Target: \$7.50 (measured move from 19-day base depth of ~\$1.60 added to pivot; aligns with analyst target of \$10)
Stop: \$4.80 (base low; 13% risk from pivot)

CATALYST INTELLIGENCE
EARNINGS
Aug 06 - Street expects EPS of -\$0.20 on ~\$2M revenue. Beat/miss pattern mixed over last 4 quarters with guidance largely maintained. Key focus will be pipeline updates and cash runway commentary given P/S of 92x reflects growth-stage premium; P/E inapplicable for pre-profit biotech. Impact: High (binary event for sentiment reset).
BUSINESS & POSITION
Aclaris is a clinical-stage biotech focused on dermatological and immunological diseases, with lead programs targeting alopecia areata and vitiligo via JAK inhibitor and other novel mechanisms. The company has pivoted toward out-licensing and partnership revenue while advancing its proprietary pipeline, positioning as a niche disruptor in autoimmune dermatology.
FACTOR & THEME
Taps the biotech catalyst cycle theme with binary clinical/regulatory events driving price action. Sentiment in small-cap biotech is stabilizing after 2025 washout; peer read-throughs from recent dermatology approvals (VYNE, ARCUS partnerships) suggest renewed interest in the space.
NEWS FLOW
No major contract wins or FDA dates in last 60 days. Company presented updated Phase 2 data at AAD in June showing durable responses in alopecia program. Russell 2000 reconstitution in June kept name in index. Catalyst Impact: Earnings (High) - any pipeline acceleration or partnership announcement would materially re-rate shares.
INSTITUTIONAL
Volume dry-up is textbook (1.65M 1.76M 1.83M weekly contraction with price holding near highs) suggesting quiet accumulation into the base. Institutional ownership data unavailable from this feed. Zero insider buying in last 60 days is baseline for biotech names; no incremental signal. Short interest at 10.9% with 5.8 days-to-cover creates squeeze potential on positive catalyst.
KEY RISK

Textbook vol dry-up (strict confirmed) with tight base (1.84) and 6.3% to pivot, but RS line not at new high and Healthcare sector lagging (-1.3%). Earnings in 3 days is a binary catalyst that could trigger or invalidate - setup quality is strong but biotech event risk and sector headwind cap grade. Bear case: cash burn and dilution risk if pipeline stumbles; runway not infinite. Conviction: Medium.

Target: \$5.00 (analyst target \$5.50; measured move ~\$1.25 from base depth)
Stop: \$3.00 (base low; 17% risk from pivot)

CATALYST INTELLIGENCE
EARNINGS
Aug 05 - Street expects EPS of ~\$0.06 on revenue of ~\$125M. Forward P/E of 13.7x with PEG 0.83 suggests Street sees turnaround. Company has been loss-making (TTM EPS -\$1.09) but expected to inflect to profitability. Beat pattern: mixed, with revenue generally in-line but margin improvement key. Impact: High (turnaround inflection quarter).
BUSINESS & POSITION
NN Inc. manufactures high-precision metal components and assemblies for automotive, aerospace, and industrial end markets, with growing exposure to EV drivetrain components. The company is a niche supplier benefiting from reshoring tailwinds as OEMs diversify away from Asian supply chains.
FACTOR & THEME
Direct exposure to reshoring/nearshoring theme as US manufacturers rebuild domestic supply chains. EV transition creates demand for precision components in electric drivetrains. Industrials sector neutral in current regime; peer action (MTRN, SRI) shows rotation into specialty component makers.
NEWS FLOW
No major contract announcements in last 60 days. Company highlighted automotive and aerospace backlog strength at June investor day. Debt restructuring completed in Q1 2026 improved balance sheet flexibility. High leverage (D/E 152x) remains key focus. Catalyst Impact: Earnings (High) - profitability inflection would re-rate multiple.
INSTITUTIONAL
Strong vol contraction (30.6% week-over-week) with price holding suggests accumulation into the base. RS vs SPY at +42% indicates significant relative strength despite small-cap headwinds. Zero insider buying in last 60 days; no incremental signal. Low short ratio (0.7 days) limits squeeze potential. Institutional data unavailable from feed.

KEY RISK
Thesis invalid on close below \$3.00 (base low) or on any guidance cut at Aug 05 print. High leverage (D/E 152x) creates refinancing risk if rates stay elevated; customer concentration in automotive adds cyclical sensitivity.

Strong vol dry-up (strict confirmed, 30.6% contraction) with RS +42% vs SPY showing leadership, but base_tight at 2.22 and RS line not at new high. Earnings in 2 days creates near-term binary event. Turnaround story with profitability inflection potential, but high leverage is significant risk. Bear case: automotive slowdown or missed margin targets would validate debt concerns. Conviction: Medium.

