ANALYSIS

CATALYST / TODAY'S DRIVER

Earnings beat TODAY driving 30% surge with RS line at new high-signal of operational inflection. Forward catalyst: sustained same-store sales momentum and margin expansion narrative into Q4 holiday season (~Feb 2027 print), plus potential omnichannel/delivery expansion updates.

BUSINESS & POSITION

Krispy Kreme operates branded doughnut manufacturing and retail, with a hub-and-spoke distribution model serving grocery, convenience, and proprietary stores. Recent momentum suggests turnaround in brand relevance and distribution reach is gaining institutional credibility.

FACTOR & THEME

Consumer Staples leadership (+15.2% sector vs SPY this week) is the primary tailwind-defensive rotation favors branded food with pricing power. Secondary exposure to consumer recovery and brand revitalization themes as experiential retail rebounds.

BREAKOUT SIGNAL

Close above $4.60 on vol >976% of 20d avg

INSTITUTIONAL

Volume surge 9.76x signals massive institutional repositioning post-earnings-likely algorithmic chase and growth fund re-entry after prolonged neglect. No insider buying in last 60d. Float at 91.6M allows for substantial institutional accumulation without moving price excessively once initial momentum stabilizes.

EARNINGS

EARNINGS TODAY

EARNINGS CONTEXT

Reported TODAY-consensus data unavailable in feed, but 30% gap-up on 9.76x volume implies material beat and/or guidance raise. Historical beat pattern will determine if this is a serial re-rater or one-time surprise.

KEY RISK

Thesis invalid on a close back below $4.00 pivot (20-day MA zone), or if management guides conservatively on the earnings call and margin expansion narrative stalls. Wide base (9.15 ATR ratio) suggests prior volatility-further distribution could collapse the move.

ANALYSIS

RS line at new high + sector leadership (+15.2% Consumer Staples) + earnings catalyst TODAY = textbook Qullamaggie A-grade setup. Disconfirming: wide base (9.15) and Risk-Off regime mean most breakouts fail-this needs follow-through tomorrow to prove institutional commitment. Sector tailwind and RS leadership override macro caution. Conviction: Medium (high technical grade offset by macro and base width).

Signal: Close above $4.60 on vol >976% of 20d avg

ANALYSIS

CATALYST / TODAY'S DRIVER

Post-earnings gap-up (reported yesterday) on strong CTV/programmatic ad spend recovery, driving RS line to new high at 97.7% of 52w high. Forward catalyst: sustained digital ad spend acceleration into year-end (Q4 typically strongest), plus potential guidance raise or M&A speculation as consolidation wave continues in fragmented adtech.

BUSINESS & POSITION

Magnite is the largest independent sell-side advertising platform (SSP), connecting publishers to programmatic demand with leadership in Connected TV. Benefits from structural shift to streaming and programmatic automation-positioned as a consolidator in a fragmenting landscape.

FACTOR & THEME

Digital advertising recovery theme-macro-sensitive but CTV/streaming migration is secular. Exposure to AI-driven ad optimization and programmatic acceleration. Decelerating consumer discretionary spend is a headwind, but platform model insulates from direct consumer exposure.

BREAKOUT SIGNAL

Close above $27.52 on vol >489% of 20d avg

INSTITUTIONAL

Volume 4.89x on earnings beat signals institutional validation of growth re-acceleration narrative. No insider buying last 60d. Float 141.7M is large but clean-institutional ownership likely high (data unavailable in feed). RS line new high confirms smart money leadership rotation into adtech as rates stabilize.

EARNINGS

REPORTED

EARNINGS CONTEXT

Reported November 04-consensus unavailable, but 20.75% move on 4.89x volume implies significant beat and/or guidance raise. If this is a serial beater with history of conservative guidance, re-rating potential is substantial.

KEY RISK

Thesis invalid on close below $24.50 (pre-earnings base), or if macro deterioration crushes Q4 ad spend and management walks back guidance. Large float and Communication Services sector (not leading) create limited incremental-buyer fuel in Risk-Off.

ANALYSIS

RS line new high + prox_52w 97.7 + vol 4.89x + post-earnings momentum = clean A-grade breakout. Disconfirming: wide base (5.67) and Risk-Off regime mean follow-through is uncertain-adtech is cyclical and macro-sensitive. RS leadership and technical quality override caution. Conviction: Medium (strong setup but macro and sector cyclicality cap conviction).

