ANALYSIS

CATALYST / TODAY'S DRIVER

Just reported earnings Nov 04; stock breaking out post-print with RS line at 52-week high. Forward catalyst: Phase 2/3 data readouts for VIR-1388 (chronic hepatitis B) and VIR-2482 (influenza A) expected throughout 2027, plus potential partnership or regulatory milestone announcements for the hepatitis delta program.

BUSINESS & POSITION

Vir Biotechnology is a clinical-stage biotech focused on infectious disease therapies, leveraging its antibody platform technology. The company has multiple candidates in development targeting hepatitis B, hepatitis delta, and influenza, with GSK partnership support on certain programs.

FACTOR & THEME

Infectious disease biotech theme with renewed interest post-pandemic; benefits from chronic disease treatment tailwinds and increasing focus on antiviral innovation. Theme momentum stable, with multiple shots on goal across HBV, HDV, and flu franchises.

BREAKOUT SIGNAL

Close above $13.65 on vol >424% of 20d avg

INSTITUTIONAL

Volume 4.24x average indicates institutional participation post-earnings. Float of 141M is large for SMID-cap, suggesting room for additional fund accumulation. No insider buying in last 90 days, though post-earnings volume surge is consistent with institutional repositioning on clinical progress.

EARNINGS

REPORTED

EARNINGS CONTEXT

Reported Nov 04; stock up 11.75% today suggests beat or positive clinical update. History of volatile earnings reactions tied to clinical milestones rather than financials (pre-commercial). Next print expected Q1 2027.

KEY RISK

Thesis invalid on a close back below $12.80 (prior resistance), or on any clinical trial failure or partnership termination announcement for lead programs.

ANALYSIS

RS line at 52-week high + prox_52w 94.9 + vol 4.24x + Healthcare sector leading (+14.3%) + rs_vs_spy +54.6 = five A-grade criteria met. Disconfirming evidence: large float (141M) limits squeeze potential, and base_tight 3.86 is wider than textbook VCP standard. However, post-earnings breakout with multiple Phase 2/3 catalysts ahead in a leading sector earns conviction despite Risk-Off macro. Conviction: Medium-High.

Signal: Close above $13.65 on vol >424% of 20d avg

Vol vs Avg: 4.24x

ANALYSIS

CATALYST / TODAY'S DRIVER

Reported earnings Nov 05; breakout post-print suggests strong beat and/or guidance raise. Forward catalyst: holiday season comp sales data (December), potential margin expansion commentary at Q4 print (Feb 2027), and ongoing store expansion milestones as the company scales omnichannel presence.

BUSINESS & POSITION

Warby Parker is a vertically integrated designer, manufacturer, and retailer of prescription eyewear and contacts, operating a hybrid DTC online + physical retail model. The company is a category disruptor in affordable, design-forward eyewear with strong brand loyalty among millennials and Gen Z.

FACTOR & THEME

Consumer discretionary recovery theme + omnichannel retail transformation. Benefits from Healthcare sector leadership (+14.3% vs SPY) due to classification as medical supplies. Theme momentum accelerating as consumer spending stabilizes and DTC brands with unit economics prove durability.

BREAKOUT SIGNAL

Close above $30.21 on vol >311% of 20d avg

INSTITUTIONAL

Volume 3.11x average with $3.76B market cap indicates institutional buying post-earnings. No insider activity in last 90 days. Float 95M is substantial but turnover today suggests meaningful fund repositioning on the print. Lack of A/D rating data limits full picture.

EARNINGS

REPORTED

EARNINGS CONTEXT

Reported Nov 05; +18.56% move implies material beat and/or guidance raise. Warby has historically re-rated on execution beats as the market tests profitability at scale. Next print expected Feb 2027; watch for Q4 holiday comp strength.

KEY RISK

Thesis invalid on a close back below $28.50 (breakout pivot), or on any same-store sales guidance cut or margin compression warning at the Q4 print.

ANALYSIS

RS line at 52-week high + prox_52w 95.9 + vol 3.11x + Healthcare sector leading + rs_vs_spy +21.6 = five criteria met. Disconfirming evidence: base_tight 4.97 is wide (not a classic VCP), and Risk-Off macro is headwind for consumer discretionary. However, post-earnings momentum in leading sector with omnichannel growth narrative and RS confirmation supports the breakout. Conviction: Medium.

Signal: Close above $30.21 on vol >311% of 20d avg

Vol vs Avg: 3.11x

Days to Cover	**-**
Inst. Own	**- (data lag)**

ANALYSIS

CATALYST / TODAY'S DRIVER

Reporting earnings today (Nov 09); stock up 14% into or on the print. Forward catalyst: Q4 print (Feb 2027) will reveal full-year procedural volume trends and margin trajectory; potential M&A activity as the ASC (ambulatory surgical center) rollup continues; CMS rate updates for 2027 expected in December.

