ANALYSIS

CATALYST / TODAY'S DRIVER

Earnings today driving the move; +38.7% 12-week RS vs SPY signals strong underlying momentum into the print. Forward catalyst: if today's report includes raised FY guidance on restaurant demand strength, the October quarter (next print -90 days) becomes the validation event.

BUSINESS & POSITION

Specialty food distributor serving high-end independent restaurants, hotels, and country clubs with premium proteins, imports, and center-of-plate items. Benefits directly from restaurant industry recovery and premium dining trends.

FACTOR & THEME

Pure play on restaurant recovery and food-away-from-home spending. Consumer Staples sector leadership (+5.5% vs SPY this week) and Consumer Defensive positioning provide macro tailwind. Secular beneficiary of premiumization in dining.

BREAKOUT SIGNAL

Close above \$108.12 on vol >232% of 20d avg

INSTITUTIONAL

Volume 2.32x average with a focused 7.9% gain suggests controlled institutional buying into the earnings event. Small float (36.8M) and no insider activity in last 60 days, but RS of +38.7 implies sustained accumulation over 12 weeks.

EARNINGS

EARNINGS TODAY

EARNINGS CONTEXT

Earnings today. The 7.9% gain ahead of/during the print suggests either a pre-release beat or strong initial reaction. Historical beat/miss record not provided, but the RS momentum implies serial execution.

KEY RISK

Thesis invalid on a close back below \$100 (psychological support and prior breakout level), or on any restaurant demand softness or margin compression guidance in today's call.

ANALYSIS

Exceptional 12-week RS of +38.7 and alignment with leading Consumer Staples sector are strong positives. However, base_tight of 3.39 (above VCP ideal) and RS line NOT at new high prevent A-grade. Strongest disconfirming evidence: prox_52w at 96.4% leaves minimal room to the right, and earnings today (not ahead) means the catalyst is being discounted in real-time-risky if the bar was already high. Conviction: Medium.

Signal: Close above \$108.12 on vol >232% of 20d avg

ANALYSIS

CATALYST / TODAY'S DRIVER

Strong 12-week RS of +21.1% and 2.18x volume suggest technical breakout from consolidation. Forward catalyst: October 27 earnings (90 days) where continued gross margin strength in used vehicles and F&I penetration can drive upside; also watch for M&A announcements (dealership roll-up story).

BUSINESS & POSITION

Multi-brand automotive retailer operating ~150+ dealerships across luxury and volume brands. Benefits from tight new vehicle supply, strong used pricing, and high-margin F&I products. Consolidator in fragmented dealership market.

FACTOR & THEME

Consumer discretionary recovery play with exposure to auto sales normalization and consumer credit health. Not a secular theme, but cyclical upswing in auto retail profitability (tight inventory = pricing power).

BREAKOUT SIGNAL

Close above \$252.18 on vol >218% of 20d avg

INSTITUTIONAL

Volume 2.18x average on a 4.65% gain indicates institutional interest, though very small float (16.3M) amplifies moves. No insider buying in last 60 days. RS of +21.1 suggests sustained accumulation, but lack of insider conviction is notable.

EARNINGS

EARNINGS IN 90D

EARNINGS CONTEXT

Next earnings October 27. No recent beat/miss data provided, but the strong RS implies consistent execution. Auto retail EPS can be volatile quarter-to-quarter based on inventory availability and incentive levels.

KEY RISK

Thesis invalid on a close back below \$240 (prior consolidation support), or on any new vehicle inventory surge or used pricing collapse ahead of the October print. Base_tight of 4.94 signals a wide, volatile setup.

ANALYSIS

Strong 12-week RS of +21.1 and volume surge are positives, but base_tight of 4.94 (far above VCP ideal) and RS line NOT at new high disqualify A-grade. Strongest disconfirming evidence: prox_52w at 95.7% with a wide base suggests this is an impulse move into overbought territory, not a controlled breakout. Small float can amplify downside as easily as upside. Conviction: Medium.

Signal: Close above \$252.18 on vol >218% of 20d avg

Vol vs Avg: 2.18x

RUSHA

Rush Enterprises, Inc.

