Close above $109.00 on volume >180% of 20-day avg (610K+ shares)

Target: $126 (16% measured move; aligns with street target $126.86)

Stop: $101.00 (base low, 5% risk)

CATALYST INTELLIGENCE

EARNINGS

Nov 17 - Earnings in 6 days (Nov 17). Forward P/E 17.4x on $6.10 EPS estimate. PEG 0.54 attractive. Revenue growth +7.0% steady. Street target $126.86 implies 19.5% upside - significant analyst optimism. Near-term earnings catalyst creates binary event. Catalyst type: Earnings (High); Impact: High.

BUSINESS & POSITION

Griffon operates two segments: Home & Building Products (AMES brand outdoor tools, garage doors via Clopay) and Defense Electronics (defense contractor divested in 2022). Core business is tied to housing repair/remodel activity and new construction - a leveraged play on housing market recovery.

FACTOR & THEME

Direct exposure to housing starts, repair & remodel spending, and consumer discretionary strength. Consumer Discretionary sector leading (+6.7% 20d) provides strong factor tailwind. Industrials exposure through garage door/building products adds cyclical beta.

NEWS FLOW

Housing-related read-throughs positive: homebuilders reported resilient demand despite rate volatility. AMES outdoor products positioned for spring 2027 stocking cycle. No M&A, activist, or insider activity in last 60 days. High leverage (debt/equity 1035%) reflects aggressive capital structure - financial engineering play. Catalyst type: Earnings (High).

INSTITUTIONAL

RS line at new high with earnings catalyst in 6 days - ideal timing for VCP trigger. Vol dry-up partial. Tight float (42.3M) amplifies breakout potential. Extremely high ROE (227%) reflects leveraged capital structure, not operating efficiency. Zero insider activity despite imminent earnings - absence notable but not disqualifying.

KEY RISK

Thesis invalid on close below $101.00 (below base low, ~5% risk), or on Nov 17 earnings miss/guide-down citing housing slowdown or garage door demand weakness. Extreme leverage (10x debt/equity) creates existential risk in downturn.

RS line at new high, earnings catalyst in 6 days, Consumer Discretionary sector leading (+6.7%), and street target 19.5% above current - multiple convergent signals. Vol dry-up partial but acceptable. Base_tight 4.71 solid. Primary risk: extreme leverage (1035% D/E) creates amplified downside on miss - this is a high-beta earnings play. Bear case: housing activity could roll over on rate volatility, and leveraged capital structure has no margin for error. Despite strong setup quality, extreme leverage and binary earnings event warrant caution in mixed regime. Conviction: High (conditional on earnings outcome).

ENTRY TRIGGER

Close above $126.83 on volume >150% of 20-day avg (1.2M+ shares)

Target: $142 (12% measured move from 20-day base depth; aligns with institutional quality premium)

Stop: $121.00 (base low invalidation, ~4.5% risk)

CATALYST INTELLIGENCE

EARNINGS

Reported Oct 29; beat history mixed (TTM EPS $2.98 vs forward $6.87 implies significant margin expansion expected). Street targets $127 - consensus fully reflects current setup. Revenue growth negative (-3.9%) last quarter but forward estimates embed recovery.

BUSINESS & POSITION

Integer is a leading outsourced manufacturer of medical devices, specializing in implantable components for cardiac rhythm management (pacemakers, defibrillators), neuromodulation, and vascular access. The company holds dominant positions in high-reliability battery systems and precision components where FDA qualification creates meaningful switching costs.

FACTOR & THEME

Primary exposure to aging demographics and procedure volume recovery in electrophysiology; secondary beneficiary of OEM reshoring trends as device makers seek U.S.-based supply chain resilience. Healthcare sector currently leading (+6.6% 20d), providing favorable factor tailwind.

NEWS FLOW

No material contract announcements in last 60 days. Industry read-through: major OEMs (MDT, ABT, BSX) reported solid EP/CRM procedure volumes in Q3, validating end-market demand. No FDA actions or M&A chatter. Catalyst type: Industry (Med); Impact: Medium.

INSTITUTIONAL

Volume dry-up with price at 52-week high (99.9% proximity) suggests quiet accumulation into the base. Institutional ownership data unavailable from this feed. Zero insider buying in last 60 days - no additional conviction signal. Float is tight at 28.9M shares, amplifying any demand surge.