BUSINESS & POSITION

Surgery Partners operates ambulatory surgical centers and surgical hospitals across the U.S., benefiting from the multi-decade shift of procedures from high-cost inpatient to lower-cost outpatient settings. The company is a consolidator in a fragmented, high-margin sector with favorable reimbursement tailwinds.

FACTOR & THEME

Healthcare cost efficiency + outpatient migration secular trend. ASC industry benefits from aging demographics, payer preference for lower-cost sites of service, and CMS rate favorability. Theme momentum strong; SGRY at forefront of consolidation wave.

BREAKOUT SIGNAL

Close above $26.45 on vol >268% of 20d avg

INSTITUTIONAL

Volume 2.68x average on earnings day; rs_vs_spy +75.0 is exceptionally strong, indicating sustained institutional sponsorship. Float 58.8M allows for meaningful accumulation. No insider buying in last 90 days. RS line at new high confirms this is a leadership name in Healthcare, the top-performing sector this week.

EARNINGS

EARNINGS TODAY

EARNINGS CONTEXT

Earnings today; +14% suggests beat in progress or leaked positive. SGRY has a history of volatile earnings reactions tied to procedural volume and labor cost guidance. Consensus expectations and beat history unavailable but forward setup depends on sustained volume growth and margin expansion commentary.

KEY RISK

Thesis invalid on a close back below $24.80 (prior consolidation), or on any guidance cut or procedural volume deceleration at today's print or Q4.

ANALYSIS

RS line at 52-week high + prox_52w 97.2 + vol 2.68x + rs_vs_spy +75.0 (elite) + Healthcare sector leading = five A-grade criteria met. Disconfirming evidence: base_tight 8.18 is extremely wide (not a clean setup), and earnings TODAY is binary risk-stock could reverse if the print disappoints. However, RS leadership in the top sector and proximity to 52W high justify A-grade despite loose base. Conviction: Medium (binary event risk today).

Signal: Close above $26.45 on vol >268% of 20d avg

RS Line Hi	**YES**
Above 50MA	**-**
Fwd P/E	**-**
Short %	**-**
Days to Cover	**-**
Inst. Own	**- (data lag)**

ANALYSIS

CATALYST / TODAY'S DRIVER

Reporting earnings today (Nov 09); stock up 12.8% into or on the print. Forward catalyst: Q4 print (Feb 2027) will reveal annual recurring revenue (ARR) growth and contract pipeline; potential large municipal or corporate contract announcements as transit agencies and enterprises adopt on-demand microtransit solutions.

BUSINESS & POSITION

Via operates a TransitTech platform providing on-demand, dynamic routing software for public transit agencies, corporations, and school districts. The company is a niche leader in microtransit SaaS, leveraging AI-driven routing to optimize fleet utilization and reduce costs for customers.

FACTOR & THEME

Smart city infrastructure + SaaS recurring revenue model. Benefits from government spending on transit modernization, corporate shuttle demand, and the shift from fixed-route to dynamic on-demand transit. Theme momentum accelerating as cities seek cost-efficient alternatives to traditional bus routes.

BREAKOUT SIGNAL

Close above $42.55 on vol >232% of 20d avg

INSTITUTIONAL

Volume 2.32x average; rs_vs_spy +72.2 is elite, indicating strong institutional sponsorship. RS line at 52-week high confirms leadership status. Float 57.9M is manageable. No insider buying in last 90 days, but the sustained RS strength suggests smart money is positioned.

EARNINGS

EARNINGS TODAY

EARNINGS CONTEXT

Earnings today; +12.8% suggests beat in progress or positive guidance. Via is a growth-stage SaaS name; market will focus on ARR growth, net revenue retention, and contract win announcements rather than GAAP profitability. Next print expected Feb 2027.

KEY RISK

Thesis invalid on a close back below $40.00 (psychological level and recent base), or on any ARR growth deceleration or large customer churn at today's print.

ANALYSIS

RS line at 52-week high + base_tight 3.08 (clean VCP) + vol 2.32x + rs_vs_spy +72.2 (elite) + prox_52w 81.0 = five criteria met. Disconfirming evidence: earnings TODAY is binary risk, and prox_52w 81.0 leaves room to 52W high (not at breakout zone apex). However, the combination of RS leadership, tight base, and SaaS recurring revenue model in a niche growth market justify A-grade. Conviction: Medium (binary event risk today).

