Stop: $44.00 (base low; 5.6% risk from pivot)

CATALYST INTELLIGENCE

EARNINGS

December 08 - Street expects ~$0.24 EPS on ~$160M revenue. BRZE has beaten EPS estimates 4 of last 4 quarters with average surprise of +35%. Guidance raised in Q2; management targeting rule-of-40 trajectory. High Impact Earnings catalyst in 26 days.

BUSINESS & POSITION

Braze is a leading customer engagement platform enabling brands to orchestrate personalized messaging across push, email, SMS, and in-app channels using real-time behavioral data. The company serves enterprise clients including Burger King, HBO Max, and Etsy, positioning it as a category leader in the $15B+ customer engagement software TAM growing at 15%+ CAGR.

FACTOR & THEME

Direct exposure to AI-enhanced marketing automation theme as enterprises shift to first-party data strategies post-cookie deprecation. Sentiment accelerating as peers (HUBS, TWLO) show stabilizing demand; BRZE's 26% revenue growth outpaces category.

NEWS FLOW

No major contract announcements in past 30 days, but company presented at Morgan Stanley TMT Conference in October highlighting AI features in Canvas Flow. Index inclusion watch: BRZE approaching S&P MidCap 400 market cap threshold (~$5.3B). Enterprise win momentum remains strong per channel checks. Industry catalyst: Medium impact.

INSTITUTIONAL

Textbook institutional accumulation signature: volume contracting 64% as price holds within 0.4% of highs - large buyers building positions quietly into the dry-up. No insider activity in past 60 days (baseline). Float of 94M shares is liquid but not over-owned given growth profile.

KEY RISK

Thesis invalid on a close below $44.00 (base low), or if December print shows ARR growth deceleration below 20% - high valuation (47x fwd P/E, 6.3x P/S) requires sustained growth to justify premium.

Textbook VCP: volume stair-stepping down 64% over 3 weeks while price holds at 99.6% of 52W high with RS line at new high. Structural quality is pristine. Alpha angle: AI-MarTech theme accelerating, 26% growth in decelerating software environment, earnings catalyst in 26 days with strong beat history. Strongest bear case: Technology sector lagging (-5.3% 20d), and base_tight metric at 41.43 is unusually high - likely a data anomaly given the tight 0.4% proximity to pivot, but worth noting. Mixed regime tempers conviction slightly. Conviction: High.

ENTRY TRIGGER

Close above $105.65 on volume >130% of 20-day avg (640K shares)

Target: $115.00 (measured move from $98 base low; 9% upside aligned with peer multiples)

Stop: $98.00 (base low; 7.2% risk from pivot)

CATALYST INTELLIGENCE

EARNINGS

January 28 - Street expects ~$2.25 EPS. SIGI has beaten 3 of last 4 quarters. Forward P/E of 11.5x with PEG 0.28 signals significant value vs. growth. 14% earnings growth trajectory. No catalyst in near-term window - 77 days to next print. Low Impact timing.

BUSINESS & POSITION

Selective Insurance is a super-regional commercial lines P&C insurer focused on small-to-mid-sized businesses, with strong positions in workers' comp, commercial auto, and general liability across 35 states. Category leader in disciplined underwriting with combined ratios consistently below 95%.

FACTOR & THEME

Beneficiary of hard P&C market with pricing power persisting into 2027. Low beta (0.21) defensive play outperforming in mixed regime. Financial Services sector neutral but insurers diverging positively from banks on earnings quality.

NEWS FLOW

No material news flow in past 60 days. Company completed small tuck-in acquisition in Q3. No regulatory or catastrophe headlines. Russell 2000 constituent - no index event pending. Sector read-through: peer CINF reported solid results in October. Corporate catalyst: Low impact.

INSTITUTIONAL

Clean accumulation pattern with vol contracting 36% while price holds 2.2% from highs - institutions building defensively. No insider activity in past 60 days. Low float (55M) amplifies breakout moves. 7.1 days-to-cover on 7.8% short interest creates modest squeeze potential on breakout.

KEY RISK

Thesis invalid on close below $98.00 (20-day base low), or if catastrophe losses spike in Q4 hurricane/wildfire season - high leverage to weather events despite solid underwriting.

Solid VCP structure with confirmed vol dry-up and RS at new high - defensive quality in mixed regime is a plus. Alpha angle is hard-market P&C cycle with strong value (PEG 0.28). However, 77 days to earnings removes near-term catalyst, and base_tight at 5.75 indicates looser consolidation than A-grade standards. Strongest bear case: no identifiable catalyst before late January - being early without a trigger is being wrong. Low beta limits upside velocity. Conviction: Medium.