KEY RISK

Thesis invalid on a close below $121.00 (base low ~4.5% below current), or on FY27 guidance cut citing OEM destocking or pricing pressure. High short interest (12%, 4.1 days to cover) creates squeeze potential but also reflects bears with conviction.

Textbook base tightness (1.46) with price kissing pivot at 99.9% of 52W high, but RS line not at new high and vol dry-up is partial (vol_w1 < vol_w2 but w3 higher). Healthcare sector tailwind is real, but no imminent catalyst post-earnings and forward growth story already priced at $127 target. Bear case: negative revenue growth and elevated short interest suggest skeptics see margin expansion as optimistic. Mixed regime tempers conviction. Conviction: Medium.

ENTRY TRIGGER

Close above $44.22 on volume >140% of 20-day avg (1.5M+ shares)

Target: $50 (13% measured move; 1.1x revenue multiple expansion to peer levels)

Stop: $41.50 (base low, 4.5% risk)

CATALYST INTELLIGENCE

EARNINGS

Reported Nov 5; TTM P/E 25.7x on strong profitability (ROE 47.2%, net margin 9.3%). Revenue growth +8.6%, earnings growth +36.4% - quality compounder profile. Street target $45.60 implies 5% upside, suggesting consensus is constructive but not euphoric.

BUSINESS & POSITION

Concentra operates the largest network of occupational health centers in the U.S. (~550 locations), providing employer-sponsored injury care, physical therapy, drug testing, and urgent care services. The asset-light, recurring-revenue model benefits from employer focus on workers' comp cost reduction and return-to-work efficiency.

FACTOR & THEME

Direct exposure to employment levels and industrial activity; indirect beneficiary of healthcare cost inflation driving employers toward specialized occupational providers. Healthcare sector leadership (+6.6% 20d) and real estate adjacency (+6.2%) provide dual tailwind.

NEWS FLOW

Post-spinoff from Select Medical (2024), company trades as pure-play occupational health leader. No material contract wins or M&A in last 60 days. Employer healthcare cost theme gaining attention as 2027 benefits renewal cycle approaches. Catalyst type: Industry (Med); Impact: Medium.

INSTITUTIONAL

RS line at new high with volume drying up is classic institutional accumulation signature. High debt/equity (396%) reflects LBO-style capital structure typical of healthcare services spinoffs - not unusual but limits financial flexibility. Zero insider activity in last 60 days; absence notable given recent spinoff where management typically signals conviction.

KEY RISK

Thesis invalid on close below $41.50 (base low, ~4.5% risk), or on macro employment deterioration signaling reduced occupational health demand. Customer concentration risk if large employer contracts churn.

RS line at 52W high with vol dry-up and price 1.8% from pivot - strong institutional accumulation signature. Healthcare sector tailwind aligns. Base_tight of 4.35 is acceptable but not elite. Primary concern: no forward catalyst identified post-earnings, and spinoff structures often see lock-up expirations create supply. Bear case: high leverage limits M&A optionality and creates refinancing risk in rising rate environment. Mixed regime appropriate for B-grade. Conviction: Medium.

ENTRY TRIGGER

Close above $67.62 on volume >180% of 20-day avg (830K+ shares)

Target: $76 (12.5% measured move; aligns with 11x forward P/E re-rating)

Stop: $62.00 (base low, 5.5% risk)

CATALYST INTELLIGENCE

EARNINGS

Jan 21 - Next earnings 71 days out (Jan 21, 2027). TTM EPS $5.42, forward $6.18 (+14% growth). P/E 12.1x trailing, 10.6x forward - value profile with growth. Revenue growth +24.3%, earnings growth +26.6% - strong fundamental momentum. Street target $67.20 essentially at pivot.

BUSINESS & POSITION

Cathay General is a leading Asian-American focused regional bank with $23B+ in assets, concentrated in California, New York, and Texas metros with significant Chinese-American populations. The bank specializes in commercial real estate lending, trade finance, and SBA loans serving small-to-medium businesses.

FACTOR & THEME

Primary exposure to regional bank sentiment recovery post-2023 crisis; secondary exposure to U.S.-Asia trade flows and immigrant entrepreneurship. Small-cap leadership (IWM +2.9% vs SPY -1.6%) provides factor tailwind for regional bank setups.

