ANALYSIS
CATALYST / TODAY'S DRIVER
Massive +117% relative strength over 3 months suggests a fundamental re-rating (likely from improved transplant surveillance reimbursement or clinical guideline adoption). Forward catalyst: Nov 3 earnings where mgmt can update on AlloSure test volume growth and Medicare coverage expansion.
BUSINESS & POSITION
CareDx is the leader in transplant diagnostics, offering non-invasive molecular testing (AlloSure, AlloMap) to detect organ rejection. Competitive moat stems from first-mover advantage, IP around cell-free DNA, and sticky hospital relationships in a high-barrier-to-entry niche.
FACTOR & THEME
Pure-play on transplant medicine, a small but high-value market with 40,000+ annual solid organ transplants in the U.S. Secular tailwind from shift to precision diagnostics and value-based care, though CMS reimbursement remains binary risk.
BREAKOUT SIGNAL
Close above \$63.68 on vol >193% of 20d avg
INSTITUTIONAL
Volume 1.93x is elevated but not explosive. RS line at new high signals institutional validation of the 4x move from \$13 lows. No insider buying last 60 days - notable absence given the magnitude of the run. Float 49.5M allows for institutional block accumulation.
EARNINGS
EARNINGS IN 37D
EARNINGS CONTEXT
Nov 3 earnings (37 days) is critical. Company is unprofitable but revenue growth and path to EBITDA breakeven will drive re-rating. Beat history and consensus data not provided, but forward P/S and test volume trajectory are key metrics to watch.
KEY RISK
Thesis invalid on close below \$60 (round number and recent base support), or any negative CMS coverage decision or reimbursement cut announced ahead of/at Nov 3 print. Stock has run 4x - incremental positive news is fully priced unless beat-and-raise is substantial.
ANALYSIS
RS line new high + extreme RS +113 vs SPY + prox 97.7% + Nov 3 catalyst justify A despite wide base (4.18). Disconfirming evidence: already up 4x from lows, no insider buying, Healthcare is lagging sector this week (-0.4%), and stock is near full valuation on a hope-driven run. High risk/reward but technically qualified. Conviction: Medium.
Signal: Close above \$63.68 on vol >193% of 20d avg
Vol vs Avg: 1.93x

Analysis
Catalyst / Today's Driver Insider cluster detected: 2 buys, 1 C-suite, \$110K total in last 60 days signals management conviction at current levels. Forward catalyst: Nov 5 earnings where HVAC demand (data center cooling, commercial construction) can drive upside surprise. GRADE UPGRADE APPLIED: insider_cluster 7 in risk-on regime upgrades B A.
Business & Position AAON manufactures premium commercial HVAC equipment, with differentiation in custom air handlers and rooftop units for data centers, schools, and hospitals. Niche player with engineering-led sales model and higher margins than commoditized peers.
Factor & Theme Exposed to data center buildout (AI infrastructure cooling demand) and commercial construction recovery. However, HVAC is cyclical and sensitive to interest rates - any thesis depends on infrastructure spending and nearshoring factory builds offsetting rate headwinds.
Breakout Signal Close above \$89.10 on vol >173% of 20d avg
Institutional Insider cluster of 7 (2 buys, 1 senior, \$110K) is material for a \$7B company - management is stepping in after a -40% drawdown from highs. Volume 1.73x is solid. RS -33% is deeply negative, so this is a fallen angel attempting a bottom, not a leader. Upgrade to A based on insider conviction rule.
Earnings EARNINGS IN 39D
Earnings Context Nov 5 earnings (39 days). Company likely facing order headwinds from rate-sensitive commercial construction, so any beat or stabilization commentary would be catalyst. Watch for data center vertical traction and backlog trends.
Key Risk Thesis invalid on close below \$85 (recent support) or if Nov 5 earnings show continued order deterioration and guide down for 2027. Stock is 40% off highs - insider buying is a signal but not a guarantee of near-term inflection.
Analysis GRADE UPGRADED B A due to insider_cluster 7 in risk-on regime. Disconfirming evidence: RS -33% is severely negative, prox 59% is far from highs, and Industrials are not leading. This is a contrarian/value play on insider conviction and data center optionality, not a momentum breakout. Conviction: Medium (upgrade is mechanical per rule, not conviction-based).
Signal: Close above \$89.10 on vol >173% of 20d avg Vol vs Avg: 1.73x

ANALYSIS
CATALYST / TODAY'S DRIVER
Insider cluster detected: 2 buys, 1 C-suite, \$1.7M total in last 60 days - this is substantial (\$1.7M is top-decile for size). Forward catalyst: Nov 9 earnings where mgmt can update on master-planned community sales, Seaport progress, and Las Vegas development monetization. GRADE UPGRADE APPLIED: insider_cluster 12 in risk-on regime upgrades B A.
BUSINESS & POSITION
Howard Hughes develops and manages large-scale master-planned communities (Summerlin in Las Vegas, Bridgeland in Houston, Ward Village in Honolulu) and mixed-use properties (Seaport in NYC). Long-duration NAV story with episodic asset sales and development milestones.
FACTOR & THEME
Levered to Sunbelt migration (Las Vegas, Houston, Phoenix communities), luxury condo demand (Hawaii), and NYC real estate recovery (Seaport). Secular tailwinds from housing shortage and experiential retail, but highly rate-sensitive and illiquid.
BREAKOUT SIGNAL
Close above \$68.43 on vol >159% of 20d avg
INSTITUTIONAL
Insider cluster of 12 with \$1.7M is elite conviction - one of the strongest insider signals in this entire dataset. Volume 1.59x is modest, suggesting quiet accumulation. Float 30.5M is manageable. RS -9.5% shows weakness, but insider buying at these levels suggests management sees deep value.
EARNINGS
EARNINGS IN 43D
EARNINGS CONTEXT
Nov 9 earnings (43 days). Real estate developers report NOI, asset sales, and development pipeline rather than traditional EPS. Watch for Summerlin lot sales velocity, Seaport leasing progress, and any Ward Village condo presale announcements.
KEY RISK
Thesis invalid on close below \$65 (round number support) or if Nov 9 earnings show stalled land sales or weak Seaport leasing, signaling macro real estate headwinds are worsening. Illiquid stock with wide spreads - execution risk is high.
ANALYSIS
GRADE UPGRADED B A due to insider_cluster 12 (\$1.7M, C-suite) in risk-on regime. Disconfirming evidence: RS -9.5%, prox 75%, Real Estate is out-of-favor, and macro (rates) is headwind. This is purely an insider-conviction play - \$1.7M of open-market buys is a rare, high-conviction signal that overrides weak technicals. Conviction: Medium (upgrade is rule-based; true conviction requires Nov 9 validation).
Signal: Close above \$68.43 on vol >159% of 20d avg
Vol vs Avg: 1.59x

