Target: \$110 (16% measured move from 20-day base depth of ~\$15)

Stop: \$89.50 (base low, -5.5%)

CATALYST INTELLIGENCE

EARNINGS

November 19 - Street expects ~\$1.55 EPS on ~\$850M revenue. Company has beaten 3 of last 4 quarters. Negative TTM EPS reflects one-time impairment; forward P/E 14.8x reasonable for cyclical industrial with 8% rev growth. Guidance maintained at last print.

BUSINESS & POSITION

Atkore manufactures electrical raceway products (conduit, cable, fittings) and safety infrastructure for commercial, industrial, and residential construction. Category leader in PVC and steel conduit with strong pricing power due to fragmented competition and mission-critical spec-in relationships with contractors.

FACTOR & THEME

Direct beneficiary of IRA-driven grid modernization, data center buildout (AI infrastructure), and reshoring capex. Sentiment accelerating as utility capex guidance rises; peer Hubbell (HUBB) broke out in August on similar themes.

NEWS FLOW

No major contract announcements in last 60 days, but sector tailwinds strong. Eaton and Hubbell commentary on Q3 calls flagged continued demand strength in non-resi electrical. Russell 2000 rebalance risk minimal given \$3.2B cap. [Catalyst: Industry read-through, Med impact]

INSTITUTIONAL

Volume dry-up with price at 52W high suggests quiet accumulation; vol_ratio_today 0.6x confirms supply exhaustion. No insider buying in last 60 days - baseline for industrial names. Institutional ownership data unavailable from this feed. Short interest 4.5% / 1.9 DTR manageable.

KEY RISK

Thesis invalid on close below \$89.50 (base low / 50-day MA confluence), or if Q4 guidance signals non-resi construction slowdown. Customer concentration in distributors creates channel inventory risk.

RS line at new high with price 0.1% from pivot is textbook, but base_tight 5.6 is loose and vol dry-up is soft (vol_w1 slightly below vol_w2). Earnings 51 days out removes near-term catalyst urgency. Strong sector tailwinds offset by IWM underperformance (-4% vs SPY). Bear case: forward EPS assumes margin recovery that may not materialize if steel/PVC costs re-accelerate. Conviction: Medium.

Close above \$113.14 on volume >130% of 20-day avg (>780K shares)

Target: \$130 (15% measured move; confluence with 2x ATR expansion target)

Stop: \$105.00 (base low, -4.8%)

CATALYST INTELLIGENCE	
EARNINGS	
November 5 - Street expects ~\$1.50 EPS on ~\$350M revenue. Trailing EPS \$15.64 reflects peak cycle; forward P/E 17x bakes in rate normalization. Beat 4/4 last quarters. Dividend yield ~8% provides downside cushion.	
BUSINESS & POSITION	
International Seaways operates a fleet of crude and product tankers (~80 vessels post-Diamond S merger), benefiting from structural vessel supply constraints and elevated ton-mile demand from rerouted Russian/Middle East crude flows. Among the lowest-cost operators with modern fleet.	
FACTOR & THEME	
Peak energy security theme - tanker rates remain elevated as OPEC+ cuts tighten Atlantic Basin supply and Red Sea diversions add ton-miles. Sentiment stabilizing after Q2 correction; peer Frontline (FRO) and Teekay Tankers (TNK) showing renewed strength. Negative beta (-0.1) provides portfolio diversification.	
NEWS FLOW	
No specific contract wins but spot tanker rates firm. Industry read-through positive from Euronav and Scorpio Tankers commentary on sustained demand. Fleet renewal capex completed - FCF pivoting to returns. [Catalyst: Earnings in 37D, Med-High impact given rate sensitivity]	
INSTITUTIONAL	
Vol dry-up from 1.03M to 589K (week-over-week) with RS at 52W high signals institutional accumulation into strength. 7.9% short interest / 4.4 DTR creates squeeze potential on breakout. No insider activity last 60 days. Inst ownership data unavailable.	
KEY RISK	
Thesis invalid on close below \$105 (14-day base low), or if Q3 tanker rates collapse >20% signaling cycle turn. OPEC+ production increase or Red Sea resolution would compress ton-mile demand.	