Vol vs Avg	1.96x
RS Line Hi	no
Above 50MA	-
Fwd P/E	-
Short %	-
Days to Cover	-
Inst. Own	-(data lag)

ANALYSIS

CATALYST / TODAY'S DRIVER

Volume 1.96x and +3.98% move suggest technical breakout, likely on improving commercial truck demand or parts/service margin strength. Forward catalyst: October 28 earnings (91 days) where Class 8 truck orders and aftermarket parts growth will be key metrics.

BUSINESS & POSITION

Leading commercial truck dealership network (primarily Peterbilt) with heavy exposure to Class 8 trucks, parts, and service. Benefits from trucking fleet replacement cycles and high-margin aftermarket service.

FACTOR & THEME

Cyclical play on commercial transportation recovery and freight demand. Not a secular theme, but tied to industrial production, e-commerce logistics, and freight rates. No direct exposure to leading sectors (Energy, Staples, Healthcare).

BREAKOUT SIGNAL

Close above \$81.96 on vol >196% of 20d avg

INSTITUTIONAL

Volume 1.96x average on a 3.98% gain is solid but not explosive. Moderate float (68.4M) and no insider buying in last 60 days. RS of +10.0 is positive but not exceptional-suggests early-stage accumulation, not a crowded trade.

EARNINGS

EARNINGS IN 91D

EARNINGS CONTEXT

Next earnings October 28. No recent beat/miss data provided. Commercial truck cycle is multi-quarter, so a single-quarter beat may not re-rate the stock unless accompanied by full-year guidance raise.

KEY RISK

Thesis invalid on a close back below \$79 (prior consolidation support), or on any Class 8 order weakness or freight recession indicators ahead of the October print. Prox_52w at 98.2% leaves minimal upside room.

ANALYSIS

Solid 12-week RS of +10.0 and technical breakout near 52W highs are positives, but base_tight of 2.93 (above VCP ideal) and RS line NOT at new high prevent A-grade. Strongest disconfirming evidence: prox_52w at 98.2% with 91 days to next earnings means limited catalyst path and no room to run. Mixed macro regime reduces conviction. Conviction: Medium.

Signal: Close above \$81.96 on vol >196% of 20d avg

Analysis
Catalyst / Today's Driver Earnings today driving the move; +12% RS vs SPY and tight base (1.8) suggest strong setup into the print. Forward catalyst: if today's report includes raised FY guidance on RFID adoption (retail inventory, supply chain), the next quarter becomes the validation event. Also watch for design wins with major retailers or logistics providers.
Business & Position Leading provider of RAIN RFID solutions (chips, readers, software) for item-level inventory tracking in retail, logistics, healthcare, and industrial IoT. Secular beneficiary of supply chain digitization and real-time inventory visibility trends.
Factor & Theme IoT infrastructure and supply chain digitization theme, with exposure to retail tech spending and logistics automation. Not in a leading sector (Technology is neutral), but RFID adoption is a multi-year secular tailwind. Indirect AI/edge computing exposure via real-time data processing.
Breakout Signal Close above \$139.47 on vol >163% of 20d avg
Institutional Volume 1.63x average on a 4.84% gain is solid, and small float (29.5M) amplifies moves. Base_tight of 1.8 (near VCP ideal) suggests controlled accumulation. No insider buying in last 60 days. RS of +12.0 is positive but not exceptional.
Earnings Earnings Today
Earnings Context Earnings today. The 4.84% gain suggests either a pre-release beat or strong initial reaction. Prox_52w at only 56.5% indicates this is recovering from a prior drawdown, not at highs-provides room to run if the print is strong.
Key Risk Thesis invalid on a close back below \$133 (base support and 20MA), or on any RFID demand softness or competitive pressure (e.g., from NXP or Alien) in today's call. Prox_52w at 56.5% means this is mid-recovery, not a breakout-requires strong guidance to extend.
Analysis Base_tight of 1.8 (textbook VCP) and +12% RS vs SPY are solid positives. Prox_52w at only 56.5% provides runway to the upside if earnings are strong. However, RS line NOT at new high and earnings today (not ahead) mean the catalyst is being discounted in real-time-risky if the bar was already high. Strongest disconfirming evidence: mixed macro regime and lack of insider buying reduce conviction. Conviction: Medium.
Signal: Close above \$139.47 on vol >163% of 20d avg Vol vs Avg: 1.63x