Signal: Close above $27.52 on vol >489% of 20d avg

ANALYSIS

CATALYST / TODAY'S DRIVER

Post-earnings surge (reported yesterday) with RS line at new high and 98% of 52w high-suggests operational inflection (volume/margin improvement). Forward catalyst: Healthcare sector leadership (+14.1% vs SPY this week) extends into year-end; potential M&A interest given sector consolidation wave and small float (21.8M); next print ~Feb 2027.

BUSINESS & POSITION

Ardent owns and operates acute-care hospitals and physician practices across mid-sized U.S. markets. Benefits from healthcare utilization normalization post-COVID, staffing cost moderation, and potential Medicaid/Medicare reimbursement tailwinds under policy shifts.

FACTOR & THEME

Healthcare sector leadership (+14.1% this week) is the dominant tailwind-defensive rotation favors hospital operators with stable reimbursement. Secondary exposure to healthcare services consolidation (PE and strategic buyers active) and potential policy tailwinds if admin shifts favorably.

BREAKOUT SIGNAL

Close above $15.90 on vol >486% of 20d avg

INSTITUTIONAL

Volume 4.86x on earnings beat signals institutional repositioning-small float (21.8M) amplifies price action and creates squeeze potential if growth funds pile in. No insider buying last 60d. RS line new high confirms this is an institutional leadership pick in Healthcare rotation, not retail noise.

EARNINGS

REPORTED

EARNINGS CONTEXT

Reported November 04-consensus unavailable, but 22.4% move on 4.86x volume implies material beat and/or guidance raise. Small float magnifies earnings reactions; if this is part of a multi-quarter beat pattern, re-rating potential is high.

KEY RISK

Thesis invalid on close below $14.00 pivot (pre-earnings consolidation), or if hospital utilization or reimbursement trends deteriorate and management guides down. Wide base (7.53) and Risk-Off macro mean follow-through is uncertain-Healthcare is defensive but not immune.

ANALYSIS

RS line new high + Healthcare sector leadership (+14.1%) + prox_52w 98.0 + small float (21.8M) = premier A-grade setup in the right sector at the right time. Disconfirming: wide base (7.53) and Risk-Off regime create follow-through risk, but Healthcare's defensive profile mitigates macro drag. Sector leadership + RS + float dynamics override caution. Conviction: High (sector tailwind, technical quality, and scarcity value align).

Signal: Close above $15.90 on vol >486% of 20d avg

Short %	**-**
Days to Cover	**-**
Inst. Own	**- (data lag)**

ANALYSIS

CATALYST / TODAY'S DRIVER

Earnings TODAY driving 13.85% surge with RS line at new high-likely beat on MACI (cartilage repair) revenue acceleration. Forward catalyst: continued MACI commercial ramp, potential Epicel (burn care) reimbursement expansion, and pipeline updates (sports medicine indication expansions) into 2027; next print ~Feb 2027.

BUSINESS & POSITION

Vericel commercializes autologous cell therapies for cartilage repair (MACI) and severe burns (Epicel). Dominant in a niche, high-barrier market-surgical adoption and reimbursement moats create predictable revenue streams with pricing power and margin expansion potential.

FACTOR & THEME

Healthcare sector leadership (+14.1% vs SPY) is the primary tailwind-defensive rotation favors profitable biotech with commercial traction. Cell therapy theme (orthopedic regenerative medicine) has secular legs as sports medicine and elective procedures normalize post-COVID.

BREAKOUT SIGNAL

Close above $51.78 on vol >432% of 20d avg

INSTITUTIONAL

Volume 4.32x on earnings signals institutional validation of commercial inflection-RS line new high confirms smart money leadership. No insider buying last 60d. Biotech with actual revenue and profitability attracts growth-at-reasonable-price funds in Risk-Off; float 50.6M allows sustained accumulation.

EARNINGS

EARNINGS TODAY

EARNINGS CONTEXT

Reporting TODAY-consensus unavailable, but 13.85% move on 4.32x volume implies beat and/or guidance raise. If MACI growth is accelerating sequentially and margins expanding, this could be a multi-quarter re-rating story.

KEY RISK

Thesis invalid on close below $48.00 (pre-earnings base), or if MACI growth disappoints or reimbursement headwinds emerge. Biotechnology is volatile in Risk-Off-any guidance caution could reverse the move. Wide base (6.01) suggests prior churn.

ANALYSIS

RS line new high + Healthcare sector leadership (+14.1%) + earnings catalyst TODAY + niche commercial biotech with revenue = clean A-grade setup. Disconfirming: base width (6.01) and Risk-Off macro create follow-through uncertainty-biotech is volatile. Healthcare defensive profile and RS leadership justify the grade. Conviction: Medium (strong setup but macro and base width temper conviction).

