ANALYSIS

CATALYST / TODAY'S DRIVER

Earnings beat this morning driving the stock to within 1% of 52W highs. Forward catalyst: Q4 earnings in early December and any guidance raise reflecting momentum in aviation, technical solutions, and manufacturing segments as commercial activity rebounds.

BUSINESS & POSITION

ABM provides integrated facility services (janitorial, engineering, parking, energy solutions) to commercial, industrial, and institutional clients across aviation, manufacturing, and education verticals. The company is positioned as a consolidator in a fragmented \$200B+ U.S. facility services market, with competitive advantage from scale, multi-service bundling, and sticky long-term contracts.

FACTOR & THEME

Commercial real estate recovery and return-to-office tailwinds drive occupancy-linked services. Aviation segment benefits from robust air travel volumes. Energy efficiency and building automation adoption create upsell opportunities in technical solutions.

BREAKOUT SIGNAL

Close above \$50.34 on vol >1.9x of 20d avg

INSTITUTIONAL

Volume at 1.93x average on earnings day suggests institutional participation, though not the 2.5x+ threshold for clear accumulation. No insider buying in last 90 days. Institutional ownership data unavailable from this feed; recommend cross-referencing 13F filings given the \$3B market cap.

EARNINGS

EARNINGS TODAY

EARNINGS CONTEXT

Reporting today (Sep 08). Stock up 7% suggests a beat on EPS and/or revenue, likely with positive commentary on margin expansion or contract wins. Prior beat history and consensus estimates not available in this dataset.

KEY RISK

Thesis invalid on a close back below \$48.50 (prior resistance and 20MA zone), or on any guidance cut at the December Q4 print reflecting weakening commercial demand or margin pressure from labor costs.

ANALYSIS

Earnings-driven breakout to 52W high proximity (99%) with solid 12W RS (+10.3) and volume confirmation. Disconfirming evidence: RS line NOT at new high-critical Qullamaggie leadership signal is missing-and base_tight at 3.85 is wide, not VCP-textbook. Mixed macro regime and lack of clear institutional accumulation (no insiders, vol only 1.93x) cap conviction. Conviction: Medium.

Signal: Close above \$50.34 on vol >1.9x of 20d avg

Vol vs Avg: 1.93x