ENTRY TRIGGER
Close above \$31.52 on volume >140% of 20-day avg (1.65M+ shares)
Target: \$38.00 (analyst target \$41.58; conservative 20% upside to account for sector headwind)
Stop: \$28.00 (base low; 11% risk from pivot)

CATALYST INTELLIGENCE
EARNINGS
Aug 06 - Street expects EPS of ~\$0.95 on revenue of ~\$560M. Forward P/E 7.7x is attractive for MedTech peer group. TTM EPS deeply negative (-\$19.89) due to one-time charges; normalized earnings inflecting positive. Company has maintained guidance through recent quarters. Impact: High (margin normalization narrative).
BUSINESS & POSITION
Enovis is a medical technology company focused on orthopedic solutions including reconstructive surgery, rehabilitation, and prevention products. Spun from Colfax in 2022, it serves as a pure-play on elective procedure recovery with exposure to sports medicine and joint reconstruction.
FACTOR & THEME
Taps MedTech recovery theme as elective surgical volumes normalize post-pandemic. Orthopedic peers (ZBH, SYK) showing procedure volume acceleration. Healthcare sector lagging (-1.3%) creates near-term headwind but company-specific catalysts can override.
NEWS FLOW
Completed Lima acquisition integration in Q2 2026, expanding international footprint in joint reconstruction. New robotic-assisted surgery platform received FDA clearance in June. Insider buying: 4 open-market purchases totaling \$70K in last 60 days - directors accumulating, though not C-suite. Catalyst Impact: Earnings (High) - integration synergies and margin expansion key focus.
INSTITUTIONAL
Insider cluster of 2 (4 buys, \$70K) shows director-level confidence but lacks senior officer participation - positive signal but not upgrade-worthy. Vol dry-up present but not strict (W2 lower than W1/W3). Short interest elevated at 17.3% with 6.5 days-to-cover creates meaningful squeeze setup on beat. Institutional data unavailable from feed.

KEY RISK
Thesis invalid on close below \$28.00 (20-day base low) or on margin guidance cut at Aug 06 print. High debt (D/E 95x) from Lima acquisition creates integration execution risk; any deal stumble would punish shares.
Very tight to pivot (0.3%) with RS +28.8% and earnings catalyst in 3 days, but base_tight at 5.83 is loose and vol dry-up not strict (middle week anomaly). Insider buying (4 directors, \$70K) is positive but cluster score of 2 insufficient for grade upgrade. High short interest (17.3%) creates squeeze potential. Bear case: Healthcare lagging and integration execution risk on Lima deal could disappoint. Conviction: Medium.

ENTRY TRIGGER

Close above \$15.51 on volume >110% of 20-day avg (3.0M+ shares)

Target: \$19.00 (analyst target \$18.25; measured move suggests \$18.50-19.00 zone)

Stop: \$13.50 (base low; 13% risk from pivot)

CATALYST INTELLIGENCE	
EARNINGS	
Aug 13 - Street expects EPS of ~\$0.28 on revenue of ~\$210M. Forward P/E 13.5x attractive given 55% revenue growth. Beat history solid over last 4 quarters with revenue consistently exceeding. Guidance has been maintained; focus on take-rate stability and merchant expansion. Impact: High (growth sustainability narrative).	
BUSINESS & POSITION	
DLocal is a Uruguay-based payments platform enabling global enterprise merchants to accept payments in emerging markets across Latin America, Africa, and Asia. The company operates as a category leader in EM cross-border payment infrastructure, serving clients like Amazon, Uber, and Netflix.	
FACTOR & THEME	
Direct exposure to LatAm fintech expansion and cross-border e-commerce growth. Theme sentiment stabilizing after 2024-25 EM fintech selloff. Peer read-throughs: STNE and PAGS showing renewed institutional interest as Brazil macro improves. Revenue growth of 54.9% demonstrates market share gains.	
NEWS FLOW	
Expanded merchant coverage in Africa in Q2 2026 with major e-commerce platform wins. No material regulatory issues in key LatAm markets. Company completed \$100M share buyback authorization in June. Short interest elevated at 12.8% with 4.9 days-to-cover. Catalyst Impact: Earnings (High) - take-rate and merchant retention metrics key to sustaining growth multiple.	
INSTITUTIONAL	
Vol dry-up present but not strict; base reasonably tight at 2.32. RS vs SPY modest at +7.9% - not leading but holding gains. Zero insider buying in last 60 days is notable given buyback authorization (management prefers corporate repurchase over personal buys). Institutional data unavailable from feed.	
KEY RISK	
Thesis invalid on close below \$13.50 (base low) or on take-rate compression/merchant churn disclosed at Aug 13 print. Currency volatility in LatAm (BRL, ARS, MXN) creates earnings translation risk; any EM macro shock would gap shares lower.	

Tight to pivot (1.3%) with solid base_tight of 2.32 and earnings catalyst in 10 days. Strong fundamentals (55% revenue growth, 35% ROE) but RS vs SPY only +7.9% shows lack of relative leadership. Vol dry-up exists but not strict. Bear case: EM currency volatility and elevated short interest (12.8%) suggest skepticism on growth sustainability. Conviction: Medium.

CATALYST INTELLIGENCE

EARNINGS

Aug 10

RS vs SPY negative (-6.7%) indicates underperformance vs market - not a leader. Extremely illiquid (avg vol 20K/day) creates execution risk and limits institutional participation. Base_tight at 4.55 is loose. Earnings in 7 days provides catalyst but structural setup quality insufficient for higher grade. Conviction: Low.

NYAX — 90D Base Setup | Pivot: \$70.75 (gold) | SMA: 9(blue) 21(orange) 50(green) 200(red)
