Target: $120.00 - measured move based on ~10% base projection; analyst consensus at $126.86

Stop: $99.00 - base low invalidation

CATALYST INTELLIGENCE

EARNINGS

Nov 18 - Q4 FY26 earnings in 8 days - HIGH IMPACT catalyst. Street expects ~$1.52 EPS on ~$670M revenue. Forward P/E of 17.1x with PEG of 0.54 suggests reasonable valuation for growth. Beat/miss history: 3/4 beats on EPS last year. Guidance has been maintained.

BUSINESS & POSITION

Griffon operates two segments: Home & Building Products (AMES tools, ClosetMaid storage) and Consumer & Professional Products (garage doors via Clopay). The company is a niche leader in residential garage doors (#1 US share) and a major player in long-handled tools. TAM is tied to US housing activity and repair/remodel spending.

FACTOR & THEME

Exposure to housing recovery and consumer home improvement spend. Consumer Discretionary sector is leading (+8.6% 20d) - direct tailwind. Reshoring theme via domestic manufacturing provides margin support. Beta of 1.44 means amplified moves in risk-on environments.

NEWS FLOW

No major announcements in last 60 days. Housing starts data and existing home sales have shown stabilization. Catalyst impact: Earnings (High) in 8 days creates binary event risk but also the catalyst the setup needs. Analyst target of $126.86 implies 22% upside.

INSTITUTIONAL

Volume contraction from 362K 313K 287K weekly confirms accumulation into the earnings event. No insider activity in last 60 days. Tight float (42.3M) with modest short interest (5.0%, 3.7 days) creates favorable supply/demand dynamics on breakout.

KEY RISK

Thesis invalid on close below $99.00 (base low), or on Q4 miss/guidance cut given housing market sensitivity and 1,035% debt/equity requiring consistent cash flow.

Textbook VCP coil with strict volume contraction, RS line at new highs, and a HIGH IMPACT earnings catalyst in 8 days. Base tightness at 4.8% is excellent. Consumer Discretionary leadership (+8.6%) provides sector tailwind. The positioning is clean: 4.4% to pivot with clear trigger and stop levels. Strongest disconfirming argument: RS vs SPY is only +2.1% - this is not a relative strength leader, merely keeping pace; in a mixed regime, laggards can fail even with good setups. High leverage (1,035% D/E) creates downside acceleration risk on any miss. Conviction: High.

Target: $54.00 - measured move based on 17% base depth added to pivot

Stop: $42.50 - base low invalidation

CATALYST INTELLIGENCE

EARNINGS

Dec 08 - Street expects ~$0.24 EPS on ~$165M revenue. Beat history is strong: 4/4 quarters beat on EPS, 3/4 on revenue. Guidance trend has been maintained. Revenue growth +26% YoY remains best-in-class for mid-cap SaaS.

BUSINESS & POSITION

Braze operates a cloud-based customer engagement platform enabling brands to orchestrate personalized, cross-channel messaging (push, email, SMS, in-app) using real-time data and AI. The company is a category leader in the customer engagement space, competing with Salesforce Marketing Cloud and Adobe, but differentiated by its real-time data streaming architecture and developer-first approach.

FACTOR & THEME

Exposure to enterprise SaaS spending recovery and AI-driven marketing automation adoption. Theme sentiment is neutral-to-positive as enterprise software stabilizes post-2025 correction; peer Klaviyo's recent strength (+18% QTD) suggests category tailwind.

NEWS FLOW

No major contract wins or partnerships in the last 60 days. Company presented at Dreamforce in September; no material announcements. Catalyst impact: Earnings (High) in 28 days is the primary forward event - setup needs to trigger before then or position sizing must account for binary risk.

INSTITUTIONAL

Volume contraction from 11.8M to 6.8M weekly confirms quiet accumulation; price holding at 52W highs during this dry-up is textbook institutional behavior. No insider activity in last 60 days - baseline expectation. Institutional ownership data unavailable from this feed. Short interest at 8.3% (4.2 days to cover) creates modest squeeze potential on breakout.

KEY RISK

Thesis invalid on a daily close below $42.50 (base low / -8% from pivot), or if Q3 guidance disappoints given the 47x forward P/E premium requiring durable 25%+ growth.

Exceptional RS (+58% vs SPY) and textbook volume dry-up with price 0.2% from pivot. However, base_tight at 32% is extremely loose - this is a high-level consolidation after a massive run, not a tight VCP coil. The structural quality is compromised despite the proximity to highs. Technology sector is lagging (-11.3% 20d), creating macro headwind. Strongest disconfirming argument: a 3x YTD run with 47x forward P/E in a tech-lagging tape means the easy money is made; incremental buyers may wait for earnings clarity. Conviction: Medium.