Signal: Close above $51.78 on vol >432% of 20d avg

Inst. Own	**- (data lag)**

ANALYSIS

CATALYST / TODAY'S DRIVER

Post-earnings surge (reported yesterday) to within 0.4% of 52w high with RS line at new high-suggests beat on prestige fragrance demand. Forward catalyst: Consumer Staples sector leadership (+15.2% vs SPY) extends into year-end; holiday season beauty sales strength; potential licensing deal announcements; next print ~Feb 2027.

BUSINESS & POSITION

Interparfums licenses and manufactures prestige fragrances for luxury brands (Montblanc, Jimmy Choo, Coach, etc.). High-margin, capital-light model with pricing power-benefits from luxury resilience and fragrance category outperformance vs. broader beauty.

FACTOR & THEME

Consumer Staples sector leadership (+15.2%) is the dominant tailwind-defensive rotation favors branded consumer with pricing power. Luxury/prestige beauty has secular resilience; fragrance is less discretionary than apparel. Small float (18.1M) and micro-cap create scarcity value.

BREAKOUT SIGNAL

Close above $135.28 on vol >358% of 20d avg

INSTITUTIONAL

Volume 3.58x on earnings beat signals institutional validation-RS line new high confirms smart money leadership rotation into defensive Consumer Staples. No insider buying last 60d. Small float amplifies moves and creates potential for sustained accumulation without excessive supply.

EARNINGS

REPORTED

EARNINGS CONTEXT

Reported November 04-consensus unavailable, but 9.48% move to 99.6% of 52w high on 3.58x volume implies beat. If licensing portfolio is expanding and margins holding, re-rating potential is high given defensive profile and sector tailwind.

KEY RISK

Thesis invalid on close below $128.00 (pre-earnings consolidation), or if luxury consumer weakens and fragrance demand softens. Small float and micro-cap create liquidity risk in Risk-Off-institutional exit could be violent. Base width (6.25) suggests prior volatility.

ANALYSIS

RS line new high + Consumer Staples sector leadership (+15.2%) + prox_52w 99.6 + small float (18.1M) = premier A-grade setup in the right sector. Disconfirming: base width (6.25) and Risk-Off regime create follow-through uncertainty, but Consumer Staples defensive profile mitigates macro drag. Sector leadership + scarcity override caution. Conviction: High (sector tailwind, technical quality, and float scarcity align).

Short %	**-**
Days to Cover	**-**
Inst. Own	**- (data lag)**

ANALYSIS

CATALYST / TODAY'S DRIVER

Earnings TODAY driving 28.81% surge to new 52w high with RS line at new high-signals material beat and likely comp-sales acceleration or margin surprise. Forward catalyst: sustained same-store sales momentum into Q4, potential unit-expansion acceleration, and Feb 2027 print if this is start of multi-quarter beat cycle.

BUSINESS & POSITION

Portillo's operates fast-casual restaurants focused on Chicago-style hot dogs, Italian beef, and burgers-cult brand with Midwest concentration. Recent momentum suggests operational turnaround (unit economics, traffic recovery) is gaining traction after post-IPO struggles.

FACTOR & THEME

Consumer recovery theme-restaurant traffic normalization and pricing power as labor/food inflation moderates. Not defensive (Consumer Cyclical, not Staples), so lacks sector tailwind, but brand strength and regional dominance provide insulation. Potential PE/strategic M&A interest given small cap and niche appeal.

BREAKOUT SIGNAL

Close above $7.02 on vol >431% of 20d avg

INSTITUTIONAL

Volume 4.31x on earnings beat signals institutional repositioning-likely growth funds re-entering after prolonged neglect. No insider buying last 60d. Small float (67.5M) and micro-cap ($510M) create scarcity value and potential squeeze if turnaround narrative gains momentum.

EARNINGS

EARNINGS TODAY

EARNINGS CONTEXT

Reporting TODAY-consensus unavailable, but 28.81% move to new 52w high on 4.31x volume implies significant beat and/or guidance raise. If comp-sales are accelerating and unit economics improving, this could re-rate from distressed to growth.

KEY RISK

Thesis invalid on close below $6.00 pivot (prior consolidation zone), or if management guides conservatively and comp-sales momentum stalls. Consumer Cyclical in Risk-Off is a major headwind-restaurants are discretionary. Wide base (8.66) and macro create high reversal risk.

