

Appendix — evidence and methodology

The audit trail for the Equity Research v4 report on NOW. It is not a summary: it records the event reconciliation, where every figure came from, what was withheld and why, and the formula behind each derived value. Market data as of 2026-07-24T20:00:00+00:00.

1. Event-state reconciliation

Before any rating the report reconciles the ET clock, the earnings calendar, the issuer's filings and the call status into one event state. This run resolved to POST-CALL NOT TRANSCRIPT-VERIFIED and a directional rating was permitted. [OBS]

- Results are out and the call has concluded by the clock (111h since release, a later ET day), but no transcript feed verifies what was said.

2. Estimates and consensus ledger

Endpoint	Coverage
price_target	premium-gated
recommendation	ok
eps_estimate	premium-gated
rev_estimate	premium-gated
surprises	ok

Consensus recommendation: Buy (weighted score 1.85 on the 1-5 scale, as of 2026-07-01), from finnhub /stock/recommendation. [OBS]

3. Valuation method

Enterprise value = market cap \$102.14B + total debt \$1.48B – cash \$2.50B = \$101.12B. EV / revenue uses the latest quarter annualised (run-rate), and FCF yield uses annualised quarterly free cash flow over market cap; both are labelled run-rate, not trailing-twelve-month. [DER]

A historical MULTIPLE band and forward bull/base/bear prices are deliberately NOT produced: the first needs a point-in-time historical EPS series and the second needs issuer guidance, neither available on this tier. Dividing the 52-week PRICE range by current EPS — which the prior version did — is circular (the implied prices are just the price range) and has been removed.

Free cash flow = operating cash flow – capital expenditure (PP&E purchases), both taken from the latest filed cash-flow statement. [DER]

An XBRL reference reads accession · tag · period end; the tag is a us-gaap concept shown with word breaks (remove the spaces to reconstruct the exact tag).

6. Insider transactions (Form 4)

A Form 4 records what an insider did, not why. Sales under a plan adopted earlier, shares surrendered to cover tax on a vest, and a discretionary open-market sale all file the same way, and this report does not read any of them as a view on the stock. [\[OBS\]](#)

7. Institutional filings (Schedule 13D / 13G)

Ownership interpretation unavailable: 6 of 6 could not be attributed to a named filer. No stake size is parsed from any filing body, so the count below is a count of filings and nothing more. [\[OBS\]](#)

8. Options, open interest and implied volatility

unavailable — no options feed is wired into this report; a chain, its open interest and implied volatility are not filed facts and were not sourced.

9. Sampled message-board records

Raw, unverified, anonymous. Kept out of the report and reproduced here only so any sentiment count can be checked.
