Target: \$185.00 - measured move from 20-day base depth (~\$13 added to pivot) plus implied revaluation toward peer multiples
Stop: \$155.50 - below base low and 50-day MA; loss of this level negates Stage 2 structure

CATALYST INTELLIGENCE

EARNINGS

October 29 - Street expects ~\$3.20 EPS on ~\$2.4B revenue. Company has beaten EPS estimates in 7 of last 8 quarters; last quarter delivered 76% earnings growth YoY with 14.7% revenue growth. Forward P/E of 12.3x vs peer group at 18-22x represents significant discount. Management raised guidance in prior quarter citing strong enterprise demand.

BUSINESS & POSITION

Insight Enterprises is a Fortune 500 IT solutions integrator providing hardware, software, cloud solutions, and digital transformation services to enterprise clients globally. The company sits at the intersection of AI infrastructure buildout and enterprise IT modernization, acting as a value-added reseller and managed services provider with deep relationships across Microsoft, AWS, and major hardware vendors.

FACTOR & THEME

Direct exposure to enterprise AI infrastructure spend as companies upgrade data centers and deploy AI workloads; benefits from cloud migration tailwinds and Microsoft Copilot rollouts. Peer read-through: CDW (+18% YTD) and similar VAR/MSP names have outperformed on AI demand pull-through - NSIT trades at half CDW's valuation multiple despite similar growth profile.

NEWS FLOW

Q2 results in August showed accelerating enterprise AI-related project wins with management highlighting 'unprecedented demand for AI infrastructure solutions.' No major contract announcements in past 30 days but company presenting at multiple fall tech conferences. Catalyst Impact: Earnings (High) - October 29 print could validate AI demand thesis and close valuation gap to peers.

INSTITUTIONAL

Textbook quiet accumulation pattern: volume contracting sharply (274K last week vs 505K three weeks ago) while price holds within 3% of highs suggests institutional repositioning ahead of earnings. No insider activity in last 60 days - baseline for this name. Float of 28.8M shares with 5.9% short interest (4.1 days to cover) creates squeeze potential on earnings beat.

KEY RISK

Thesis invalid on a close below \$155.50 (base low/50-day MA confluence) or if October 29 earnings show enterprise IT spend deceleration; customer concentration risk with top 5 clients representing ~20% of revenue.

Textbook VCP with strict volume contraction confirmed, base_tight 1.92, price 3% from pivot in leading Technology sector. High-conviction catalyst in 20 days with serial beat history and AI infrastructure demand tailwind. Bear case: enterprise IT budgets could tighten if macro deteriorates, and RS line not yet at new high despite strong +32.8 vs SPY. Large-cap leadership regime is headwind for SMID, but NSIT's \$4.8B cap and Tech sector exposure provide partial insulation. Conviction: High.

Target Pr.	\$38.71

ENTRY TRIGGER
Close above \$36.87 on volume >125% of 20-day average (3.6M+ shares)
Target: \$42.00 - measured move from base plus short squeeze premium; analyst consensus at \$38.71 provides near-term resistance
Stop: \$34.00 - below 10-day consolidation low; invalidates tight coil thesis

CATALYST INTELLIGENCE
EARNINGS
Last reported August 25 - beat EPS (\$0.43 vs \$0.40 est) and raised FY guidance. Street models 80% earnings growth for FY with 9% revenue growth indicating strong margin expansion. PEG of 0.61 suggests market undervaluing growth trajectory. Next earnings likely late November/early December (fiscal Q3).
BUSINESS & POSITION
Box provides cloud content management and collaboration platform serving 100K+ businesses globally, enabling secure file sharing, workflow automation, and increasingly AI-powered content intelligence. Company has pivoted toward enterprise AI with Box AI features integrating generative AI directly into content workflows.
FACTOR & THEME
Positioned in enterprise AI productivity suite theme alongside Microsoft and Google; beneficiary of hybrid work permanence driving cloud content demand. 15.3% short interest with 5.6 days to cover creates asymmetric squeeze setup if AI narrative gains traction. Peer action: DDOG, ZS, and infrastructure SaaS names rallying on AI integration stories.
NEWS FLOW
August earnings catalyst behind; stock up 70%+ from 52-week lows following AI feature announcements and margin expansion story. No imminent corporate catalyst but Box AI adoption metrics in next print could be material. Catalyst Impact: Industry (Medium) - AI enterprise adoption narratives continue to drive re-ratings for productivity software names.
INSTITUTIONAL
RS line at 52-week high confirms institutional rotation into name; volume dry-up with price at highs suggests accumulation complete and breakout imminent. High short interest (15.3%) means incremental buying could trigger covering cascade. No insider activity in 60 days - not unusual for mature SaaS. Low beta (0.72) provides defensive quality in uncertain tape.
KEY RISK
Thesis invalid on close below \$34.00 (would break tight consolidation pattern); loose base (4.95) is structural weakness. Competition from Microsoft OneDrive/SharePoint remains existential threat; 379% debt/equity elevated for software company.

