is a Mississippi-headquartered regional bank with \$18B assets serving the Southeast through community banking, wealth management, and insurance. Niche player with conservative underwriting and strong core deposit franchise in less competitive markets.
FACTOR & THEME
Southeast regional economy exposure - benefits from continued Sun Belt migration and economic growth. Rate-sensitive NIM expansion story. Peer group (regional banks) showing broad technical strength; sentiment recovering but not euphoric.
NEWS FLOW
Quiet news flow - no material announcements in 60 days. Southeast banking market stable. No M&A speculation. Volume contraction only 15.5% - weakest of the regional bank cohort presented. Impact: None identified / Low.
INSTITUTIONAL
Base quality good (tight 1.65) but volume contraction at 15.5% is minimal - less conviction in accumulation pattern. Institutional data unavailable. No insider activity. Float of 89M provides liquidity.
KEY RISK
Thesis invalid below \$42.00 (base low). Weak vol contraction (15.5%) suggests less institutional conviction than peers. No near-term catalyst; 75 days to earnings is extended wait.