NEWS FLOW

No material news in last 60 days. Sector read-through: regional bank earnings season showed stabilizing deposit costs and NIM expansion as Fed rate trajectory clarifies. No M&A chatter, regulatory actions, or CRE stress headlines specific to CATY. Catalyst type: Macro (Med); Impact: Medium - Fed commentary and regional bank sentiment drive near-term.

INSTITUTIONAL

Strict vol dry-up confirmed (vol_w1 < vol_w2 < vol_w3), RS line at new high - textbook accumulation into pivot. Short interest 7.8% with 7.1 days to cover suggests meaningful skeptic positioning that could fuel squeeze on breakout. Zero insider activity in last 60 days. Institutional ownership data unavailable.

KEY RISK

Thesis invalid on close below $62.00 (base low ~5.5% below), or on CRE stress headlines specific to California/Asian-American commercial RE portfolios. 71-day gap to earnings means setup must work on technical merit alone - no fundamental catalyst imminent.

Clean VCP structure: strict vol dry-up confirmed, RS line at new high, base_tight 4.08 acceptable. Small-cap leadership regime supports regional bank setups. Valuation compelling at 10.6x forward with 26% earnings growth. Primary weakness: 71 days to earnings means no fundamental catalyst for 10+ weeks - setup must work purely on technical/sentiment. Bear case: CRE concentration in California exposes bank to any commercial RE stress re-emergence. Conviction: Medium.

ENTRY TRIGGER

Close above $44.88 on volume >150% of 20-day avg (4.2M+ shares)

Target: $52 (16% measured move; reflects AI re-rating to peer multiples)

Stop: $42.00 (below 50-day MA, 3.5% risk)

CATALYST INTELLIGENCE

EARNINGS

Dec 01 - Earnings in 20 days (Dec 1). Forward P/E 25x on $1.74 EPS estimate vs TTM $0.69 - Street models significant margin expansion. PEG 0.61 attractive for profitable SaaS. Revenue growth +9.2%, earnings growth +80%. Beat history and guidance trends would confirm AI monetization traction. Catalyst type: Earnings (High); Impact: High.

BUSINESS & POSITION

Box provides cloud content management and file sharing for enterprises, competing with Microsoft SharePoint, Google Drive, and Dropbox. Recent pivot toward AI-powered content intelligence (Box AI) positions the company as an enabler of enterprise GenAI workflows across unstructured data.

FACTOR & THEME

Direct AI infrastructure beneficiary as enterprises seek to unlock value from unstructured content repositories. Technology sector lagging (-7.8% 20d) creates headwind, but Box's profitability (10.6% net margin) differentiates from unprofitable SaaS peers facing multiple compression.

NEWS FLOW

Box AI announcements and enterprise adoption metrics have driven narrative shift from 'legacy storage' to 'AI enablement platform.' High short interest (17.7%, 7.3 days to cover) reflects persistent skeptics who may be forced to cover on earnings beat. No recent M&A or activist activity. Street target $41.14 below current price - contrarian setup.

INSTITUTIONAL

Strict vol dry-up with RS +35% vs SPY suggests quiet repositioning despite tech sector weakness. High short interest (17.7%) with 7.3 days to cover creates meaningful squeeze potential if Dec 1 earnings surprise. Zero insider activity in last 60 days. Negative book value (P/B -17x) reflects buyback-driven capital return - not a red flag for mature SaaS.

KEY RISK

Thesis invalid on close below $42.00 (below 50-day MA, ~3.5% risk), or on Dec 1 earnings miss/guide-down that invalidates AI monetization narrative. Street target below current price means consensus is skeptical - earnings must deliver.

Strong RS (+35%) with strict vol dry-up and earnings catalyst in 20 days - catalyst timing is ideal for VCP setup. High short interest (17.7%) creates asymmetric squeeze potential on beat. However: RS line NOT at new high, tech sector lagging (-7.8%), and street target below current price signals consensus skepticism that must be overcome. Bear case: AI narrative is marketing, not revenue - if Dec 1 doesn't show AI-driven upsell traction, multiple compresses. Mixed regime + tech headwind keeps this at B despite good structure. Conviction: Medium.

Target: $66 (11.5% measured move; aligns with 11x forward P/E)

Stop: $55.50 (base low, 4% risk)

CATALYST INTELLIGENCE

EARNINGS

Reported Oct 29. TTM EPS $4.35, forward $5.17 (+19% growth). P/E 13.3x trailing, 11.2x forward - value with growth. Earnings growth +615% YoY reflects easy comp from prior year charges. Revenue down -8.6% but earnings quality improved. Street target $56.75 below current - contrarian positioning.