RS line at new high with volume dry-up and 1.3% to pivot is constructive, but base_tight at 4.95 is notably loose - disqualifies from A-grade despite proximity to breakout. No earnings catalyst for 6+ weeks reduces near-term alpha asymmetry. Bear case: Microsoft Copilot bundling could pressure Box's enterprise value proposition, and high valuation (52x trailing P/E) leaves little room for execution missteps. Risk-on regime favors Tech names but large-cap leadership may limit SMID follow-through. Conviction: Medium.

ENTRY TRIGGER
Close above \$37.26 on volume >120% of 20-day average (1.1M+ shares)
Target: \$41.00 - analyst consensus target and natural resistance; measured move supports \$42+
Stop: \$35.50 - below recent consolidation and would represent failed breakout

CATALYST INTELLIGENCE
EARNINGS
November 05 - As relatively new public company (2024 spin), limited beat/miss history. Last quarter showed 10% revenue growth and 47% earnings growth indicating strong operating leverage. Forward P/E of 20.2x reasonable for defensive healthcare services grower. Street targets at \$41 imply 10% upside.
BUSINESS & POSITION
Concentra operates 550+ occupational health centers nationwide providing employer-focused urgent care, physical therapy, and workplace injury management. Spun off from Select Medical in 2024, the company benefits from tight labor markets driving employer investment in workforce health and return-to-work programs.
FACTOR & THEME
Defensive healthcare exposure with counter-cyclical employment health demand; rising workers' comp costs driving employer outsourcing to specialized providers. Healthcare sector +1.8% trailing 20 days provides sector tailwind. Not a GLP-1 or biotech play - pure healthcare services with predictable cash flows.
NEWS FLOW
Post-spin story gaining institutional awareness; company expanding urgent care footprint and winning new employer contracts. No major catalyst announced but earnings in 27 days could highlight continued employer health spend momentum. Catalyst Impact: Earnings (Medium) - November 5 print is key to validating growth trajectory post-spin.
INSTITUTIONAL
RS line at new high with price 0.2% from pivot - breakout imminent. Volume contraction only partial (vol_w2 < vol_w1 but vol_w3 higher), suggesting some choppiness in accumulation pattern. No insider activity in 60 days, though post-spin lockups may still be in effect limiting insider transactions. Low short interest (4.5%) means limited squeeze fuel.

KEY RISK
Thesis invalid on close below \$35.50 (10-day consolidation low); high debt/equity at 423% is material leverage risk. Economic recession would pressure employer healthcare budgets; relatively new public company with limited track record.
Extremely tight to pivot (0.2%) with RS line at new high in leading Healthcare sector. However, volume contraction is only partial (not strict), base_tight at 2.86 is merely adequate, and post-spin company lacks institutional familiarity. Bear case: 423% debt/equity from spin creates refinancing risk if rates stay elevated, and economic slowdown could pressure employer health spending. Defensive characteristics partially offset SMID headwind in large-cap leadership regime. Conviction: Medium.

Target: \$230.00 - breakout measured move plus revaluation toward peer multiples
Stop: \$195.00 - below 50-day MA and consolidation low; loss negates accumulation thesis

CATALYST INTELLIGENCE
EARNINGS
November 03 - Street expects ~\$1.95 EPS on ~\$175M revenue. Company has consistent beat history with 16% earnings growth trajectory. Importantly, QLYS is already highly profitable (29% net margin) unlike many cybersecurity peers burning cash. PEG of 3.43 is elevated but reflects quality premium.
BUSINESS & POSITION
Qualys provides cloud-based IT security and compliance solutions, specializing in vulnerability management, policy compliance, and web application scanning. The company's platform enables enterprises to identify and remediate security risks across hybrid IT environments - a critical function as attack surfaces expand.
FACTOR & THEME
Core cybersecurity theme exposure with regulatory tailwinds (SEC cyber disclosure rules, CISA mandates) driving enterprise security spend. Peer read-through: CRWD and PANW have led cybersecurity rally, but QLYS trades at significant discount (24x forward vs 40x+ for peers) despite 83% gross margins and 34% operating margins - best-in-class profitability.
NEWS FLOW
No major contract wins announced in past 30 days but cybersecurity spending remains elevated following high-profile breaches. Company's FedRAMP authorizations position it for government contract wins. Catalyst Impact: Earnings (High) - November 3 print in 25 days with potential for government cyber contract commentary.
INSTITUTIONAL
RS line at 52-week high with price 1% from pivot - institutions clearly accumulating. However, volume pattern is irregular (vol_w2 < vol_w1 but vol_w3 > vol_w2), failing strict dry-up criteria. 13.8% short interest with 5.1 days to cover creates squeeze potential. No insider activity in 60 days. Low beta (0.6) provides defensive characteristics.
KEY RISK
Thesis invalid on close below \$195.00 (50-day MA and recent consolidation low); base_tight at 3.19 suggests some distribution mixed with accumulation. Analyst consensus target at \$179 below current price signals Street skepticism - contrarian setup requires earnings beat to validate.

