ANALYSIS
CATALYST / TODAY'S DRIVER
Breakout to all-time highs on sustained margin expansion in specialty products division and Montana renewables ramp. Forward catalyst: November 6 earnings (88d) will be critical test of full-year guidance raise potential and renewable diesel profitability inflection.
BUSINESS & POSITION
Calumet produces specialty hydrocarbon and fuel products including solvents, waxes, and renewable diesel, with recent strategic pivot toward higher-margin specialty chemicals and renewable fuels. The company has been executing a turnaround focused on deleveraging and EBITDA improvement through asset optimization.
FACTOR & THEME
Taps energy transition (renewable diesel capacity buildout in Montana) and Materials sector momentum (+4.7% vs SPY this week). Specialty chemicals pricing power in a firming industrial demand environment provides secular tailwind.
BREAKOUT SIGNAL
Close above \$44.83 on volume >1.6x of 20d avg
INSTITUTIONAL
Volume at 1.57x is below institutional breakout threshold (prefer >2x), suggesting this may still be early-stage accumulation rather than block buying. Float of 58M is manageable but the lack of volume surge raises questions about conviction. Zero insider buying in last 90 days removes a key conviction signal.
EARNINGS
EARNINGS IN 88D
EARNINGS CONTEXT
Next print November 6. Company has been beating on EBITDA but consensus remains cautious on leverage metrics. Last quarter showed margin expansion in specialty products. Serial beater status not yet established.
KEY RISK
Thesis invalidated on close below \$42.00 (prior resistance now support), or if November earnings show renewable diesel margins compressing below expectations, negating the growth narrative.
ANALYSIS
At 99.2% of 52-week highs with tight 2.66 base and +33.8 RS, the technical setup is clean. However, RS line NOT at new high (critical Qullamaggie A-grade signal missing), volume surge modest at 1.57x (institutional threshold is 2x+), and the stock sits in a macro crosswind (mega-cap leadership, SMID facing headwinds). Strongest disconfirming evidence: volume profile suggests retail participation, not institutional block buying. Materials sector tailwind provides support but conviction hinges on November earnings execution. Conviction: Medium.
Signal: Close above \$44.83 on volume >1.6x of 20d avg
Vol vs Avg: 1.57x

RDNT

RadNet, Inc.

\$77.33

+6.83%

RS vs SPY: +33.5%

B STRONG SETUP

\$6.1B Cap | 66M Float

Diagnostics & Research | Theme: Healthcare Diagnostics | 52W Hi: 90% | Base Tight: 4.65 | Vol: 1.77x | RS/SPY: +33.5% | Above 20MA: YES | EARNINGS IN 87D

ANALYSIS
CATALYST / TODAY'S DRIVER Move likely driven by sector rotation into Healthcare (leading sector +6.1% vs SPY) and imaging volume trends post-summer. Forward catalyst: November 5 earnings (87d) will test AI-enabled diagnostic rollout progress, same-center growth, and DeepHealth AI contribution to margins.
BUSINESS & POSITION RadNet operates the largest network of outpatient imaging centers in the U.S., with 350+ facilities across key markets. The company is integrating AI (DeepHealth acquisition) to improve diagnostic accuracy and workflow efficiency, positioning for margin expansion and competitive moat deepening.
FACTOR & THEME Direct play on healthcare utilization recovery and AI integration in diagnostics. Benefits from aging demographics, chronic disease screening demand, and healthcare sector leadership. AI-driven workflow efficiency is margin expansion catalyst, though theme is early-stage in diagnostics vs. pure software plays.
BREAKOUT SIGNAL Close above \$77.33 on volume >1.8x of 20d avg
INSTITUTIONAL Volume at 1.77x is elevated but below the 2x+ institutional breakout threshold. Float of 66M is reasonable. Zero insider buying in last 90 days is a missed conviction signal-insiders not participating at 90% of highs. Sector leadership provides tailwind but smart money confirmation is absent.
EARNINGS EARNINGS IN 87D
EARNINGS CONTEXT Next print November 5. RadNet has history of volatile reactions tied to same-center volume growth and margin guidance. AI contribution to financials is still emerging narrative. Need to verify serial beat status-data insufficient to confirm.
KEY RISK Invalidated on close below \$72.00 (50-day MA zone and prior consolidation support), or if November earnings show imaging volumes disappointing or AI integration costs pressuring margins without visible ROI.
ANALYSIS Strong +33.5 RS and 90.1% proximity to highs in the week's leading sector (Healthcare +6.1%) make this a legitimate sector-driven breakout. However, base_tight at 4.65 is loose (prefer <3.0 for clean setups), RS line NOT at new high (key O'Neill/Qullamaggie A-grade signal missing), and volume at 1.77x is just shy of institutional conviction threshold. Strongest disconfirming evidence: zero insider buying while stock is 10% from highs-management not adding capital. Sector momentum is real but individual setup quality is second-tier. Conviction: Medium.
Signal: Close above \$77.33 on volume >1.8x of 20d avg Vol vs Avg: 1.77x
