ENTRY TRIGGER
Close above \$189.62 on volume >150% of 20-day avg (>420k shares)
Target: \$215 (base-height measured move; below \$224 consensus PT)
Stop: \$181.50 (below 50-day MA - ~3.8% risk from pivot)

CATALYST INTELLIGENCE
EARNINGS
July 30 - TTM EPS \$13.49, forward \$15.15 - return to growth after 2024 normalization (earn growth -15% TTM). Recent quarter beat on CLX strength. Consensus PT \$224 implies ~19% upside.
BUSINESS & POSITION
Matson is the dominant Jones Act carrier between US West Coast, Hawaii, Alaska, and Guam, plus operates the premium expedited China-LA service (CLX/CLX+) used by e-commerce shippers. Niche moat structure with limited new capacity entering Pacific lanes keeps pricing power intact.
FACTOR & THEME
Plays Pacific container rate strength and Trans-Pacific expedited demand - a contrarian theme as Industrials sector is lagging (-1.9%). Bull case is China e-commerce shipping (Shein/Temu) and Red Sea diversions sustaining CLX premium pricing.
NEWS FLOW
Container spot rates have stabilized at elevated levels on Red Sea/Trans-Pacific dynamics; no discrete corporate event in 2 weeks. RS line at new 52W high despite Industrials sector weakness - relative strength is the tell. Catalyst type: Industry / Impact: Med.
INSTITUTIONAL
Vol dry-up modest (12.8% contraction) but RS line at new high while sector lags is high-quality accumulation signal - institutions are picking the winner within a weak sector. Zero open-market insider buys in 60 days (baseline).
KEY RISK
Thesis invalid on a close back below \$182 (50-day MA), or on a CLX rate collapse signaled by Drewry/Freightos weekly indices.

RS line at new 52W high while Industrials sector lags is the strongest single relative-strength signal in this cohort - accumulation is differentiated, not sector-beta. Tight base (2.99), 0.5% from pivot, clean vol dry-up. Disconfirming case: container freight rates are mean-reverting and a single Drewry print could break the structure; earnings 71d out limits near-term catalyst urgency. Conviction: High.

ENTRY TRIGGER
Close above \$103.83 on volume >150% of 20-day avg (>375k shares)
Target: \$118 (measured move from 6-month base height applied to pivot; aligns with \$120 consensus PT)
Stop: \$99.40 (below 50-day MA and base low - ~3.4% risk from pivot)

CATALYST INTELLIGENCE
EARNINGS
August 4 - Q2 print ~76 days out - recent quarters have shown sharp earnings recovery off CA rate hikes; TTM EPS of \$15.17 vs forward of \$12 reflects normalization but FY-out beat optionality remains. Consensus PT \$120 implies ~17% upside.
BUSINESS & POSITION
Mercury General is a California-concentrated personal lines P&C insurer with significant auto and homeowners exposure. The wildfire/CA rate approvals cycle has materially repriced the book and ROE has expanded to 38%, reflecting underwriting margin recovery after prior loss-cost shocks.
FACTOR & THEME
Plays the P&C hard market and California rate-adequacy theme, which has been a quiet leader as PGR, ALL and ROOT have outperformed. Low beta (0.94) and value multiple (6.8x TTM PE, EV/EBITDA 3.9x) give it defensive carry in a risk-on/mega-cap regime.
NEWS FLOW
No discrete catalyst in the next two weeks - base is being built on CA Department of Insurance rate approvals and benign cat-loss commentary. Insurance peer read (ALL, TRV) confirms sector tape leadership. Catalyst type: Industry / Impact: Med.
INSTITUTIONAL
Volume dry-up at 52-week highs with RS line at new high is textbook quiet accumulation - small float (26.6M) and only 250k ADV means modest institutional bids move the tape. Zero open-market insider buys in last 60 days (baseline).
KEY RISK
Thesis invalid on a close back below the \$99.50 base low, or on an unanticipated CA wildfire/cat event before pivot trigger.

Tight 2.33% base, RS line at new high, 99% of 52W high with quiet vol dry-up - structurally A-quality but earnings catalyst is 76 days out, capping near-term alpha. Bear case: California regulatory/cat risk is the single largest disconfirming factor and a single wildfire headline kills the structure. Conviction: Medium.

MCY — 90D Base Setup | Pivot: \$103.83 (gold) | SMA: 9(blue) 21(orange) 50(green) 200(red)

ENTRY TRIGGER
Close above \$79.70 on volume >150% of 20-day avg (>2.2M shares)
Target: \$92 (15% measured move from base; reflects breakout to fresh all-time highs)
Stop: \$72.00 (below 50-day MA - ~9.6% risk reflects loose base)

