

Appendix

This document is the audit trail for the four-page brief prepared 2026-07-22 17:29 ET. It is not a summary and is not meant to be read front to back.

D. Schedule 13D / 13G filings on record

Ownership interpretation unavailable: 6 of 6 could not be attributed to a named filer. No stake size is parsed from any filing body, so the count below is a count of filings and nothing more.

E. Not covered, and why

These are gaps in what we can source. None of them is a negative finding about the business.

- non-GAAP margins — published in the press-release exhibit; this run did not ingest it (no GAAP-to-non-GAAP reconciliation found) [OBS]
- revenue by end market or geography — segment detail is not exposed by the company-concept API this report reads [OBS]
- analyst estimates — not a filed fact [OBS]
- options chain, open interest and implied volatility — no feed is wired into this report [OBS]

F. Sampled message-board records

Raw, unverified, anonymous. Kept out of the brief on purpose and reproduced here only so the counts on page 4 can be checked. Every fetched post is in the evidence package with its hash, classification and disposition; this page carries screened representative excerpts.
