

STOCKBEE -- 15%+ IN A WEEK

Up 15%+ over the last 5 trading days | \$100M+ dollar volume

September 13, 2026 - 04:42 PM ET

METHODOLOGY

Stockbee's '20% Plus in a Week' momentum screen, relaxed to 15% to keep the list populated on quieter weeks -- names that have surged 15%+ over the last five trading sessions. These are the market's most explosive short-term movers, often reacting to earnings, news, or sector rotation.

Membership criteria: (1) up 15%+ over the last 5 trading days; (2) 20-day average dollar volume >= \$100M (a liquidity floor so only tradeable names appear).

A large list signals a strong, broad momentum environment; a short list signals a narrow or risk-off tape. Sorted by dollar volume -- the most liquid movers first.

Next Ern = next scheduled earnings date (* = estimated/unconfirmed window; 'Reported' = reported within the last 10 days). A momentum run INTO earnings carries binary event risk; a run just AFTER a report is reacting to news.
