

Appendix — evidence and methodology

The audit trail for the Equity Research v4 report on NVDA. It is not a summary: it records the event reconciliation, where every figure came from, what was withheld and why, and the formula behind each derived value. Market data as of 2026-08-03T20:00:00+00:00.

1. Event-state reconciliation

Before any rating the report reconciles the ET clock, the earnings calendar, the issuer's filings and the call status into one event state. This run resolved to POST-CALL NOT TRANSCRIPT-VERIFIED and a directional rating was permitted. [OBS]

- Results are out and the call has concluded by the clock (1807h since release, a later ET day), but no transcript feed verifies what was said.

2. Estimates and consensus ledger

3. Valuation method

Enterprise value = market cap \$\$5000.69B + total debt \$\$7.47B – cash \$\$13.24B = \$\$4994.92B. EV / revenue uses the latest quarter annualised (run-rate), and FCF yield uses annualised quarterly free cash flow over market cap; both are labelled run-rate, not trailing-twelve-month. [DER]

A historical MULTIPLE band and forward bull/base/bear prices are deliberately NOT produced: the first needs a point-in-time historical EPS series and the second needs issuer guidance, neither available on this tier. Dividing the 52-week PRICE range by current EPS — which the prior version did — is circular (the implied prices are just the price range) and has been removed.

Free cash flow = operating cash flow – capital expenditure (PP&E purchases), both taken from the latest filed cash-flow statement. [DER]

An XBRL reference reads accession · tag · period end; the tag is a us-gaap concept shown with word breaks (remove the spaces to reconstruct the exact tag).

6. Insider transactions (Form 4)

A Form 4 records what an insider did, not why. Sales under a plan adopted earlier, shares surrendered to cover tax on a vest, and a discretionary open-market sale all file the same way, and this report does not read any of them as a view on the stock. [\[OBS\]](#)

Open-market sales	42	view-bearing
Shares withheld for tax	11	mechanical
Grants and awards	11	mechanical

7. Institutional filings (Schedule 13D / 13G)

Ownership interpretation unavailable: 11 of 11 could not be attributed to a named filer. No stake size is parsed from any filing body, so the count below is a count of filings and nothing more. [\[OBS\]](#)
