Target: \$218 (measured move from ~9% base depth added to pivot)

Stop: \$186 (below 50-day MA and base low)

CATALYST INTELLIGENCE

EARNINGS

August 6 - Next print ~Aug 6 - well outside the trigger window. TTM EPS \$7.87, trailing PE ~25x; recent quarters have shown stable occupancy gains and Medicaid rate tailwinds in TN/SC. No imminent earnings catalyst - this is a pure technical breakout setup.

BUSINESS & POSITION

National HealthCare operates skilled nursing facilities, assisted living, home health, and hospice services concentrated in the Southeast US. As a low-leverage operator with owned real estate, NHC is a defensive cash compounder benefiting from secular demographic tailwinds and improving post-COVID occupancy/reimbursement.

FACTOR & THEME

Plays defensive healthcare and aging-demographics themes that are currently bid as Cons Staples and quality-defensive leadership rotate ahead of slowing growth. Low beta (0.65) and high RS in a mixed-tape regime is exactly the cohort institutions are accumulating.

NEWS FLOW

No major company-specific catalysts last 60 days; thesis driven by industry tailwind (Industry / Med impact) of CMS rate updates and continued occupancy recovery across SNF operators (peer ENSG strength reads through). Stock is grinding to new 52-week highs on dry-up - that IS the news.

INSTITUTIONAL

Tight float (12.6M) + RS line at new high + textbook vol contraction (124k108k85k) = quiet institutional accumulation in a thinly-traded name. Zero insider buying in last 60 days but absence is not disqualifying given the structural setup.

KEY RISK

Thesis invalid on a close back below \$186 (50-day / base low) or any CMS reimbursement headline cutting SNF rates; low ADV (~120k) means a single seller can break the structure.

Clean vol dry-up, RS line at new high, prox_52w 98%, and within 2% of pivot - structural quality is A-tier, but base_tight 4.48 is loose and there's no near-term earnings catalyst, capping it at B. Strongest disconfirm: thin liquidity (120k ADV) makes the breakout fragile in any small-cap risk-off pulse. Conviction: Medium.

Close above \$218.68 on volume >150% of 20-day avg
Target: \$240 (10% measured move from base, near consensus high)
Stop: \$205 (below 50-day MA and recent swing low)

CATALYST INTELLIGENCE
EARNINGS
August 4 - Next print ~Aug 4 - outside window. Fwd PE 52x reflects early-cycle earnings recovery (EPS swinging from -\$1.52 TTM to +\$4.15 fwd); last few quarters beat consensus on both top and bottom line with raised guidance. P/E inflated but revenue growth +20% justifies the premium for cycle inflection plays.
BUSINESS & POSITION
Silicon Labs designs low-power wireless SoCs for IoT applications (smart home, industrial, medical) and is a pure-play on the IoT/edge connectivity cycle. Following a brutal 2023-24 inventory correction, revenue growth has inflected back to +20% with margin recovery still in early innings.
FACTOR & THEME
Tap on Tech leadership (+9.6% 20d) and the IoT inventory-cycle recovery; peer read-throughs from Lattice and SWKS show the semi-cycle is bifurcated but IoT-exposed names are coming back to life. Edge AI / Matter standard provides multi-year unit demand uplift.
NEWS FLOW
No major company-specific items last 30-60 days; theme is sector-driven (Industry / Med impact) - semi peers like LSCC, ALGM are basing similarly. Watch for company appearances at semi conferences in June.
INSTITUTIONAL
Vol contraction 14% with strict dry-up (491k426k421k) plus 9.6% short interest = potential squeeze fuel on a clean breakout. Zero insider buying in last 60 days but the cycle-inflection narrative typically draws growth/momentum funds rather than insiders.
KEY RISK
Thesis invalid on a close back below \$205 (50-day) or any peer guide-down indicating IoT recovery is stalling; binary risk on consumer IoT demand softening into 2H.

Within 1% of pivot with vol dry-up and 9.6% short interest provides asymmetric squeeze potential into a Tech-led tape, but RS line not at new high and IoT recovery is well-known by now - limits surprise factor. Strongest disconfirm: SLAB is no longer under-owned; semi-recovery trade is consensus, so incremental buyer fuel is finite. Conviction: Medium.

Target: \$88 (10% measured move; well above \$72.56 consensus target which appears stale)

Stop: \$70 (below 50-day MA / base low)

CATALYST INTELLIGENCE

EARNINGS

July 29 - Next print ~Jul 29 - outside trigger window. Fwd PE 37x is reasonable for +37% rev growth (PEG <1). Beat history is strong over last 4 quarters with raised guidance; consensus EPS \$2.05 fwd vs \$1.38 TTM.

BUSINESS & POSITION

Vita Coco is the #1 coconut water brand globally with ~50% US category share and expanding distribution in functional/hydration adjacencies (Vita Coco Spiked, oils). The asset-light branded-CPG model produces 37% gross margins with rev growth +37% and earnings +61% YoY - a rare hyper-growth name within Cons Staples.

FACTOR & THEME

Hits Cons Staples leadership (+4.8% 20d) AND functional-beverage secular growth (Celsius / Olipop adjacency). RS +40 vs SPY is elite - this is the highest RS name in the screen by a wide margin.

