Trend and setup. Long-term trend broken; short-term correction below the 20-day and 50-day averages.

Range over the last 20 completed sessions spans 24.3% of its floor. [DER]

What confirms improvement. A completed-session close above the 20-day average at 103.32 (+8.2%), on participation above the 20-session average. [DER]

What weakens it. A completed-session close below 87.05 (documented low). That is a structural level, not an order level. [DER]

Participation and relative strength. Turnover is 1.63x the 20-session average; the 12-week return is +1.2% against SPY over identical sessions; the relative-strength line sits 28.7% below its window high. Volume is a measure of how much traded, not of who traded it. [DER]

Catalyst status. No verified company-specific driver. No issuer disclosure inside the last 21 days explains the current tape; press coverage is listed below but is not evidence of cause. Next dated event: 2026-07-22 (vendor-estimated (data provider, not confirmed by the issuer)). [OBS]

What changed since the previous report

No published prior report to compare against for NOW: no prior report on file. Nothing below is a change measurement. [OBS]

Thesis

- Revenue grew 22.1% y/y in the quarter ended 2026-03-31 (GAAP, as filed)
- Net margin of 12.4% on the same quarter
- Operating cash flow of \$1670M in the quarter (GAAP, as filed).

What would change the read

- Failure to reclaim the 200-day average at 127.57 keeps the long-term trend broken. [any session close]
- A close below the 60-session closing low at 87.05 puts price outside the range it has held. [any session close]

Business position and themes

“ServiceNow, Inc.” (Software - Application; 29,187 employees) [OBS] Revenue was \$3.77B in the most recent reported quarter, +22.1% against the same quarter a year earlier, at a 75.1% GAAP gross margin. [DER] No segment revenue mix, market-share estimate or installed-base figure is ingested here, so none is claimed. [OBS]

As the company reports it

AVAILABLE_NOT_INGESTED — the earnings exhibit is public and fetchable, but this report could not read it: no GAAP-to-non-GAAP reconciliation found. That is a gap in our parser, not an absence of disclosure. [OBS]

Valuation

P/E, trailing 56.8x — \$95.46 / \$1.68. GAAP diluted, not vendor-adjusted

Market, positioning and flow

120 completed sessions: candles, SMA 9/21/50/200, volume against its 20-session average, Wilder RSI(14) with 30/70 guides. 12-month structural view in the appendix.

Moving-average levels

Level	Price	Distance	Reads as
20-day average	103.32	+8.2%	improvement if reclaimed
50-day average	103.91	+8.9%	improvement if reclaimed
200-day average	127.57	+33.6%	improvement if reclaimed

Risk boundary — structural

87.05. 60-session closing low, the lowest close the stock has printed in this window. That is 1.4 x ATR(14) below spot, against a 1.0 x floor for this holding period (swing (2-8 weeks), the window the 20/50-day levels speak to). [DER]

Structural boundary: the edge of the range price has traded, not a swing stop. 60-session closing low 87.05; 60-session closing high 135.86; 52-week closing high 199.24. It marks where the structural read stops holding; it is not an order level and no position is implied.

Insider transactions

Filed Form 4 activity over the last 180 days, by transaction type. A Form 4 records what an insider did, not why. Sales under a plan adopted earlier, shares surrendered to cover tax on a vest, and a discretionary open-market sale all file the same way, and this report does not read any of them as a view on the stock.

Transaction type	Count	Reading
Open-market purchases	2	discretionary status unknown
Open-market sales	6	discretionary status unknown
Sales under a documented 10b5-1 plan	0	none filed in the window