Close above $105.65 on volume >180% of 20-day avg (880K shares)

Target: $116.00 - measured move based on ~10% base depth projection

Stop: $96.50 - base low and 50-day MA support zone

CATALYST INTELLIGENCE

EARNINGS

Jan 28 - Street expects ~$2.25 EPS. Trailing P/E of 12.4x with PEG of 0.28 suggests significant undervaluation relative to 14% earnings growth. Beat history: consistent performer but no standout beats. Next catalyst is 79 days out - no near-term earnings event.

BUSINESS & POSITION

Selective Insurance is a super-regional P&C insurer focused on commercial lines (small-to-mid business) and personal lines in 26 Eastern/Midwestern states. Category position is strong regional player with disciplined underwriting; not a national leader but a consistent compounder with 14.7% ROE.

FACTOR & THEME

Direct beneficiary of the P&C hard market cycle with sustained premium rate increases. Financial Services sector is neutral in current regime; Healthcare and Consumer Discretionary lead. Low beta (0.21) provides defensive positioning in mixed/transitional market.

NEWS FLOW

No material news in last 60 days. P&C industry continues to benefit from hardening rates; peers like CNA and Travelers have confirmed pricing power. Catalyst impact: Industry (Med) - sector tailwind is steady but no company-specific catalyst imminent. Russell rebalance risk minimal for $6B market cap.

INSTITUTIONAL

Textbook volume stair-step contraction (676K 584K 544K) with price holding near highs indicates quiet institutional accumulation. No insider activity in last 60 days. Float is tight at 55M shares; low average volume (490K) means any institutional demand creates outsized price impact.

KEY RISK

Thesis invalid on close below $96.50 (base low / -9% from current), or if catastrophe losses spike in Q4 (hurricane/wildfire season) compressing combined ratios.

Clean volume contraction across three weeks with RS line at new highs - structural quality is solid. Base tightness at 6.77% is acceptable for insurance names which trade with lower volatility. The challenge: 79 days to next earnings and no identifiable near-term catalyst makes this a patience trade. The strongest disconfirming argument is the lack of catalyst urgency - being early without a trigger is dead money in a mixed regime. Healthcare leads (+8.6%), not Financials. Conviction: Medium.

Target: $65.00 - measured move based on post-earnings base depth; analyst target at $56.75 is stale

Stop: $55.00 - base low and psychological support

CATALYST INTELLIGENCE

EARNINGS

Earnings reported Oct 29 - post-event. Last quarter showed 615% earnings growth (low base effect). Forward P/E of 11.2x with 16.9% ROE indicates quality value. No near-term earnings catalyst.

BUSINESS & POSITION

CNO Financial provides life insurance, annuities, and supplemental health products targeting middle-income Americans approaching or in retirement through its Bankers Life, Washington National, and Colonial Penn brands. Niche leader in the underserved middle-market segment with direct-to-consumer distribution.

FACTOR & THEME

Secular exposure to aging US demographics and rising demand for retirement/supplemental health products. Healthcare sector leadership (+8.6% 20d) provides indirect tailwind as health-adjacent financials benefit. Low correlation to rate cycle given product mix.

NEWS FLOW

Just reported Q3 on Oct 29 (12 days ago) - likely the catalyst for recent strength. No material news since. Short interest data unavailable. Catalyst impact: Post-earnings drift (Med) - momentum continuation possible but primary catalyst has passed.

INSTITUTIONAL

Volume contraction from 1.05M 830K 799K weekly shows continued accumulation post-earnings. No insider activity in last 60 days. Institutional ownership data unavailable from this feed.

KEY RISK

Thesis invalid on close below $55.00 (base low / 50-day MA zone), or on any regulatory changes to Medicare supplement products impacting Colonial Penn.

Clean VCP structure post-earnings with RS line at new highs and solid volume contraction. Base tightness at 4.08% is excellent. However, the primary catalyst (Q3 earnings) has already occurred - this is a post-earnings continuation setup without a clear forward catalyst for 70+ days. Strongest disconfirming argument: 615% earnings growth was from a depressed base; sustainable growth is likely in the 10-15% range, making current valuation less compelling. Mixed regime reduces conviction for momentum continuation without fresh news. Conviction: Medium.

Stop: $169.00 - base low invalidation

CATALYST INTELLIGENCE

EARNINGS

Jan 19 - Street expects ~$3.41 EPS. Forward P/E of 12.9x is reasonable for community bank growth. 69% revenue growth reflects M&A contribution; organic growth likely mid-single digits. Next catalyst 70 days out.

BUSINESS & POSITION

Nicolet Bankshares is a community bank holding company operating primarily in Wisconsin, Michigan, and Minnesota with ~$8B in assets. Growth strategy combines organic expansion with M&A; recent 69% revenue growth reflects acquisition integration. Niche player in agricultural and commercial lending.

FACTOR & THEME

Exposure to regional bank recovery theme post-2023 crisis. Financial Services sector is neutral in current regime. Small-cap leadership (IWM +3.4% vs SPY -2.6%) provides tailwind for SMID banks. Low beta (0.67) offers relative stability.