Signal: Close above $42.55 on vol >232% of 20d avg

RS Line Hi	**YES**
Above 50MA	**-**
Fwd P/E	**-**
Short %	**-**
Days to Cover	**-**
Inst. Own	**- (data lag)**

ANALYSIS

CATALYST / TODAY'S DRIVER

Earnings in 2 days (Nov 11); stock up 15.61% on massive volume (14.79x) ahead of the print, suggesting leaked beat or positioning. Forward catalyst: the Nov 11 print itself is the near-term binary event; beyond that, holiday season in-app purchase trends (Dec-Jan) and potential M&A interest given small cap and niche franchise.

BUSINESS & POSITION

DoubleDown Interactive operates free-to-play social casino games (DoubleDown Casino, DoubleDown Fort Knox), monetizing via in-app purchases. The company is a category leader in social casino on mobile and web, with a loyal, high-ARPU user base and profitable unit economics.

FACTOR & THEME

Digital gaming monetization + consumer discretionary. Benefits from mobile gaming tailwinds and the shift of casino entertainment online. Theme momentum stable; social casino is a mature but profitable niche with limited new entrants.

BREAKOUT SIGNAL

Close above $15.70 on vol >1479% of 20d avg

INSTITUTIONAL

Volume 14.79x average is extreme, indicating either institutional front-running of the Nov 11 print or a leaked result. Float only 16.1M makes this highly volatile and susceptible to momentum squeezes. No insider buying in last 90 days. RS line at 52-week high confirms leadership, but the setup is pre-earnings speculation rather than post-catalyst confirmation.

EARNINGS

EARNINGS IN 2D

EARNINGS CONTEXT

Earnings Nov 11 (2 days); today's 15.61% move on 14.79x volume is classic pre-earnings positioning. If the print beats, follow-through is likely; if it disappoints, the reversal will be sharp. Consensus unavailable but forward setup depends on user growth and ARPU trends in a mature category.

KEY RISK

Thesis invalid on any earnings miss or in-app revenue deceleration at the Nov 11 print, or on a close back below $14.50 post-earnings.

ANALYSIS

Volume 14.79x and prox_52w 99.5 are exceptional, and RS line at 52-week high confirms leadership. However, base_tight 7.34 is extremely wide (disqualifies from A-grade VCP), and the move is pre-earnings speculation (binary risk in 2 days) rather than post-catalyst breakout. In a Risk-Off regime, pre-earnings gaps are dangerous. Downgrade from A to B due to setup quality and timing. Conviction: Low (wait for the print).

Signal: Close above $15.70 on vol >1479% of 20d avg

Vol vs Avg: 14.79x

RS Line Hi	**no**
Above 50MA	**-**
Fwd P/E	**-**
Short %	**-**
Days to Cover	**-**
Inst. Own	**- (data lag)**

ANALYSIS

CATALYST / TODAY'S DRIVER

Reporting earnings today (Nov 09); stock up 38% on 8.48x volume, suggesting strong beat or production/hedging update. Forward catalyst: crude oil price trajectory (macro), potential asset acquisition or drilling program expansion announcements, and Q4 print (Feb 2027) revealing full-year production and free cash flow.

BUSINESS & POSITION

Greenfire Resources is a Canadian oil & gas exploration and production company focused on thermal heavy oil assets in Alberta. The company benefits from rising Canadian heavy oil differentials and is positioned as a consolidator in a fragmented basin.

FACTOR & THEME

Energy commodity exposure + Canadian heavy oil. Theme momentum mixed; oil prices stable but not in a strong uptrend. Benefits from any supply tightness or geopolitical risk premium, but vulnerable to demand destruction or inventory builds.

BREAKOUT SIGNAL

Close above $7.73 on vol >848% of 20d avg

INSTITUTIONAL

Volume 8.48x average on earnings day is institutional-scale. Float 34.1M allows for momentum squeezes. No insider buying in last 90 days. RS line NOT at new high downgrades conviction; rs_vs_spy +11.2 is modest, indicating this is not a sustained leader but an event-driven spike.

EARNINGS

EARNINGS TODAY

EARNINGS CONTEXT

Earnings today; +38% suggests major beat on production, cash flow, or hedging gains. Energy E&P names are volatile on commodity price swings and operational updates. Forward setup depends on sustaining production growth and oil price stability.

KEY RISK

Thesis invalid on a close back below $6.80 (prior resistance), or on any production miss or commodity price collapse.

ANALYSIS

Volume 8.48x and prox_52w 99.0 are exceptional, but RS line NOT at new high is disqualifying for A-grade (Qullamaggie's #1 signal). Base_tight 7.51 is extremely wide, and rs_vs_spy +11.2 is weak relative to other candidates. This is an earnings-driven spike in a commodity name, not a sustained breakout. Energy not a leading sector this week. Conviction: Low (event-driven, not durable).

Signal: Close above $7.73 on vol >848% of 20d avg

Vol vs Avg: 8.48x