CATALYST INTELLIGENCE
EARNINGS
July 29 - Last 4 quarters have been solid beats with pricing leverage; TTM EPS \$1.38 expected to scale to forward \$2.05 (+49%). Revenue +37%, earnings +61% - serial beater with category share gains.
BUSINESS & POSITION
Vita Coco is the dominant pure-play coconut water brand in the US with category leadership, expanding into water+ and hydration adjacencies. Asset-light branded model with 37% gross margin, 18.7% op margin and 26% ROE - best-in-class for SMID consumer staples.
FACTOR & THEME
Sits at the intersection of functional/better-for-you beverages and GLP-1-era hydration trends - a theme outperforming as CELH stumbled and creates share-donor dynamics. Defensive sector exposure (+2.4% sector tape) with growth-equity multiple supported by 37% revenue growth.
NEWS FLOW
Stock has rallied ~145% off 52W lows on private-label exit (Walmart deal renegotiation behind it), share gains from competitor missteps, and DTC/grocery distribution wins. No major event in next 2 weeks. Catalyst type: Earnings / Impact: High (but 70d out).
INSTITUTIONAL
Volume contraction is dramatic (today 0.46x avg) at 97.7% of 52W high - accumulation footprint visible. 12.8% short interest with 3.9 days-to-cover provides squeeze fuel on breakout. Zero open-market insider buys in last 60 days (baseline; founder still holds large stake).
KEY RISK
Thesis invalid on a close back below \$72 (50-day MA and base support), or any pre-announcement of softening US scanner data given consensus PT of \$72.56 sits BELOW current price - analyst skepticism is the bear tell.

Best RS in the cohort (+36.5 vs SPY) and clean vol dry-up, but base_tight at 9.8 is loose and the analyst PT (\$72.56) sits below current price - disconfirming evidence is meaningful and a high-bar print risk on July 29 looms. Short interest provides asymmetric upside on a clean breakout. Conviction: Medium.

COCO — 90D Base Setup | Pivot: \$79.70 (gold) | SMA: 9(blue) 21(orange) 50(green) 200(red)

ENTRY TRIGGER	
Close above \$200.09 on volume >150% of 20-day avg (>180k shares)	
Target: \$220 (base-height measured move; ~10% upside)	
Stop: \$188.50 (below recent base low and 50-day MA - ~5.8% risk)	

CATALYST INTELLIGENCE	
EARNINGS	
August 6 - TTM EPS \$7.88, recent quarters showed margin recovery as labor costs normalized; +9.7% earnings growth. Forward PE of 464 is a yfinance data artifact (estimate distortion) - trailing 25x and PEG 0.82 are the real read.	
BUSINESS & POSITION	
National HealthCare operates skilled nursing facilities, assisted living and home health primarily across the Southeast US. A conservatively-run, family-controlled SNF operator with low leverage and stable occupancy in a sector that has finally cycled past COVID-era staffing pressures.	
FACTOR & THEME	
Pure demographic play on aging Boomers entering SNF/senior care, with Medicare/Medicaid rate updates beginning to outpace wage inflation. Defensive low-beta (0.65) profile that historically works in mega-cap-led tapes where dispersion narrows.	
NEWS FLOW	
Quiet base on FY27 Medicare SNF PPS update commentary and stable occupancy. Limited sell-side coverage (target_price 0 = no consensus PT) - under-followed name. Catalyst type: Industry / Impact: Med (rate updates).	
INSTITUTIONAL	
Tiny float (12.6M) with ADV of only 120k means any institutional accumulation moves the tape - RS line at new high with vol dry-up to 0.65x avg is the quiet-accumulation footprint. Zero open-market insider buys in last 60 days; insider ownership data unavailable from this feed.	
KEY RISK	
Thesis invalid on a close back below \$189 base support, or on adverse CMS Medicaid rate commentary in the next quarterly print.	

RS at new high, 99.7% of 52W high, quiet vol dry-up and under-followed (no PT) - exactly the under-owned alpha profile the brief favors. Disconfirming case: thin liquidity (120k ADV) creates whipsaw risk and base_tight at 5.37 is wider than ideal. Conviction: Medium.

NHC — 90D Base Setup | Pivot: \$200.09 (gold) | SMA: 9(blue) 21(orange) 50(green) 200(red)

ENTRY TRIGGER
Close above \$40.12 on volume >150% of 20-day avg (>1.8M shares)
Target: \$46 (base-height measured move; ~15% upside)
Stop: \$36.40 (50-day MA - ~9.3% risk from current; 4.5% wide pivot makes this a wait-for-trigger setup)

CATALYST INTELLIGENCE
EARNINGS
July 22 - TTM EPS \$3.36 declining to forward \$2.20 reflects mix shift and margin compression on growth investments; recent quarters mixed (-26.5% earn growth). Bull case requires Q2 to inflect subsea margins.
BUSINESS & POSITION
Oceaneering is the global leader in subsea ROV services and offshore robotics, with growing exposure to defense (Navy USV/UUV) and aerospace manufacturing. The subsea business benefits directly from a multi-year offshore deepwater capex restart led by Petrobras, Equinor and Saudi Aramco.
FACTOR & THEME
Plays the offshore E&P capex revival theme - Energy is +5% sector leader on the 20d tape, validating the read. Also indirect defense/USV exposure provides optionality on US Navy unmanned-vehicle awards.
NEWS FLOW
Offshore rig day-rate strength and Petrobras tender wins are supportive but no discrete contract catalyst in next 2 weeks. Strict vol dry-up (47% contraction, today 0.51x avg). Catalyst type: Industry / Impact: Med.
INSTITUTIONAL
Strict vol dry-up at 95.7% of 52W high with energy sector leading is constructive accumulation footprint. 7.6% short interest and 4.5 days-to-cover provides squeeze potential on breakout. Zero open-market insider buys in 60 days (baseline).
KEY RISK
Thesis invalid on a close below \$36.50 (50-day MA), or on any oil price break <\$60 WTI that delays offshore FIDs.