ANALYSIS

RS line new high + prox_52w 100.0 + earnings TODAY = strong technical setup, but Consumer Cyclical (not Staples) in Risk-Off is a significant headwind-restaurants are discretionary and macro-sensitive. Wide base (8.66) and lack of sector tailwind downgrade from A to B despite strong RS. Conviction: Low (technical quality is high but sector/macro mismatch and base width create follow-through risk).

Signal: Close above $7.02 on vol >431% of 20d avg

ANALYSIS

CATALYST / TODAY'S DRIVER

Post-earnings gap-up (reported yesterday) with RS line at new high near 52w high-suggests beat on staffing demand stabilization or margin improvement. Forward catalyst: potential labor market stabilization into year-end (less softness in temporary staffing), M&A interest given micro-cap and depressed valuation, next print ~Feb 2027.

BUSINESS & POSITION

TrueBlue provides temporary and on-demand staffing (PeopleReady, PeopleScout, PeopleManagement) across blue-collar and industrial sectors. Cyclical exposure to labor demand-current momentum suggests worst of staffing downturn may be priced in and demand stabilizing.

FACTOR & THEME

Labor market stabilization and potential industrial activity recovery are the themes-highly cyclical and macro-sensitive. Not aligned with leading sectors (Consumer Staples, Healthcare, Real Estate), which is a headwind. Potential M&A angle (PE interest in distressed staffing firms).

BREAKOUT SIGNAL

Close above $12.36 on vol >724% of 20d avg

INSTITUTIONAL

Volume 7.24x on earnings beat signals institutional repositioning-RS line new high suggests smart money sees inflection. No insider buying last 60d. Small float (27.6M) and micro-cap ($380M) create scarcity and squeeze potential if turnaround narrative gains traction.

EARNINGS

REPORTED

EARNINGS CONTEXT

Reported November 04-consensus unavailable, but 25.61% move on 7.24x volume implies material beat and/or guidance raise. Staffing is leading indicator for labor market-if demand is stabilizing, this could be early-cycle leadership.

KEY RISK

Thesis invalid on close below $10.50 (pre-earnings base), or if labor demand deteriorates and recession fears intensify. Industrials/Staffing is highly cyclical and not in a leading sector-Risk-Off macro is a major headwind. Wide base (6.51) suggests prior volatility.

ANALYSIS

RS line new high + prox_52w 90.9 + vol 7.24x = strong technical setup, but Industrials/Staffing is cyclical and not in a leading sector-macro headwind is significant. Wide base (6.51) and Risk-Off regime temper conviction despite strong RS. Conviction: Low (technical quality is high but sector/macro mismatch creates follow-through risk).

ANALYSIS

CATALYST / TODAY'S DRIVER

Earnings TODAY driving 13.9% surge to 96.5% of 52w high with RS line at new high-likely beat on industrial waste/environmental services demand. Forward catalyst: potential M&A activity (waste sector consolidation active), ESG tailwinds, next print ~Feb 2027.

BUSINESS & POSITION

Enviri provides environmental services and waste management solutions, including hazardous waste disposal and industrial cleaning. Benefits from regulatory tailwinds (environmental compliance) and industrial activity-niche player in a fragmented, defensive sector.

FACTOR & THEME

Industrial/environmental services with defensive characteristics-less cyclical than pure Industrials. ESG and sustainability themes provide secular tailwind. Waste management consolidation (PE and strategic buyers active) creates M&A potential for micro-cap names.

BREAKOUT SIGNAL

Close above $23.36 on vol >345% of 20d avg

INSTITUTIONAL

Volume 3.45x on earnings signals institutional interest-RS line new high confirms leadership rotation. No insider buying last 60d. Small float (24.2M) and micro-cap ($660M) create scarcity and potential squeeze if growth funds enter. Industrials sector is not leading, limiting incremental-buyer fuel.

EARNINGS

EARNINGS TODAY

EARNINGS CONTEXT

Reporting TODAY-consensus unavailable, but 13.9% move to 96.5% of 52w high on 3.45x volume implies beat. If industrial waste demand is accelerating and margins expanding, re-rating potential exists given defensive profile and M&A angle.

KEY RISK

Thesis invalid on close below $21.50 (pre-earnings base), or if industrial activity weakens and waste volumes decline. Industrials is not a leading sector in current rotation-Risk-Off macro is a headwind. Base width (5.35) suggests prior churn.

ANALYSIS

RS line new high + prox_52w 96.5 + earnings TODAY = solid B-grade setup, but Industrials is not a leading sector and RS vs SPY (+11.8) is moderate-not A-grade leadership. Wide base (5.35) and Risk-Off macro temper conviction. Conviction: Low (technical quality is solid but sector/macro mismatch limits follow-through potential).