RS line at new high with cybersecurity tailwinds and earnings catalyst in 25 days, but volume pattern fails strict dry-up (irregular week-over-week) and base_tight at 3.19 is loose for A-grade consideration. Strongest bear case: analyst consensus at \$179 (12% below current) suggests Street doesn't believe the multiple expansion story - this is a crowded sector with CRWD/PANW absorbing most flows. Low beta provides some insulation from SMID headwinds. Conviction: Medium.

QLYS — 90D Base Setup | Pivot: \$204.41 (gold) | SMA: 9(blue) 21(orange) 50(green) 200(red)

Target Pr.	\$112.09

ENTRY TRIGGER
Close above \$112.94 on volume >150% of 20-day average (1.1M+ shares)
Target: \$130.00 - measured move from base; analyst consensus at \$112 suggests near-term resistance until earnings rerates Street view
Stop: \$102.00 - below base low; loss invalidates accumulation and Stage 2 structure

CATALYST INTELLIGENCE
EARNINGS
November 03 - Company is pre-profit (negative \$0.60 TTM EPS) but Street expects \$1.28 forward EPS representing path to profitability. Valuation reflects growth-stage premium - P/E inapplicable; use P/S of 7.6x which is elevated but reasonable for 41% revenue grower. Beat history mixed given recent IPO vintage.
BUSINESS & POSITION
Xometry operates an AI-driven marketplace connecting buyers needing custom parts with a network of 10,000+ manufacturing suppliers globally. The platform uses machine learning for instant quoting, supplier matching, and quality prediction - essentially the 'Amazon of custom manufacturing' enabling rapid prototyping and production.
FACTOR & THEME
Direct reshoring beneficiary as companies diversify supply chains away from China; AI/ML platform story with network effects. 41% revenue growth indicates rapid adoption. Peer action: industrials with tech enablement (AXON, TRMB) have outperformed traditional industrials significantly.
NEWS FLOW
Company has been winning enterprise manufacturing contracts as Fortune 500 companies digitize procurement. Recent partnership announcements with major industrial OEMs validate marketplace model. 8.5% short interest creates squeeze potential if profitability path becomes clearer. Catalyst Impact: Earnings (High) - November 3 is key inflection point for profitability narrative.
INSTITUTIONAL
RS line at new high confirms institutional discovery of reshoring/AI manufacturing theme. Volume contraction partial (vol_w1 < vol_w2 but vol_w3 higher), suggesting some distribution. No insider activity in 60 days. High beta (1.23) means this will move aggressively in either direction - asymmetric if breakout triggers short covering.

KEY RISK
Thesis invalid on close below \$102.00 (base low) or if November 3 earnings show margin compression; company remains unprofitable with execution risk on path to profitability. High beta (1.23) means SMID headwind in large-cap leadership regime is amplified.

Compelling reshoring/AI theme with RS line at new high and earnings catalyst in 25 days, but base_tight at 4.94 is notably loose and volume contraction only partial. Pre-profit company with high beta faces maximum headwind in current large-cap leadership regime. Bear case: path to profitability depends on operating leverage that may not materialize if manufacturing demand softens - Street consensus at current price suggests limited incremental buyers until earnings prove the model. Conviction: Medium-Low.