RS +46% vs SPY with line at new high is excellent relative strength. Vol dry-up real but not perfectly stair-stepping (vol_w2 spiked). Base tight 4.3 acceptable. Energy sector lagging (-1.4% 20d) but tankers decoupled from E&P. Earnings 37 days out provides catalyst. Bear case: Forward P/E assumes rate decline - if spot rates fall faster than consensus, multiple compresses. Conviction: Medium-High.

Close above \$104.75 on volume >140% of 20-day avg (>1.16M shares)

Target: \$125 (Street target \$125.90; 20% upside to mean reversion on multiple)

Stop: \$98.00 (base low, -6.1%)

CATALYST INTELLIGENCE
EARNINGS
December 1 - Street expects ~\$2.10 EPS on ~\$1.5B revenue (holiday preview quarter). Forward P/E 7.6x is deep value vs historical 12-15x range. Beat 3/4 last quarters. No recent guidance change.
BUSINESS & POSITION
Signet is the world's largest retailer of diamond jewelry, operating Kay Jewelers, Zales, Jared, and Blue Nile brands. Dominant in the bridal category with ~30% US market share. Digital transformation under CEO Gina Drosos has driven margin expansion and inventory efficiency.
FACTOR & THEME
Consumer discretionary recovery play contingent on stable employment and wedding spend normalization. Sentiment mixed - sector underperforming but SIG showing idiosyncratic strength. Peer Brilliant Earth (BRLT) weak; SIG's scale advantage widening.
NEWS FLOW
21.4% short interest with 5.6 DTR creates significant squeeze setup. No major corporate announcements in 60 days. Holiday season commentary from competitors (TIF, private comps) will be key read-through. [Catalyst: High short interest + earnings positioning, Med impact]
INSTITUTIONAL
Vol contraction 56% (strict dry-up confirmed) despite elevated short interest suggests shorts trapped and longs accumulating quietly. This is a high-conviction institutional accumulation pattern. No insider buying last 60 days - notable absence given value setup. Inst ownership data unavailable.
KEY RISK

Thisis invalid on close below \$98.00 (15-day base low), or if holiday guidance disappoints at December print. Lab-grown diamond share gains threaten natural diamond ASPs; consumer credit deterioration risk.

Strict vol dry-up with 21% short interest is textbook squeeze setup. Price 0.4% from pivot. However, RS line NOT at new high (lagging SPY), base_tight 6.15 is loose, and Consumer Cyclical sector faces IWM headwind (-4%). Earnings 63 days out - no near-term catalyst. Bear case: Lab-grown disruption structurally impairs natural diamond margins; consumer slowdown crimps holiday spend. Conviction: Medium.

SIG — 90D Base Setup | Pivot: \$104.75 (gold) | SMA: 9(blue) 21(orange) 50(green) 200(red)

ENTRY TRIGGER
Close above \$39.07 on volume >110% of 20-day avg (>2.68M shares)
Target: \$45.00 (measured move from \$7 base depth; aligns with pre-pandemic support)
Stop: \$36.50 (base low, -4.5%)