NEWS FLOW

Continued distribution gains and pricing power in coconut water category; peer read-through from Celsius weakness has not hurt COCO's relative line (Industry / Med impact). 12.8% short interest is meaningful given the +40% RS - shorts are pressing into strength, which historically is a losing trade.

INSTITUTIONAL

Vol dry-up is clean (1981k1372k1326k, 33% contraction) and short interest 12.8% with 3.9 days to cover provides genuine squeeze fuel. Zero insider buys in last 60 days but COCO is heavily founder-influenced so insider activity is uncommon.

KEY RISK

Thesis invalid on a close back below \$70 (loose base low / 50-day area) or any sign of category growth deceleration at the July print; base_tight 9.99 is loose and shows the base needs more time to fully coil.

Elite RS (+40), high short interest, and a leading-sector tailwind make this the most asymmetric long in the screen - but base_tight 9.99 is loose and 4.3% from pivot, so it's not yet A-grade. Strongest disconfirm: target price (\$72.56) sits BELOW current price, meaning sell-side is already a headwind and any soft category print could trigger downgrade cascade. Conviction: Medium-High.

Target: \$44 (10% measured move; above consensus \$35.25 which is stale)

Stop: \$35 (below 50-day MA)

CATALYST INTELLIGENCE
EARNINGS
July 22 - Next print ~Jul 22 - outside window. TTM EPS \$3.36, but fwd \$2.20 implies near-term margin compression; offshore segment guided strong but Aerospace/Defense lumpy. Mixed beat record over last 4Q.
BUSINESS & POSITION
Oceaneering is the global #1 in remotely-operated vehicles (ROVs) for subsea oil & gas operations, with growing exposure to offshore wind, defense (Navy submarine systems), and aerospace. The ROV franchise has structural pricing power as offshore deepwater capex cycle re-accelerates with Brazil, Guyana, and West Africa activity.
FACTOR & THEME
Tap on Energy sector leadership (+8.3% 20d) and offshore capex cycle - peer read-throughs from TDW, NOV, FTI show subsea services in tightest cycle since 2014. Defense segment (US Navy AUV contracts) adds optionality on defense spending theme.
NEWS FLOW
ROV utilization at multi-year highs and offshore rig count steady; expected new subsea project FIDs (Industry / Med impact) into 2H from majors. No major company-specific announcement last 30 days.
INSTITUTIONAL
Vol contraction 43% (1273k1101k722k) is one of the cleanest in screen with tight base 1.69. 7.6% short interest with 4.5 days to cover offers squeeze fuel. Zero insider buys last 60 days.
KEY RISK
Thesis invalid on a close back below \$35 (50-day) or sustained crude break below \$65 hurting offshore sentiment; 5.6% from pivot is a longer distance to trigger than peers.

Tight base (1.69) and 43% vol contraction within a leading sector (Energy +8.3%) is structurally A-quality, but 5.6% from pivot and negative RS lower the urgency to B. Strongest disconfirm: fwd EPS guide (\$2.20 vs \$3.36 TTM) implies margin compression that contradicts the cycle-recovery narrative. Conviction: Medium.

OII — 90D Base Setup | Pivot: \$40.12 (gold) | SMA: 9(blue) 21(orange) 50(green) 200(red)

Close above \$87.73 on volume >150% of 20-day avg
Target: \$96 (10% measured move)
Stop: \$74 (below 50-day MA)

CATALYST INTELLIGENCE

EARNINGS

July 29 - Next print ~Jul 29 - outside trigger window. Fwd PE 26x vs trailing 86x reflects sharp earnings inflection (EPS \$0.94 TTM \$3.10 fwd); last 2 quarters beat with raised A&D guide. Serial-improving margin story.

BUSINESS & POSITION

Benchmark Electronics is a tier-2 electronics manufacturing services (EMS) provider focused on aerospace/defense, medical, and complex industrial customers - explicitly the high-mix/low-volume niche peers like Flex avoid. Earnings inflecting hard (+260% YoY) as A&D mix expands and operating leverage kicks in.

FACTOR & THEME

Plays defense spending + reshoring + medical capex themes simultaneously. RS +35 vs SPY is elite - second-highest in the screen behind COCO. Tech sector leadership (+9.6%) provides tailwind.

NEWS FLOW

A&D segment continues to be strongest end-market with multi-year contract visibility (Industry / High impact); peer SANM and CLS strength confirms the EMS A&D cycle is real. No specific contract awards in last 30 days but order book commentary on next call is the catalyst.

INSTITUTIONAL

Vol contraction 39% with tight ratio today (0.45) shows institutions sitting on bids during the coil. RS line near (not at) 52-week high, supporting accumulation thesis. Zero insider buys in last 60 days.

KEY RISK

Thesis invalid on a close back below \$74 (50-day) or any A&D customer push-out commentary; 7.9% from pivot is the widest distance in the screen, raising the risk of base failure before trigger.

Elite RS (+34.8) and A&D earnings inflection within Tech leadership is genuine alpha, but 7.9% from pivot and base_tight 5.7 mean this is more a 2-3 week watch than imminent trigger. Strongest disconfirm: consensus target (\$78) sits below spot, signaling sell-side has not caught up - could go either way as a contrarian tell or as fundamental warning. Conviction: Medium.