BUSINESS & POSITION

CNO Financial provides life insurance, annuities, and Medicare supplement products targeted at middle-income Americans and seniors through exclusive agent distribution (Bankers Life, Washington National, Colonial Penn brands). Demographic tailwind from aging population drives structural demand growth.

FACTOR & THEME

Primary exposure to aging U.S. demographics and Medicare enrollment growth; secondary exposure to interest rate environment (annuity spreads). Healthcare (+6.6%) and Financial Services sector strength provide dual tailwind in current regime.

NEWS FLOW

No material news in last 60 days. Life insurance sector benefiting from rate normalization improving spread income. Zero short interest (0.0%) is unusual - either data gap or name is completely uncrowded. No activist involvement, M&A speculation, or regulatory headlines. Catalyst type: Industry (Low); Impact: Low - no identifiable near-term catalyst.

INSTITUTIONAL

RS line at new high with price 2.1% from pivot - accumulation signature present. Vol dry-up partial (vol_w1 < vol_w2 but vol_w2 vol_w3). Zero reported short interest suggests uncrowded positioning - incremental buyer fuel available. Zero insider activity in last 60 days. Institutional data unavailable.

KEY RISK

Thesis invalid on close below $55.50 (base low, ~4% risk), or on life insurance regulatory changes or interest rate reversal compressing annuity spreads. No near-term earnings catalyst - setup relies on technical breakout alone.

RS line at new high with acceptable base_tight (4.0) and price near pivot (2.1%). Demographic tailwind is structural and under-appreciated in middle-income insurance. Vol dry-up partial but directionally supportive. Key weakness: no identifiable forward catalyst post-earnings, and street target below current price suggests muted expectations. Bear case: revenue decline (-8.6%) may indicate market share loss to digital competitors. Zero short interest is unusual - verify data. Conviction: Medium.

CATALYST INTELLIGENCE

EARNINGS

Dec 08

Extraordinary RS (+62.5% vs SPY) and sitting precisely at pivot, but base_tight of 32.19 is extremely loose - this is a momentum surge, not a VCP coil. Technology sector lagging (-7.8% 20d) creates headwind. Earnings 27 days out provides catalyst runway but current structure needs significant tightening before institutional-quality entry. Conviction: Low.

ENTRY TRIGGER

Close above $59.72 on volume >130% of 20-day avg (1.9M+ shares)

Target: $72 (20% measured move based on base depth)

Stop: $52.00 (below 50-day MA, ~11% risk)

CATALYST INTELLIGENCE

EARNINGS

REPORTED

RS line at new high and strong revenue growth (+26.2%), but base_tight of 9.94 is loose and days_in_base is only 1 - this is a fresh consolidation, not a mature VCP. Vol_ratio_today of 2.42x indicates today's volume is elevated, opposite of the quiet accumulation we seek. High short interest (13.3%) creates squeeze potential but also binary risk. Healthcare tailwind supportive. Needs 2-3 weeks of tightening. Conviction: Low.

Stop: $98.00 (below base low, ~5% risk)

CATALYST INTELLIGENCE

EARNINGS

Jan 28

Strict vol dry-up confirmed and low beta (0.21) provides defensive quality in mixed regime, but RS line not at new high and base_tight 6.41 is loose. Next earnings 78 days away - no catalyst in foreseeable window. P&C insurance hard market theme is real but well-known (crowded). Setup needs RS improvement and tightening. Conviction: Low.

QTWO

Close above $76.37 on volume >140% of 20-day avg (970K+ shares)

Target: $88 (15% measured move; aligns with street target $79.57 + momentum premium)

Stop: $70.00 (below 50-day MA, ~5.5% risk)

CATALYST INTELLIGENCE

EARNINGS

REPORTED

Strict vol dry-up with decent RS (+16%), but RS line not at new high, base_tight 5.57 is moderate, and tech sector lagging (-7.8%). Just reported Oct 28 - no earnings catalyst for ~3 months. High short interest (10.6%, 6.7 days) adds squeeze potential but also reflects skeptics. Regional bank customer base creates concentration risk. Needs RS leadership and tighter base. Conviction: Low.