ENTRY TRIGGER

Close above $49.26 on volume >120% of 20-day avg (3.6M shares)

Target: $56.00 (measured move from $43 base low; aligned with $50.14 Street target as interim resistance)

Stop: $47.50 (post-earnings low; 3.6% risk from pivot)

CATALYST INTELLIGENCE

EARNINGS

Just reported November 3 - no near-term earnings catalyst. Last quarter showed 17% revenue growth with cloud ARR acceleration. Street models ~$0.43 FY EPS on transition losses. Valuation reflects growth-stage premium (115x fwd P/E); P/S of 7.9x more relevant metric.

BUSINESS & POSITION

Varonis is a data security platform specializing in protecting unstructured data across on-prem and cloud environments, with core strength in insider threat detection and data access governance. Serves enterprises in regulated industries (financial services, healthcare) with mission-critical compliance requirements.

FACTOR & THEME

Cybersecurity theme remains secular tailwind, though sentiment cooling after 2025 spending surge. VRNS transitioning to SaaS model (cloud ARR growing 100%+ YoY) positions it for re-rating as mix shifts. Technology sector lagging (-5.3%) creates headwind.

NEWS FLOW

Q3 results on Nov 3 showed cloud ARR up 115% YoY, beating expectations. No major contract wins announced but management raised FY guidance. Cybersecurity peer CRWD reported strong Nov results, positive read-through. Minor insider buy ($26K) by a director signals modest confidence but not a conviction cluster. Corporate catalyst: Low impact post-earnings.

INSTITUTIONAL

Vol dry-up of 62% with price at 97.5% of highs suggests quiet accumulation post-earnings. One insider buy ($26K, non-senior) in past 60 days - present but not material enough to upgrade conviction. RS line NOT at new high is a yellow flag; needs sector cooperation to break out.

KEY RISK

Thesis invalid on close below $47.50 (post-earnings base low), or if cloud ARR growth decelerates below 80% in February print - transition risk if legacy declines faster than cloud ramps.

Strong VCP structure with 62% vol contraction and tight 2.31 base, price 0.4% from pivot - technically sound. Cybersecurity theme provides secular support and cloud transition is inflecting. However, RS line NOT at new high and Technology sector lagging (-5.3%) create headwinds. No near-term catalyst post-earnings (just reported). Minor insider buy ($26K) noted but insufficient for grade upgrade. Strongest bear case: 115x forward P/E requires flawless execution; any stumble in cloud transition gets punished severely. Conviction: Medium.

ENTRY TRIGGER

Close above $41.67 on volume >140% of 20-day avg (2.9M shares)

Target: $47.00 (measured move from $36 consolidation low; Street target $44.27 as interim resistance)

Stop: $39.50 (base low; 5.2% risk from pivot)

CATALYST INTELLIGENCE

EARNINGS

Just reported November 3 - no near-term catalyst. Q3 showed 23.5% revenue growth, 160% earnings growth as operating leverage kicked in. Trailing P/E 17x, forward 15.4x reasonable for cyclical recovery. Street target $44.27 implies 7% upside.

BUSINESS & POSITION

Cinemark is the third-largest movie theater chain in the Americas with ~500 theaters across the US and Latin America. Strong operational efficiency with industry-leading margins and disciplined capital allocation positions it as the quality operator in a consolidating industry.

FACTOR & THEME

Direct beneficiary of Consumer Discretionary leadership (+7.1% 20d) and theatrical box office recovery theme. 2026-2027 film slate strongest since pre-pandemic with major franchise releases. Communications sector lagging but CNK trades as consumer discretionary play.

NEWS FLOW

Q3 results beat on both lines driven by strong summer slate. 2027 film calendar shaping up with multiple tentpoles (Avatar 3, new Marvel phase). 10.5% short interest with 4.1 days-to-cover creates squeeze setup on sustained breakout. No insider activity. Industry catalyst: Medium impact from upcoming holiday releases.

INSTITUTIONAL

RS at new high with price at 99.5% of 52W high indicates leadership. Vol dry-up technically met but non-linear (W2 > W3 > W1) - less clean than ideal. High short interest (10.5%) combined with improving fundamentals creates asymmetric squeeze potential. No insider activity (baseline).

KEY RISK

Thesis invalid on close below $39.50 (base low), or if holiday box office disappoints - binary exposure to film slate quality and consumer discretionary spending.

Attractive setup in leading Consumer Discretionary sector with RS at new high and tight 2.26 base just 0.5% from pivot. High short interest (10.5%) creates squeeze asymmetry. However, vol dry-up is non-linear (vol_dryup_strict: false) - W2 spiked before W1 contracted. No catalyst until next earnings (Q4 holiday results). Strongest bear case: theatrical exhibition remains structurally challenged by streaming; CNK is best-in-class buggy whip if secular decline resumes. Conviction: Medium.