NEWS FLOW

No material news in last 60 days. Regional bank sentiment has improved with rate stabilization. Short interest at 5.5% (6.6 days to cover) is elevated for a community bank - potential short squeeze on continued strength. Catalyst impact: Industry (Low) - no specific catalyst identified.

INSTITUTIONAL

Volume contraction from 199K 157K 127K is textbook stair-step dry-up. Extremely tight float (19.7M shares) with thin average volume (160K) creates significant price impact on any institutional demand. No insider activity in last 60 days.

KEY RISK

Thesis invalid on close below $169.00 (base low), or on any credit quality deterioration in CRE/agricultural loan books typical of Midwest community banks.

Excellent structural VCP quality: strict volume contraction, tight base (3.31%), RS line at new highs. Float dynamics are favorable with only 19.7M shares and thin daily volume. Small-cap leadership in the current regime is a tailwind. However, RS vs SPY is only +2.1% - not a relative strength leader. Strongest disconfirming argument: 70 days to next earnings with no identifiable near-term catalyst; community bank without M&A news is dead money in a mixed regime. Elevated short interest could cut both ways. Conviction: Medium.

CATALYST INTELLIGENCE

EARNINGS

Earnings reported Nov 03 (7 days ago) - post-event. Revenue growth +17.3% with ongoing losses as SaaS transition investment continues. Forward P/E of 115x reflects growth-stage premium; P/S of 7.9x is more relevant. No near-term earnings catalyst.

BUSINESS & POSITION

Varonis provides data security software that detects insider threats, cyberattacks, and ensures data governance compliance by analyzing user behavior and data access patterns. The company is transitioning from perpetual licenses to SaaS subscription model, positioning as a leader in data-centric security.

FACTOR & THEME

Direct exposure to secular cybersecurity spend and regulatory-driven data governance requirements (GDPR, CCPA). Theme sentiment remains positive despite tech sector weakness (-11.3% 20d). SaaS transition creates near-term margin pressure but long-term revenue quality improvement.

NEWS FLOW

Just reported Q3 on Nov 03. One insider buy of $26K in last 60 days - small size by a non-senior officer; noted but does not warrant grade upgrade. Catalyst impact: Post-earnings (Med) - setup is building on fresh results. Short interest at 5.3% is moderate.

INSTITUTIONAL

Minor insider buying ($26K, 1 purchase, non-senior) - a positive signal but insufficient size/seniority for conviction upgrade. Volume contraction is present but vol_w2 > vol_w1 (not strict stair-step). Post-earnings consolidation with RS line at new highs suggests buyers are absorbing supply.

KEY RISK

Thesis invalid on close below $46.50 (base low), or if SaaS transition elongates and cash burn accelerates - current 121% debt/equity and negative margins create dilution risk.

Price 0.3% from pivot with RS line at new highs post-earnings - structural positioning is excellent. Cybersecurity theme remains investable despite tech sector weakness. Minor insider buy is a positive but insufficient for grade upgrade (low dollar value, non-C-suite). However, volume dry-up is not strict (vol_w2 > vol_w1), and Technology sector is the worst performer (-11.3%). Strongest disconfirming argument: 115x forward P/E in the worst-performing sector with ongoing losses makes this a momentum-dependent trade; any risk-off rotation hits this name hard. Conviction: Medium.

Target: $61.00 - measured move to base depth projection

Stop: $52.50 - base low invalidation

CATALYST INTELLIGENCE

EARNINGS

Dec 16

Volume dry-up is soft (vol_w3 < vol_w1 but vol_w2 > vol_w3 - not strict stair-step). Base quality is acceptable but not textbook. RS line at new highs is positive but setup needs another week of tightening. Earnings in 36 days provides eventual catalyst. Conviction: Low.

EARNINGS

Jan 21

Elevated short interest (12.0%, 8.8 days to cover) creates squeeze potential but also reflects fundamental skepticism. Pivot is 5.1% away - not imminent. RS is only +5.6% vs SPY; small-cap leadership helps but crypto-adjacent business model adds volatility. No catalyst for 72 days. Conviction: Low.

RS line is NOT at new highs despite +29.8% vs SPY - structural flaw. Pivot is 5.5% away with earnings in 21 days. High short interest (15.8%, 6.7 days) cuts both ways. Technology sector lagging (-11.3%) is headwind. Needs RS line to confirm before promotion. Conviction: Low.

CATALYST INTELLIGENCE

EARNINGS

Jan 26

Volume dry-up is not strict (vol_w1 > vol_w2 slightly). RS line at new highs and cybersecurity theme are positives, but Technology sector lagging and 77 days to earnings means no near-term catalyst. PEG of 3.17 suggests valuation is stretched. Watch for volume to tighten. Conviction: Low.

CATALYST INTELLIGENCE

EARNINGS

Jan 27

RS line is NOT at new highs (prox_52w only 87.9%) - this is a pullback consolidation, not a breakout coil. Volume dry-up is confirmed but base tightness at 6.23% is loose. No catalyst for 78 days. Basic Materials sector is neutral. Needs to reclaim prior highs before consideration. Conviction: Low.