Target: \$125.00 - analyst consensus target; squeeze mechanics could push higher
Stop: \$100.00 - below psychological support and base structure

CATALYST INTELLIGENCE
EARNINGS
December 01 - Street expects strong holiday preview with forward P/E of 7.7x representing deep value if consumer holds. Revenue slightly negative (-0.5%) but earnings power intact. Company has been serial beater, using cash flow for aggressive buybacks. December 1 print is post-holiday-kickoff, critical for full-year guidance.
BUSINESS & POSITION
Signet is the world's largest retailer of diamond jewelry, operating Kay Jewelers, Zales, Jared, and Blue Nile brands across 2,700+ locations. Company has transformed through digital integration and lab-grown diamond adoption, improving margins while maintaining category leadership in engagement and fashion jewelry.
FACTOR & THEME
Consumer recovery play tied to employment strength and wedding/engagement cycle. 21.4% short interest with 5.6 days to cover creates significant squeeze potential on positive consumer data. However, Consumer Cyclical sector not in leadership - headwind to thesis. Lab-grown diamond adoption is margin tailwind but category risk.
NEWS FLOW
No major corporate catalyst in past 30 days. Holiday selling season beginning provides natural industry catalyst but stock must navigate 53 days to earnings - extended catalyst void. Short interest at 21.4% is highest in this candidate set. Catalyst Impact: Industry (Medium) - holiday retail data will move the stock before earnings.
INSTITUTIONAL
Volume dry-up confirmed with tight base (2.03), but RS line NOT at new high despite strong +20 vs SPY - suggests institutions not yet fully committed. High short interest is double-edged: squeeze potential but also informed skepticism about consumer durability. No insider activity in 60 days.

KEY RISK
Thesis invalid on close below \$100.00 (psychological support and base low area); 53 days to earnings is extended period without corporate catalyst. Consumer spending deterioration would hit discretionary jewelry first; high short interest reflects real bear thesis about consumer health.

Attractive VCP structure with strict volume contraction, tight base (2.03), and significant short squeeze potential at 21.4% short interest. However, RS line not at new high despite recent strength, and 53 days to earnings creates extended catalyst void. Consumer Cyclical sector lagging in current regime. Bear case: elevated short interest reflects informed view that consumer discretionary spending on luxury items like jewelry will deteriorate - the shorts may be right. Conviction: Medium-Low.

CATALYST INTELLIGENCE

EARNINGS

November 06

Good base structure (1.87 tight) with confirmed vol dry-up, but RS line not at new high (+4.3 vs SPY is weak), extremely thin liquidity (90K weekly volume), and forward P/E of 528x suggests earnings normalization risk. Healthcare sector in leadership but this is nursing home exposure, not high-growth healthcare. Monitor for RS improvement before promoting. Conviction: Low.

CATALYST INTELLIGENCE

EARNINGS

November 25

Exceptional RS vs SPY (+49.7) but RS line NOT at new high (prox_52w only 91.9%), volume contraction weak at 10.6%, and 47 days to earnings is extended catalyst void. Consumer Cyclical sector lagging in current regime. High short interest (17.2%) cuts both ways. Monitor for RS line breakout and tighter volume pattern. Conviction: Low.

ENTRY TRIGGER

Close above \$144.95 on volume >130% of 20-day average (2.0M+ shares)

Target: \$165.00 - analyst consensus target

Stop: \$135.00 - below base low and 50-day MA

EARNINGS
REPORTED

Decent VCP structure with vol dry-up confirmed, but RS line not at new high, RS vs SPY weak (+6.4), and no earnings catalyst (last reported September 8). Industrials sector neutral and commercial real estate exposure is headwind given office vacancy concerns. Boring but stable - lacks alpha catalyst for promotion. Conviction: Low.

CATALYST INTELLIGENCE

EARNINGS

November 09

Tight base (2.02) with confirmed vol dry-up, but RS vs SPY very weak (+3.1) and RS line not at new high despite Tech sector leadership. Earnings growth negative (-28%) is concerning fundamental deterioration. Similar AI infrastructure theme as NSIT but weaker execution metrics and relative strength. Monitor; NSIT is superior play on same theme. Conviction: Low.

CATALYST INTELLIGENCE

EARNINGS

November 05

Volume contraction weak at 15.6%, RS vs SPY anemic (+2.7), RS line not at new high, and earnings growth negative (-23.4%). Smart home theme has cooled from 2021-2022 highs. Technical setup adequate but fundamental deterioration and lack of relative strength disqualify from actionable grade. Monitor for trend change. Conviction: Low.

CATALYST INTELLIGENCE
EARNINGS

October 30

Very tight to pivot (0.5%) with strong volume contraction, but RS vs SPY negative (-0.2) - underperforming the market. Utilities sector not in leadership and this is defensive, low-beta (0.17) name with no growth catalyst. 190% earnings growth is one-time normalization, not sustainable trajectory. Wrong profile for momentum strategy. Conviction: Low.

ENTRY TRIGGER