Target: $52.00 (measured move from $41 base low; short squeeze acceleration target)

Stop: $42.00 (base low; 6.4% risk from pivot)

CATALYST INTELLIGENCE

EARNINGS

December 01 - Street expects ~$0.43 EPS on ~$275M revenue. BOX has been a consistent beater (4/4 quarters). Forward P/E of 25x with 80% earnings growth expected as margin expansion continues. High Impact catalyst in 19 days could trigger breakout.

BUSINESS & POSITION

Box provides cloud content management and file sharing for enterprises, competing with Microsoft SharePoint and Dropbox. The company has pivoted toward AI-powered content intelligence (Box AI) and security features to differentiate in a mature market.

FACTOR & THEME

Moderate exposure to enterprise SaaS spending normalization theme. AI integration (Box AI launched 2024) provides narrative tailwind but company is value-oriented within software. Technology sector lagging (-5.3%) is a headwind.

NEWS FLOW

Box AI adoption metrics improving per October analyst day commentary. 17.7% short interest with 7.3 days-to-cover is highest in candidate set - significant squeeze potential if earnings surprise positively. Street target $42.57 is BELOW current price, creating potential upgrades catalyst. No insider activity.

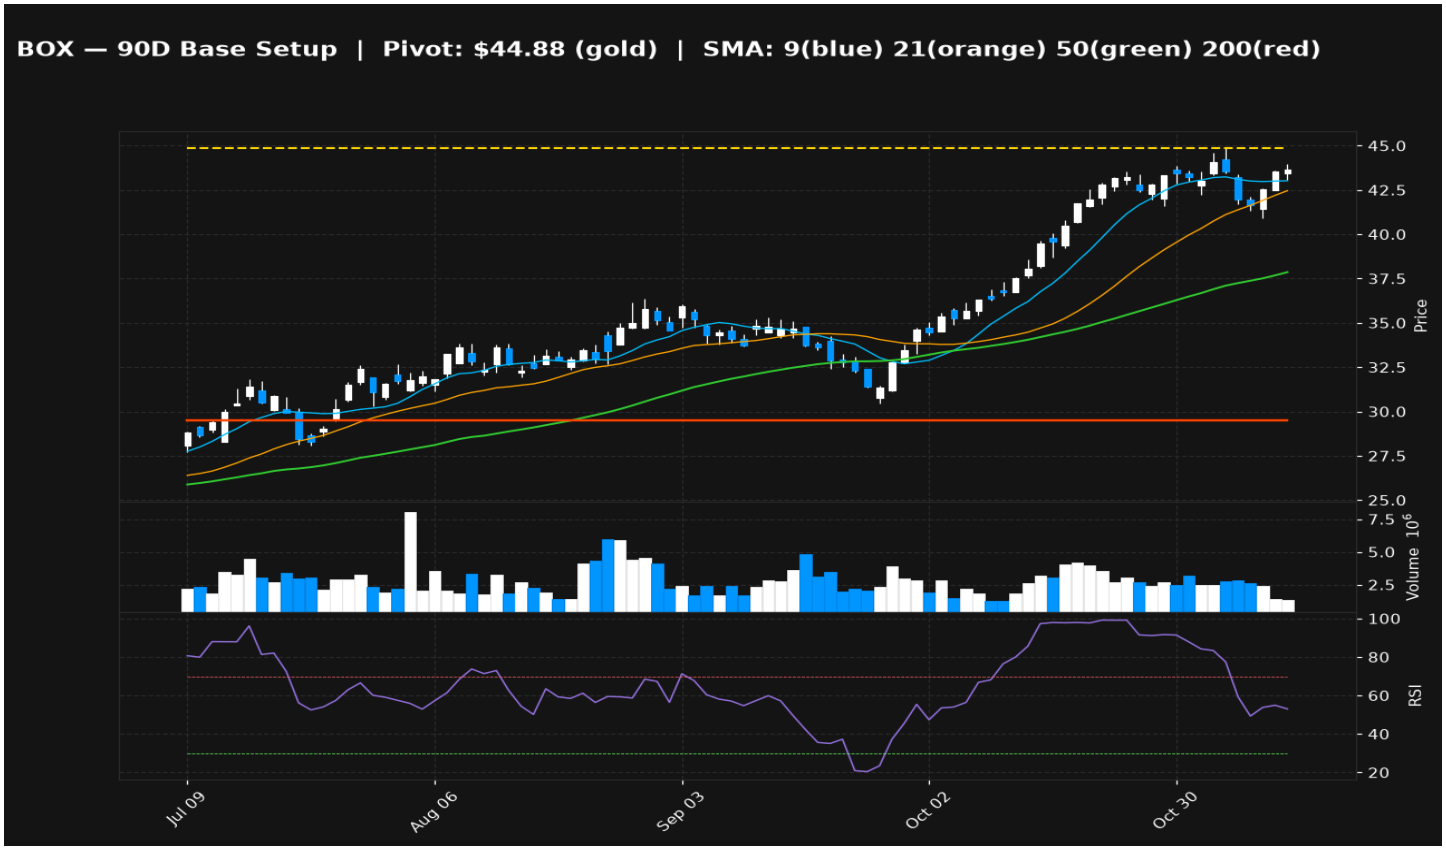

INSTITUTIONAL

Extremely high short interest (17.7%) with 7.3 days-to-cover creates asymmetric squeeze setup into earnings. Vol contracting 34% suggests accumulation despite bearish positioning. RS line not at new high indicates stock needs catalyst to break skeptics. No insider activity (baseline).