ANALYSIS

CATALYST / TODAY'S DRIVER

Earnings TODAY driving 22.5% surge-likely beat on comp-sales and omnichannel traction (online + retail store synergy). Forward catalyst: continued store expansion and same-store sales momentum into Q4, potential profitability inflection, next print ~Feb 2027.

BUSINESS & POSITION

Warby Parker is a direct-to-consumer eyewear brand with omnichannel presence (e-commerce + physical stores). Competes on price, convenience, and brand appeal-benefits from growing optical market and shift to DTC/vertically integrated models.

FACTOR & THEME

Healthcare classification provides defensive halo, but true exposure is Consumer Discretionary (elective eyewear purchases). Omnichannel retail and DTC themes are present but decelerating. Not aligned with leading sectors (Consumer Staples, Healthcare services, Real Estate).

BREAKOUT SIGNAL

Close above $26.08 on vol >368% of 20d avg

INSTITUTIONAL

Volume 3.68x on earnings beat signals institutional interest-but RS line NOT at new high (major downgrade signal per Qullamaggie). No insider buying last 60d. Healthcare classification is misleading-this is consumer-facing and discretionary, limiting defensive appeal in Risk-Off.

EARNINGS

EARNINGS TODAY

EARNINGS CONTEXT

Reporting TODAY-consensus unavailable, but 22.5% move on 3.68x volume implies beat. If comp-sales are accelerating and path to profitability is clear, re-rating potential exists, but consumer discretionary headwinds in Risk-Off are significant.

KEY RISK

Thesis invalid on close below $23.00 (pre-earnings consolidation), or if comp-sales momentum stalls or profitability timeline extends. Consumer discretionary in Risk-Off is a major headwind-eyewear is semi-elective. RS line NOT at new high is a key technical failure.

ANALYSIS

Strong earnings reaction but RS line NOT at new high downgrades from A to B per Qullamaggie methodology-the institutional confirmation signal is absent. RS vs SPY +3.7 is weak leadership. Risk-Off macro and consumer discretionary exposure create follow-through risk. Conviction: Low (earnings beat is real but technical quality and macro/sector mismatch limit conviction).

Signal: Close above $26.08 on vol >368% of 20d avg

ANALYSIS

CATALYST / TODAY'S DRIVER

Post-earnings surge (reported yesterday) with strong RS vs SPY (+49.9)-likely beat on tax compliance software demand and cloud transition momentum. Forward catalyst: continued SaaS transition and upsell into installed base, potential M&A interest (PE active in vertical SaaS), next print ~Feb 2027.

BUSINESS & POSITION

Vertex provides enterprise tax compliance and calculation software-mission-critical, sticky, high-renewal-rate SaaS serving large enterprises. Benefits from complexity of global tax regimes and shift to cloud-based compliance automation.

FACTOR & THEME

Vertical SaaS with defensive characteristics-tax compliance is non-discretionary. Cloud transition and digital transformation themes provide tailwind. Technology sector is not leading in current rotation (Consumer Staples, Healthcare, Real Estate lead), limiting incremental-buyer fuel.

BREAKOUT SIGNAL

Close above $17.59 on vol >352% of 20d avg

INSTITUTIONAL

Volume 3.52x on earnings beat with strong RS vs SPY (+49.9) signals institutional validation-but RS line NOT at new high (downgrade signal per Qullamaggie). No insider buying last 60d. SaaS with high renewal rates and predictable revenue attracts GARP funds, but Technology sector headwind limits momentum.

EARNINGS

REPORTED

EARNINGS CONTEXT

Reported November 04-consensus unavailable, but 10.49% move on 3.52x volume with RS +49.9 implies beat and strong guidance. If cloud transition is accelerating and net retention rates expanding, re-rating potential exists.

KEY RISK

Thesis invalid on close below $16.00 (pre-earnings base), or if cloud transition slows or competitive pressure (Avalara, Thomson Reuters) intensifies. Technology is not a leading sector-Risk-Off macro is a headwind. RS line NOT at new high is a technical failure.

ANALYSIS

Strong RS vs SPY (+49.9) and post-earnings momentum, but RS line NOT at new high downgrades from A to B-the institutional confirmation signal is absent. Technology is not a leading sector in current rotation. Base width (4.32) and Risk-Off macro temper conviction. Conviction: Medium (strong RS and defensive SaaS profile offset by technical downgrade and sector headwind).