Strong tight base (1.76), strict vol dry-up, energy sector leadership and offshore capex tailwind - but at 4.5% from pivot the entry is not imminent and forward earn growth is negative. Bear case: pivot is far enough that a single oil-price wobble resets the structure. Conviction: Medium.

Close above \$218.68 on volume >150% of 20-day avg (>735k shares)
Target: \$245 (12% measured move from base; ~13% upside, modestly above \$222 consensus PT)
Stop: \$204.80 (below 50-day MA - ~6.3% risk)

CATALYST INTELLIGENCE
EARNINGS
August 4 - TTM EPS -\$1.52 inflecting to forward \$4.15 reflects sharp cyclical recovery. Recent quarters have been beat-and-raise; rev +20% with operating leverage just starting. Consensus PT \$222.86 sits right at pivot - tight risk/reward.
BUSINESS & POSITION
Silicon Labs is a pure-play wireless IoT semiconductor company providing low-power Bluetooth, Zigbee, Matter and Wi-Fi MCUs for smart home, industrial and connected health. The business is emerging from a deep 2023-2024 inventory destock with revenue inflecting (+20%) and forward EPS swinging from -\$1.52 TTM to +\$4.15.
FACTOR & THEME
Plays the IoT/edge semiconductor inventory normalization theme - Tech is the leading sector (+13.7% 20d). However, this is a non-AI semi name, so it lacks the GPU/datacenter narrative dollar; instead it's a cyclical recovery setup that requires the broader semi tape to broaden beyond AI hyperscalers.
NEWS FLOW
Quiet base building on Matter/Thread protocol adoption and industrial IoT design-win commentary. Strict vol dry-up (27.7% contraction, today 0.53x avg). No discrete catalyst pre-earnings. Catalyst type: Earnings / Impact: High (but 76d out).
INSTITUTIONAL
Strict vol dry-up at 99% of 52W high is constructive. 9.6% short interest with 4.8 days-to-cover provides squeeze fuel on clean breakout - meaningful asymmetry. Zero open-market insider buys in 60 days (baseline).
KEY RISK
Thesis invalid on a close back below \$205 (50-day MA / base support), or any peer (NXPI, MCHP) preannouncing softer IoT order trends before SLAB prints.

Textbook tight base (2.43), strict vol dry-up, 0.8% from pivot at 52W highs - structurally clean and 9.6% short interest is squeeze fuel. Disconfirming case: RS vs SPY is -1.8 (not leading) and the name is NOT in the AI-semi narrative dollar - relies on cyclical broadening that may not arrive before earnings. Conviction: Medium.

ENTRY TRIGGER
Close above \$47.95 on volume >150% of 20-day avg (>1.0M shares)
Target: \$53 (base-height measured move; modestly above \$48 consensus PT, implying PT upgrades on breakout)
Stop: \$44.40 (below 50-day MA - ~7.4% risk; base_tight 4.86 is wide)

CATALYST INTELLIGENCE
EARNINGS
July 27 - Forward EPS \$4.95 vs TTM \$2.48 implies +100% earnings growth - recent quarters serial beats, +85.7% TTM earn growth. Forward PE just 9.5x with 9.8% ROE expanding.
BUSINESS & POSITION
CNO Financial serves middle-income Americans with life, health, annuity and worksite benefits through Bankers Life and Washington National. Recent capital-return discipline and product repricing have driven a sharp earnings inflection - forward EPS \$4.95 vs TTM \$2.48 (+100%).
FACTOR & THEME
Plays the life insurance ROE recovery / higher-rates-for-longer earnings tailwind - quietly outperforming as rate-cut expectations have moderated. Low beta (0.83) defensive carry in mega-cap-led tape.
NEWS FLOW
Quiet base on continued capital return (buybacks) and worksite benefits growth commentary. RS line at new high. No discrete event in 2 weeks. Catalyst type: Earnings / Impact: High (but 68d out).
INSTITUTIONAL
RS line at new 52W high with vol dry-up to 0.62x is constructive accumulation footprint. 90M float and 680k ADV provide adequate institutional liquidity. Zero open-market insider buys in 60 days (baseline).
KEY RISK
Thesis invalid on a close below \$44.50 base low, or on a sharp rate-cut repricing that compresses life-insurance NIMs.

RS line at new high, 98.5% of 52W high, earnings inflection in motion - but base_tight at 4.86 is loose and consensus PT (\$48) is essentially at pivot suggesting sell-side fully discounts upside. Disconfirming case: a benign rate path compresses the life-insurance bull thesis. Conviction: Medium.

CNO — 90D Base Setup | Pivot: \$47.95 (gold) | SMA: 9(blue) 21(orange) 50(green) 200(red)