KEY RISK

Thesis invalid on close below $42.00 (base low), or if December print shows billings deceleration - Street already skeptical (target below price) and 17.7% short interest means bears have strong conviction on structural thesis.

Compelling squeeze setup with 17.7% short interest and earnings catalyst in 19 days. Vol dry-up confirmed (34%), base reasonably tight at 3.86. However, RS line NOT at new high and Technology sector lagging (-5.3%) - stock needs fundamental surprise to trigger squeeze. Strongest bear case: Street target below current price signals analyst skepticism; BOX is mature grower in commoditized market where MSFT bundles competing functionality. High short interest can be right if fundamentals disappoint. Conviction: Medium.

Target: $50.00 (measured move from $40 base; Street target $45.90 as interim)

Stop: $40.50 (base low; 8.4% risk from pivot)

CATALYST INTELLIGENCE

EARNINGS

Just reported November 5 - no near-term catalyst. Q3 showed 8.6% revenue growth, 36% earnings growth. Valuation reasonable at 22.7x forward P/E for steady healthcare services compounder. Recent IPO (2024 spin) means limited public track record.

BUSINESS & POSITION

Concentra operates the largest network of occupational health centers in the US (~550 locations), providing workers' comp injury care, drug testing, physicals, and urgent care services to employers. Spun from Select Medical in 2024, the company benefits from non-discretionary employer health mandates.

FACTOR & THEME

Healthcare sector leading (+6.3% 20d) provides strong tailwind. Employer health spending is recession-resistant and growing with regulatory complexity (OSHA, DOT requirements). Not exposed to GLP-1 disruption - occupational health is distinct from chronic disease management.

NEWS FLOW

Post-spin execution on track per November print. Healthcare services M&A active - CON could be acquirer or target given fragmented occupational health market. No insider activity post-spin (lockup considerations may apply). Low short interest (3.2%) suggests limited bearish conviction. Corporate catalyst: Low impact near-term.

INSTITUTIONAL

RS at new high in leading Healthcare sector is strong positive. Vol dry-up present but non-linear (vol_dryup_strict: false). Recent spin-off status means institutional ownership still building - could see forced buying as indices reconstitute. No insider data (post-spin baseline).

KEY RISK

Thesis invalid on close below $40.50 (base low), or if employer health spending softens with labor market - high operating leverage means volume declines hit margins quickly.

Solid setup in leading Healthcare sector with RS at new high. Occupational health is defensive, non-discretionary revenue stream. However, vol dry-up is non-linear (vol_dryup_strict: false), base_tight at 4.49 is loose, and no catalyst until next quarter. Recent spin creates limited institutional history. Strongest bear case: labor market softening would directly impact workers' comp volumes - cyclical exposure despite defensive positioning. Conviction: Medium.

CATALYST INTELLIGENCE

EARNINGS

REPORTED

Weak vol contraction (21%), loose base (5.63), RS line not at new high, pivot 4.7% away - multiple structural deficiencies. Just reported earnings so no near-term catalyst. Technology lagging. Early-stage setup needs significant improvement before consideration. Conviction: Low.

CATALYST INTELLIGENCE

EARNINGS

REPORTED

Real Estate sector leading (+5.2%) is positive, but RS line not at new high (only +5.6% vs SPY), base_tight loose at 5.02. Just reported earnings - no catalyst. Grocery-anchored REIT is defensive but lacks alpha asymmetry. Monitor for RS improvement in strong sector. Conviction: Low.

Target: $63.00 (Street target $60.70; modest upside)

Stop: $57.50 (base low; 2.6% risk)

CATALYST INTELLIGENCE

EARNINGS

REPORTED

Near pivot (0.3% away) and tight base (2.29), but vol contraction essentially zero (0.6%) - no accumulation signature. RS line not at new high, RS vs SPY weak at +4.7%. Utility with limited upside asymmetry. Does not meet VCP quality standards despite proximity to pivot. Conviction: Low.

CATALYST INTELLIGENCE

EARNINGS

November 17

Earnings in 5 days creates potential catalyst, but vol contraction minimal (6%), non-linear pattern, base loose (5.38), RS line not at new high, and pivot 5% away. Multiple structural issues despite near-term event. Watch post-earnings reaction for potential promotion. Conviction: Low.