Farm & Heavy Construction Machinery | Theme: Freight Equipment | 52W Hi: 90% | Base Tight: 1.94 | Vol: 1.69x | RS/SPY: -9.0% | Above 20MA: YES | EARNINGS IN 39D

ANALYSIS

CATALYST / TODAY'S DRIVER

Strong +11% breakout move on heavy volume (likely logistics/freight equipment order optimism or a contract win not yet disclosed). Forward catalyst: Nov 5 earnings where mgmt can address trailer order backlog and pricing in a freight recovery scenario.

BUSINESS & POSITION

Wabash National manufactures semi-trailers, truck bodies, and engineered products for transportation/logistics. Competitive position is mid-tier in a cyclical, commoditized industry - differentiation via composite materials and fuel-efficient designs.

FACTOR & THEME

Exposed to freight cycle recovery and potential reshoring tailwinds (domestic manufacturing of transport equipment). However, trucking/freight remains under pressure in 2026 macro; any thesis relies on early-cycle positioning ahead of inventory restocking.

BREAKOUT SIGNAL

Close above \$13.03 on vol >169% of 20d avg

INSTITUTIONAL

Volume only 1.69x is below institutional breakout threshold (2x+ preferred). Base_tight 1.94 is textbook VCP - this is a technically clean coil. No insider buying last 60 days. RS vs SPY is negative (-9%), so this is a laggard trying to catch up, not a leader.

EARNINGS

EARNINGS IN 39D

EARNINGS CONTEXT

Nov 5 earnings (39 days). Consensus and beat history not provided. Company is likely cyclically depressed, so any guide raise on trailer demand would be catalyst. Watch for order backlog and ASP commentary.

KEY RISK

Thesis invalid on close back below \$12.50 (prior pivot) or if Nov 5 earnings show continued order weakness and guide down. Freight macro remains challenged - any truck/trailer OEM is swimming upstream in this cycle.

ANALYSIS

Base_tight 1.94 + prox 90% + volume breakout are strong, but RS -9% and negative 3m RS disqualify from A-grade. This is a cyclical value play, not a momentum leader. Nov 5 earnings could extend if freight optimism builds, but macro is headwind. Conviction: Low-Medium.

Signal: Close above \$13.03 on vol >169% of 20d avg

Vol vs Avg: 1.69x

Above 50MA	-
Fwd P/E	-
Short %	-
Days to Cover	-
Inst. Own	- (data lag)

ANALYSIS

CATALYST / TODAY'S DRIVER

Textbook VCP breakout (base_tight 1.43) from a tight 10-day coil, likely accumulation ahead of Oct 27 earnings. Forward catalyst: Oct 27 print where VITAS hospice segment can demonstrate census growth and margin expansion despite Medicare rate pressures.

BUSINESS & POSITION

Chemed operates two businesses: VITAS (largest U.S. hospice provider) and Roto-Rooter (plumbing/drain services). Hospice is 70%+ of profit, a defensive, non-discretionary healthcare service with Medicare reimbursement tailwinds as Baby Boomers age.

FACTOR & THEME

Secular tailwind from aging demographics (hospice utilization grows ~3-5% annually). Defensive healthcare exposure with recurring revenue model. Roto-Rooter provides diversification but is economically sensitive (housing turnover).

BREAKOUT SIGNAL

Close above \$512.16 on vol >151% of 20d avg

INSTITUTIONAL

Volume 1.51x is modest but base_tight 1.43 is elite - classic silent-build pattern where institutions absorb supply without spiking volume. Tiny 11.8M float allows for tight control. No insider buying last 60d. RS +7.2% vs SPY is solid but not explosive.

EARNINGS

EARNINGS IN 30D

EARNINGS CONTEXT

Oct 27 earnings (30 days). Company historically beats and raises - hospice is predictable, high-visibility business. Consensus EPS/rev not provided, but watch for VITAS admissions growth and any Roto-Rooter cyclical commentary.

KEY RISK

Thesis invalid on close below \$500 (round number and base support), or if Oct 27 earnings miss on hospice census or guide below Street on Medicare rate cuts. VCP setups fail fast when they break pivot.

ANALYSIS

Elite base_tight 1.43 + prox 91.9% + Oct 27 catalyst are strong. RS line not at new high and volume only 1.51x keep this B-grade. Disconfirming evidence: Healthcare lagging this week, stock below 50MA recently, and small-cap headwind in current regime. Defensive, high-quality name but lacks explosive setup. Conviction: Medium.

Signal: Close above \$512.16 on vol >151% of 20d avg

Vol vs Avg: 1.51x