CATALYST INTELLIGENCE
EARNINGS
November 4 - Street expects ~\$0.55 EPS on ~\$850M revenue. Forward P/E 14.5x reasonable; EV/EBITDA 10.4x vs pre-COVID 8-9x reflects recovery premium. Beat 3/4 last quarters. Debt/Equity 587% is legacy but manageable with FCF positive.
BUSINESS & POSITION
Cinemark is the third-largest US theater chain and largest in Latin America, with ~500 theaters and 5,800 screens. Post-pandemic survivor with leaner cost structure and premium format (XD, D-BOX) mix shift driving higher per-cap revenue.
FACTOR & THEME
Box office recovery theme accelerating - 2026 slate loaded with franchise sequels (Avatar 3, Marvel Phase 6). Comms sector leading (+0.5% 20d). Peer AMC deleveraging; CNK's balance sheet superiority provides operating leverage upside.
NEWS FLOW
Q3 box office tracking strong with late-summer releases outperforming. No specific CNK announcements but industry tailwind clear. 10.6% short interest / 3.6 DTR creates squeeze potential. [Catalyst: Earnings in 36D + box office momentum, High impact]
INSTITUTIONAL
RS line at 52W high with price 2.3% from pivot in leading sector is favorable. Vol dry-up soft (vol_w1 ~ = vol_w3) but today's vol_ratio 0.59 confirms supply exhaustion. No insider buying last 60 days. Inst ownership data unavailable.
KEY RISK
Thesis invalid on close below \$36.50 (17-day base low / 50-day MA), or if Q4 slate underperforms (e.g., franchise fatigue). High leverage (587% D/E) amplifies downside if theatrical attendance normalizes lower than expected.

RS line at new high in leading Comms sector is bullish. Earnings catalyst in 36 days. Base tight 3.96 acceptable. However, vol dry-up imperfect and high leverage creates tail risk. IWM headwind partially offset by sector strength. Bear case: Streaming competition structurally impairs theatrical windows; debt refinancing risk if rates stay elevated. Conviction: Medium.

ENTRY TRIGGER
Close above \$222.49 on volume >150% of 20-day avg (>450K shares)
Target: \$265 (measured move from \$45 base depth; historical resistance zone)
Stop: \$210.00 (base low, -5.0%)

CATALYST INTELLIGENCE
EARNINGS
November 3 - Street expects ~\$0.85 EPS on ~\$220M revenue. Currently unprofitable (TTM EPS -\$1.17) but inflecting - forward P/E 50.7x reflects turnaround premium; use P/S 8.6x for valuation context. Beat 2/4 last quarters. Rev growth +18% signals recovery.
BUSINESS & POSITION
Silicon Labs designs wireless SoCs and modules for IoT applications including smart home, industrial automation, and commercial lighting. Pure-play IoT semiconductor after divesting infrastructure business. Technology leader in Matter protocol and Bluetooth/Zigbee connectivity.
FACTOR & THEME
IoT/edge computing theme - sentiment recovering as inventory destocking completes. Tech sector leading (+5.9% 20d) provides tailwind. Peer Nordic Semi rebounding; semi cycle read-through improving.
NEWS FLOW
No major announcements in 60 days. Matter protocol adoption accelerating across smart home ecosystem. 12.9% short interest / 8.4 DTR creates squeeze potential on earnings beat. [Catalyst: Earnings in 35D, High impact given turnaround inflection]
INSTITUTIONAL
Strict vol dry-up (319K -> 273K -> 222K) is textbook contraction with price 0.6% from pivot - institutional accumulation visible. High short interest suggests skeptics positioned against turnaround. No insider buying last 60 days - notable given inflection setup could use confirmation. Inst ownership data unavailable.
KEY RISK
Thesis invalid on close below \$210 (base low / 50-day MA), or if Q3 guidance signals IoT demand re-weakening. Customer concentration in smart home OEMs creates platform risk if Matter adoption stalls.
Textbook strict vol dry-up with base_tight 2.48 in leading Tech sector is structurally sound. However, RS vs SPY -1.5% (lagging despite sector strength) and RS line NOT at new high are red flags - stock not leading. Earnings catalyst in 35 days. Bear case: IoT demand recovery stalls; high valuation (50x forward) leaves no margin for error. Conviction: Medium-Low.

EARNINGS

October 29

Healthcare sector near flat (-0.6%) but MMSI 4.9% from pivot - too far for imminent trigger. RS line not at new high despite +23.8% vs SPY suggests momentum fading. Vol dry-up soft. Earnings in 30 days may tighten base. Monitor for pivot compression. Conviction: Low.

Strong RS +38.7% vs SPY in neutral Healthcare sector is positive, but 4.3% to pivot and RS line not at new high indicate setup needs more time. Vol dry-up present but not strict. Earnings in 37 days may catalyze tightening. Monitor. Conviction: Low.
